SURESH POLLAI

(Frontend Developer | Mern Stack) 5+ years

+91 9652819502 mail2suresh509@gmail.com linkedin.com/in/suresh1509

Concise Summary:

- Built responsive and high-performance web interfaces with **React.js, Next.js and Tailwind CSS** ensuring cross-browser compatibility.
- Enhanced frontend performance by applying best practices in **JavaScript, TypeScript and** optimization techniques to improve load times and user experience.
- Developed scalable full-stack applications using **React.js, Nodejs** with seamless UI/UX, robust API integrations and performance optimization.
- Designed and implemented RESTful APIs using **Node.js and Express.js,** integrating databases like **MongoDB and MySQL** for efficient data handling.
- Collaborated within **Agile teams**, partnering with designers and backend engineers to deliver clean, maintainable, and scalable codebases.
- Wrote comprehensive unit test cases using **Vitest**, **Jest/Mocha/Chai** to ensure reliability of application logic.

Summary

Software Developer with **5+ years** of experience in building responsive, user-centric web applications and working in emerging technologies. Expertise in developing web interfaces, optimizing performance and ensuring cross-browser compatibility. Adept at collaborating in Agile environments, working with
cross-functional teams to deliver high-quality, maintainable code. Passionate about staying updated with industry trends and best practices to enhance web performance and user experience.

Technical Skills

Frontend: React.js, Next.js, TypeScript, Zustand, Redux, HTML, CSS, JavaScript (ES6+), Apex charts, re charts, React Native (Expo), Tailwind CSS, Bootstrap, ShadCN, Radix UI, Material UI, Web3

Auth: AWS Cognito (SSO), OAuth 2.0, JWT

Testing Frameworks:Vitest, Jest, Mocha, Chai

Tools & Utilities: Git, Postman,REST API, GraphQL, Swagger, Render, Vercel

DevOps & Deployment: Docker, AWS EC2, S3

AI/LLM Integration: LLM Integration (OpenAI, LangChain, Ollama)

Backend & Databases: Node.js, Express.js, MongoDB, MySQL

Platforms & IDE: macOS, Windows, Ubuntu, VSCode

Work Experience:

Virtusa(C2H) Project June 2025- Present
Role: Senior Software Engineer
Project: Storage Auctions

Worked on the seller and bidder auction dashboards functionality and many bug fixes.
Tech Stack: Nextjs, TypeScript, S3, Tailwind, Nodejs

Tech Finelabs, Hyderabad(US Product July-2024 -May 2025
Role: Frontend Engineer

FluidCloud (Multi cloud Migration project) dev.fluidcloud.com

FluidCloud is a multi-cloud management platform that manages cloud infrastructure across cloud providers and accounts.

- Developed the user dashboard and used zustand state management.
- Integrated SSO login and developed auth forms.
- Utilized Re Charts for dashboard charts.
- Integrated OpenAI-powered chatbot to assist users with cloud resource queries
- Collaborated with backend developers and Integrated Apis

Pebble (Global Carbon Emission Detection) gopebble.com

Designed and developed a web application from scratch to calculate carbon emissions for organizations and their entities. The application also evaluates cloud footprints and incorporates task management functionalities for streamlined carbon calculation.

- Developed admin and user dashboards
- Developed and integrated role based authentication forms
- Utilized Apex Charts for dashboard analytics
- Collaborated with backend developers and Integrated Apis
- Integrated with external ERP accounting systems like Xero, Workday

and ApiDeck Tech Stack

- Frontend: Next.js, JavaScript, React Query, Zustand, Tailwind CSS, Apex Charts, AWS Cognito
- Backend: GoLang, Database: PostgreSQL, PGAdmin 4

Pebble Employee App

Developed an employee app that conducts surveys and features a chatbot interface. Users can interact with an OpenAI LLM-powered chatbot, which analyzes responses and displays the amount of carbon emission insights in charts and table format.

Key Contributions

- Designed and implemented the employee survey module
- Developed an LLM-powered chatbot interface for interactive insights
- Integrated carbon emission analytics with chart and table

visualizations Tech Stack

- Frontend: React Native (Expo), TypeScript, Tailwind CSS, Apex charts
- Backend: Python, OpenAI LLM

Softobiz Technology Pvt Ltd, Hyderabad

Apr-2022-Sep 30-2023

Role: Software Developer(Web3, Mern Stack)

TokenHouse Real Estate https://tokenhousepm.com

Designed & developed the frontend of a real estate platform, enabling property listings, geolocation services, and
payment processing. The application provides real estate agents and administrators with tools to manage property listings efficiently.

Key Contributions

- Built frontend components using JSX, React.js and Tailwind CSS
- Integrated APIs for geolocation, property listings, and payment processing
- Utilized web3 tech stack to store user data in public blockchain.
- Developed features for real estate agents and administrators
    - Adding, editing, and deleting property listings
    - Uploading photos and videos for property listings

Tech Stack

- Frontend: React.js, Redux, Ethers.js, JavaScript, HTML, Tailwind CSS

AI-Powered Car Inspection Solution

Overview

Developed a web-based AI-powered car inspection platform that utilizes visual image analysis to detect scratches and dents on vehicles. The application provides detailed inspection reports and a user-friendly interface for viewing results.

Key Contributions

- Built responsive and interactive frontend using React.js, JSX, and CSS
- Integrated RESTful APIs for fetching inspection results and reports
- Utilized Axios for efficient API communication
- Developed user-friendly interfaces to display AI-detected damages and detailed reports
- Implemented real-time image analysis visualization using the LLAVA

  LLM model Tech Stack

- Frontend: React.js, JSX, CSS, Axios
- Backend: Python (Flask), MongoDB, Docker
- AI Model: LLAVA LLM (for visual image analysis)

Eabyas Info Solutions, Hyderabad

May-2021- Feb-2022

Software Developer -(Mern Stack)

- Create web applications/web services on Linux/Windows-based environments
- Program and develop softwares using open source frameworks
- Participate in design and code reviews

Ai WorldSchool (Ecommerce Course Platform)

- Implemented user authentication, a dynamic course catalog with search and filtering options, and a secure shopping cart and checkout system.
- Integrated payment gateways to facilitate transactions.
- Admin panel for site management and analytics.

Sr Web Services, Hyderabad Nov-2019 Apr-2021
Web Developer

- Convert static websites into dynamic sites and host websites in hostinger and godaddy.
- Email, Sms, live chat, payment gateway Integrating.
- Developed web admin dashboards.

Education Details

Bachelor of Technology In Computer Science with Grade: A [2015 - 2019]
— Jawaharlal Nehru technological university, Hyderabad

Certifications

1. JavaScript Certification from Scaler
2. NodeJs Certification from Scaler
3. Blockchain Certification from simplilearn

Achievements

Best employee of the month for completing the sprint goals on tight deadlines

Personal Details

Marital Status: Single
Hobbies: Walking, Reading books
Languages: Telugu, Oriya, Hindi, English

Declaration

I declare that the information furnished above is true to my knowledge.
Date:
Place: Hyderabad, India SURESH POLLAI
