Education

- **B.Tech(ECE)** with 65% in **QIS College of Engineering & Technology**(2022)..

Personal Details

- Working as **Automation Test Engineer** in **Fauxiq Technologies Pvt Ltd** (July 2022 to TillDate).

Technical Skills

Programming Language	**: Java, JavaScript**
Test Automation Tools	**: Selenium WebDriver, Appium, Cypress**
Knowledge	**: PlayWright**
Framework	**: TestNG, Cucumber, Data Driven, Page Object Model**
Database	**: SQL Server**
Defect Tracking Tool	**: JIRA**
SCM Tool	**: GIT**
Integration Tool	**: Jenkins**
Build Tool	**: Maven**
APITesting	**: Postman, RestAssured**

Projects

Project#1 – OreCraftSolutions **Oct 2024-TillDate**

Description:

OreCraftSolutions, specializes in providing top-tier manufacturing solutions for the mining industry. Our extensive range of equipment and services is designed to meet the unique demands of mineral extraction and processing.

Role	Automation Tester
Testing Methodology	Agile
Application	Web Application
Programming Language	JavaScript, Java
Automation Tools and Utilities	Cypress, Cucumber , Appium, GIT, JIRA, Postman, RestAssured

Roles and Responsibilities:

- Developed and maintained automated test scripts using **JavaScript with Cypress and Cucumber**.
- Preparing the **Feature** file, **Step Definition**, **Hooks**, **POM**, **Utility class** in **CUCUMBER** framework
- Implemented automated test across Web and Mobile application using **Cypress** and **Appium.**
- Experience in API testing using Postman. (Validate response, response time, error code).
- Experience in writing, executing, and managing Test cases, Bug reporting, and tracking Defects using JIRA.
- Creating **regression** test suites for the identified tests
- Execution of **Smoke**, **Sanity** and **Regression** suites during new releases and analyses the test failure
- Well-versed with **Test Documentation** (Test Scenario, Test Case, TestData, Defect Report, and Test Metrics).

Project #2 – BastionVaults **Jan 2024- Sep 2024**

Description:

Ideal for a company offering high-security lockers or vaults, it implies a dependable service where customers can trust that their belongings are safely guarded.

Role	Automation Tester
Testing Methodology	Agile
Application	Web Application
Programming Language	JavaScript
Automation Tools and Utilities	Cypress, Cucumber, TestNG, JIRA, GIT, Postman

Roles and Responsibilities:

- Developed **Cypress test scripts for UI** of an e-commerce platform.
- Prepare the **Test scenarios**, **Test cases,** and **Test data.**
- **Self-review** and **Peer-review** the test cases
- Executing the **Functional** Test cases
- Logging the defects in **JIRA** and track the defects until it gets fixed.
- **Retest** the failed testcases and **Regression** Testing.
- Preparing the **Test execution reports** for the pass and failed testcases.
- Send **daily reports** to the Manager.
- Extending my support to Documentation.
- Understanding how **Web application** works and itstier architectures.

Project #3 – AirVoyage **July 2022- Nov 2023**

Description:

AirVoyage evokes a sense of global exploration and wanderlust, making it appealing to travelers seeking both convenience and inspiration in planning their trips.

Role	Automation Tester
Testing Methodology	Agile
Application	Web Application
Programming Language	Core Java
Automation Tools and Utilities	Selenium, TestNG, JIRA, GIT

Roles and Responsibilities:

- Prepared Test Plan, test Cases, Test scripts for the application based on the functional requirements, portal redesigned and test specs.
- Worked in an **Agile** environment, with the ability to accommodate and test the newly proposed
- changes at any point of time during the release.
- Evaluate and analyze Business Requirements, Functional Specification documents.
- Developed and executed test plans, and test cases utilizing QA best practices and standards.
- Designed, developed, and implemented automation testing framework utilizing **Java, TestNG and Selenium Web Driver.**
