PRIYANKA JHANSI RANI R

Software Developer

priyankajrani2001@gmail.com | 9345103403 | LinkedIn | GitHub

BRIEF SUMMARY:

A skilled software developer with expertise in frontend (HTML5, CSS3, JavaScript, React.js), backend (Python, Django, Node.js, Express.js), database (MYSQL, MongoDB), REST API, and Agile methodologies. I am applying for a Software Developer position in your company where I can apply my technical knowledge, creativity, problem-solving, and innovative approach. With excellent analytical and reasoning skills, I am excited to collaborate on projects and be a part of your dynamic team.

SKILLS:

Frontend: React.js |JavaScript | HTML5 | CSS3

Backend: Python |Django | Node.js | Express.js

MS Office: Word | PowerPoint | Excel

VCS: GitHub, Git

Database: MYSQL, MongoDB

PROJECTS:

1. Full-Stack Web Application for Health Monitoring System

Tech Stack: Vscode | Python | Django | HTML5 | CSS3 | db.sqlite3 | REST API

- Developed a comprehensive full-stack Health Monitoring System to track and analyze vital health metrics.
- Implemented features such as user authentication, real-time data integration from wearable devices, and secure storage of electronic medical records.
- Enabled seamless doctor-patient communication through secure messaging, video consultations, and automated health reminders, enhancing overall patient care.

2. Configuring E-Commerce website – (MERN STACK PROJECT)

Tech Stack: Vscode | React.js | Node.js | JavaScript | HTML5 | CSS3 | MongoDB

- Designed and developed a customizable E-Commerce website using the MERN stack (MongoDB, Express.js, React.js, Node.js) to enable dynamic site structure modifications without coding knowledge.
- Implemented user-friendly features such as product management, shopping cart, and secure payment processing to enhance the shopping experience.
- Utilized responsive design principles and integrated RESTful APIs for seamless interaction between the frontend and backend, ensuring a smooth user experience across devices.

EXPERIENCE:

Software Technical Trainer | Software Development

Livewire,Tenkasi

Duration: 2 years

- Conducted training sessions for students and professionals on software development concepts and tools, focusing on HTML5, CSS3, JavaScript, React.js, Express.js, Node.js, and Python.

- Designed and developed course materials, including tutorials, assignments, and projects, to facilitate hands-on learning.
- Provided individual mentorship and support to students, helping them understand complex topics and complete their projects successfully.
- Collaborated with the development team to create training programs aligned with industry standards and emerging technologies.
- Received positive feedback for effective teaching methods and contributing to the professional growth of trainees.

QUALIFICATION:

Course	Institution	Percentage
B.E - CSE	JP College of Engineering, Tenkasi - 2022	75%
HSC	Government Hr.Sec.School, Meelapvoor - 2018	63%
SSLC	Sermathai Vasan Hr.Sec.School, Surundai - 2016	67%

CERTIFICATIONS:

- Completed an Online Certification Course on “Python Full-Stack Development" in Rajalakshmi Eduverse. (2023)
- Workshop on “Android Studio App Development Using Kotlin” from Tenkasi.
- Innate Talent Conducted on JavaScript & React.js Framework.
- Workshop on “Front End Development using HTML, CSS, JavaScript”.
- Attended an internship on “Bigdata & Web Development” at Yamee Cluster in Chennai. (2022)
