Summary

A highly motivated and detail-oriented Automation Tester with 2.5+ years of experience in both manual and automation testing. Proficient in designing, developing, and executing test plans and test cases. Skilled in using various testing tools and frameworks to ensure the quality and reliability of software applications.

Professional Summary

- Perform end-to-end testing activities, including test planning, test case design, execution and reporting by conducting thorough requirements analysis to understand the project scope.

- Execute various testing types (Smoke, Functional, Integration, System and Regression testing) to validate software against established requirements.

- Manage and Track defects using defect management tools (jira).

- Participating in daily stand-ups, sprint planning, retrospectives and other meetings in comply with scrum ceremonies of Agile.

- Thorough understanding of various models of software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC

- Good understanding of Front-End Testing (GUI testing by both Manual & Automation) and Back-End Testing with the tools like Postman &Fire Flink.

- Developing optimized Automation Framework (Hybrid driven Framework) and performing Batch Execution, Group Execution, Parallel Execution and Cross Browser Testing and analyzing the TestNG report.

- Knowledge of WebDriver and Web Elements, Locators for browser handling and deriving reliable X-path Expressions making use of TestNG and Apache POI libraries for Data Driven approach and to create Page Objects/POM.
- Usage of OOP`s, Arrays, Collections Map and Exception Handling concepts of Java in test scripts and knowledge of SQL Queries.

Skills

- Selenium
- CORE JAVA Strong in Collections, Oops.
- SQL
- TestNG
- JIRA
- Apache POI
- Jenkins
- Cucumber-BDD
- Postman
- Rest Assured

Work Experience

- Working as an Automation Tester for CDP360 Technologies Private Ltd, Chennai from March '24 to Till Date.
- Worked as a Software Engineer for TCS, Bangalore from May '22 to Oct '23

Automation Tester

Project: 1

Name: Learning Management System (LMS)

Team Size: 2

Tools: Eclipse, Jira.

Description: Designed and developed a comprehensive digital E-learning platform (LMS) integrated with a school management system, aimed at enhancing the educational experience. The platform includes dedicated portals for Principals, Teachers, and Students, each offering unique functionalities aligned with their roles. Spearheaded the development of the student portal, which incorporates essential features such as an interactive Dashboard, subject-specific Courses, NEET-JEE preparation materials, a Q&A section, Test space for practice exams, and New Articles to keep students updated

Responsibilities:

- Designed and executed automated test scripts using Selenium to validate the functionality of the LMS platform across different user portals (Principal, Teacher, and Student).
- Developed and maintained test cases to ensure the seamless operation of key features, including Dashboard, Courses, NEET-JEE, Q&A, Test Space, and New Articles.
- Identified, reported, and tracked bugs, ensuring quick resolution and maintaining the quality of the platform.
- Developed and executed automated test scripts using Selenium WebDriver.
- Conducted manual testing to identify and document software defects.
- Collaborated with developers to resolve issues and improve software quality.

Manual Tester

Project: 2

Name: RXR Application. Client: Walgreens Boot Alliance.

Team Size: 5

Defect tracing tool: JIRA

Description: RXR is a health-based application which is used to secure patient details. By using the RXR application we can create the Rx of the patient. To sell the Rx we follow multiple steps like Patient Profile, Data Entry, Data review, Clinical Evaluation, Immunization, Product View, then finally sell the Rx. In Every screen must find the UI/UX bugs and Functional Testing of every Hotkeys.

Responsibilities:

- Responsible for understanding the application and business flow of the application.
- Analyzing the client requirement as per the documents provided.
- To be part of UX/Ui testing finding bugs in all screens throughout the application level as per the client requirements.
- Took part in estimating, prioritizing, planning and coordinating quality testing activities.
- Worked on various types of testing- Smoke Testing, Functional Testing, System Integration Testing and Regression Testing.
- Used to raise the defect documents in Jira tool.
- Responsible for bug reporting with root cause and re-testing systems before client handover.
- Used to work on Retesting and Regression Testing as well.
- Designed and executed test plans and test cases for various software applications.
- Performed functional, regression, and performance testing to ensure software quality.
- Identified, documented, and tracked software defects using bug tracking tools.
- Collaborated with cross-functional teams to understand project requirements and deliver high-quality software.

Education

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering (ECE)

Jawaharlal Nehru Technological University, Kakinada (JNTUK)

Graduated: 2019
