Indore

Education

- **Master of Technology in** Computer Science

  Patel Collage Of Science& Technology
  Pursuing

- Bachelor of Technology in Computer Science

  Prestige Institute of Engineering Management & Research
  2018-2022

Skills

Languages: Ruby, Java, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: Ruby on Rails, Bootstrap

Database anagement: PostgreSQL, MySQL

Version Control: Git, GitHub

Testing & Debugging: RSpec

Integration & APIs: RESTful APIs, OAuth, JWT, Payment Gateway

Summary

Experienced Ruby on Rails developer passionate about building high- quality software, innovation, and problem-solving. Skilled in writing clean, scalable, and efficient code within a functional framework, as well as integrating third-party services for enhanced functionality.

Proven ability to collaborate effectively in cross-functional teams, ensuring successful project delivery throughout the development lifecycle. Committed to maintaining bug-free applications with over 95% code coverage and pioneering CI/CD practices. Continuously learning and staying updated with industry trends, I have a track record of delivering successful projects and am eager to contribute to your team's success.

Work Experience

Shriffle Technologies PVT. LTD., Indore

June 2022 - April 2024

- Led a team in developing a Facial Health Checkup and Consultation App, implementing a personalized recommendation system based on health checkup reports. This included providing users with tailored diet suggestions and guidance on consulting with doctors, coaches, or AI assistants.
- Highly involved in enhancing the active admin with custom functionality and designs for improved user experience.
- Implemented unit tests and integration tests, resulting in a 25% reduction in production bugs.
- Played a key role in optimizing the application creation cycle through effective leadership in team meetings.
- Implemented dynamic content from admin and API on the dashboard for real-time data display.

Continuous Integration/ Continuous Deployment (CI/CD): CI/CD Tools (GitLab)

Soft Skills: Leadership Quality, Effective communication, Problem-Solving, Teamwork

Strength

Problem-Solving Utilized problem-solving skills to analyze and diagnose complex issues resulting in efficient resolutions. -Very Good

Collaboration Collaborated effectively with cross-functional teams to deliver high-quality software solutions within strict deadlines. -Fluent

Adaptability Adapted quickly to changing project requirements and technologies to ensure seamless development processes. -Very Good

Projects:

Facial Health Checkup and Consultation App:

●Implemented AI-driven facial recognition technology to analyze health checkup reports and provide personalized recommendations based on facial features and patterns.
●Implemented personalized recommendation system based on health checkup reports.
●Enhanced active admin functionality and designs for improved user experience.
●Integrated telemedicine features, allowing users to consult with healthcare professionals remotely for personalized health advice and guidance.

Swiggy-like Laundry Booking App:

●Collaborated with a cross-functional team to conceptualize, design, and implement key features.
●Implemented user registration, laundry service selection, scheduling, payment processing, and order tracking functionalities.
●Integrated geolocation services to provide accurate pickup and delivery time estimations for customers.
●Implemented a robust feedback and rating system to gather customer feedback and improve service quality continuously

Ecommerce App:

●Worked on category, subcategories, and product modules, along with different user role modules and orders management.
●Implemented push and email notifications using SendGrid and Firebase.
●Developed admin module for managing details from merchants and handling all functionalities, specifications, and complex associations for different user roles.
● Ensured payment reliability using Stripe API.
●Optimized checkout process with one-click payments, guest checkout options, and secure payment gateways for improved user experience and conversion rates
