Objective:

Seeking a challenging Ruby on Rails Developer role where I can leverage my expertise in application development, backend systems, and API integration to contribute to organizational success. Committed to continuous learning, teamwork, and delivering robust solutions.

Professional Summary:

- **3 years of experience** in application development, specializing in **Ruby on Rails** within corporate environments.
- Currently employed as a Ruby on Rails Developer at **Tata Consultancy Services (TCS)**.
- Proficient in designing, building, and configuring applications to meet business and application requirements.
- Skilled in backend development, **RESTful API** creation, and database management with **PostgreSQL** and **Redis**.
- Additional expertise in **React.js**, **HTML5**, **CSS**, **JavaScript**, and deployment tools like **Jenkins** and **Kubernetes**.
- Strong troubleshooting capabilities, ensuring optimal application performance.

Projects:

Guided Tour for Enhanced User Onboarding

- Designed and implemented a guided navigation feature using Ruby on Rails to improve user onboarding.
- Resulted in a **25% increase** in user retention and product adoption.

RESTful Api for Bookstore Management

- Developed a RESTful API enabling users to create, update, and delete bookstore orders.
- Ensured seamless backend integration with frontend systems.

E-Commerce Backend Development

- Engineered APIs for product management, cart functionality, order placement, and real-time updates.
- Achieved scalability and enhanced user experience through robust backend systems.

Real-Time Use Cases and Troubleshooting:

- Resolved a critical issue in a live production environment by identifying database performance bottlenecks, optimizing SQL queries, and implementing caching strategies using Redis.
- Debugged and fixed a memory leak in a Ruby on Rails application, resulting in a **40% reduction** in server downtime.

- Designed a **fallback mechanism** for the Notifications API to ensure reliable delivery of critical user messages during service interruptions.

Professional Experience:

Ruby on Rails Developer
Tata Consultancy Services (TCS) | [Dec-2021] – Present

- ★ Collaborated with cross-functional teams to design, develop, and test applications using Ruby on Rails.
- ★ Built and managed **Notifications API** to trigger notifications via Push, Email, and SMS.
- ★ Developed **User Profile API** for user management and related functionalities.
- ★ Engineered **Conversation API** to facilitate real-time interaction between customers and consumers.
- ★ Troubleshot and debugged issues in live environments, improving application performance by 20%.
- ★ Implemented **security measures** and optimized data protection strategies.
- ★ Utilized **Git**, **Bitbucket**, and **Jira** for version control and project tracking.
- ★ Environment: Ruby on Rails, React.js, PostgreSQL, Redis, Docker, Jenkins, Visual Studio Code

Veritas Net Backup Administrator
DXC Technology | [Aug 2021] – [Dec 2021]

- ★ Managed virtual machines and backup solutions using **Veritas Net Backup**.
- ★ Implemented and tested the installation and update of file servers, print servers, and application servers.
- ★ Conducted storage balancing and ensured seamless data backup to cloud environments.
- ★ Tools: Microsoft Azure, Putty, Linux.

Key Skills

- **Languages & Frameworks:** Ruby on Rails, React.js, JavaScript, HTML5, CSS, Bootstrap.
- **Database Management:** PostgreSQL, Redis, SQL Server.
- **Tools & Technologies:** Git, Jenkins, Kubernetes, Swagger UI, Docker, Postman.
- **Soft Skills:** Team management, problem-solving, and effective communication.

Education

- B.Tech in Electronics & Communication Engineering **(ECE),**
  Lovely Professional University (**LPU),** Phagwara, Punjab | **CGPA:** 6.86 (2017 – 2021)

Responsibilities

- Requirements gathering, development, and deployment.
- Creating reusable components and integrating APIs.
- Upgrading the Applications & Performing data binding tasks and debugging complex issues.
