- Competent with templating languages on the server side such as Slim and Liquid.
- data management - case verification and customer verification.

Projects

1. Coinania MVP - Final (PY)-5 | ROR Developer

Tools and technologies - Postman , Sublime , IDE, Gitlab,
Ruby on rails , Git, API, Rspec , Third Party Integration , Sidekie, Stripe Payment gateway, Firebase , Action Cable (Web socket) , Twilio Json | XMl , Grafna logs , Pipeline , Active Admin , Scheduling jobs

PROJECT-DESCRIPTION

Coinania is a social media app for churches to request prayers and
donations and post inspirational videos. Users can sign up and,
similar to Facebook, add their friends in their community, and create
posts, and request donations for causes. Users are also able to earn
K-coins within the application for interactions, allowing them to level
up as leaders within their community. There is also a whitelabeling
aspect to this app, where admins (individual churches) can
whitelabel Coinania and customize the platform to their own church, with their own logo.

3. Starjets-RN-replatform | ROR Developer

Tools: IDE, GIT, PSQL, Admin Dashboard Grafana, Ruby On Rails Programming

Roles: API Development, Testing and Quality Assurance, Troubleshooting, Security, Database Administration:

PROJECT-DESCRIPTION

High-net-worth Individuals worldwide, who I want to fly in a private aircraft.

PERSONAL DETAILS

DOB : 26 April 1996
Location : Indore M.P.
Father Name : Baksingh Chouhan
Mother Name : Nirmala Chouhan

2. Gaurav_Cukato.ai | ROR Developer

Tools And Technologies : Postman , Sublime , Gitlab, IDE
Ruby on rails , Git, API, Rspec , Third Party Integration , Sidekie, Stripe Payment gateway, Firebase , Action Cable (Web socket) , Twilio , Json | XMl , Grafna logs , Pipeline , Active Admin , Scheduling jobs

PROJECT-DESCRIPTION

cukato is an innovative cooking assistant Android app
that revolutionizes the way users cook by providing
video-guided recipes with voice-controlled playback.
The app offers a seamless experience for users to
explore a vast collection of recipes uploaded by
administrators, categorized and subcategorized for
easy access. Users can create reminders to cook
their favorite recipes and receive notifications for
newly added recipes, enhancing their culinary journey.

4. Meril - ROR Developer

Tools And Technologies : Postman , Sublime , Gitlab, IDE
Ruby on rails , Git, API, Rspec , Third Party Integration , Sidekie, Stripe Payment gateway, Firebase , Scheduling Action Cable (Web socket) , Twilio , Json | XMl , Grafna logs , Pipeline , Active Admin

project description

The Hospital Management System is a comprehensive application designed
to streamline appointment scheduling and enhance the delivery of healthcare services.
The platform allows patients to easily book appointments with healthcare providers,
view available time slots, and receive reminders for upcoming visits.
