- Accelerate learning and productivity for new hires or users. Introduce company culture, policies, tools, or platform features. And Reduce confusion and enhance engagement.

Project and Certifications

ADACTIN HOTEL | Client: LiveTech

Description:

- This project is a Web-based application that provides a user-friendly and simple interface to let users easily book hotel rooms and perform booking activities via Internet.
- The records are shared with not only Web users but also with administrators to the site. The Adactin Hotel Booking System is a very easy-to-use Web-based application.
- Everyone who knows how to use a Web browser can book rooms on specific date and finish the basic payment process online.
- Users will receive a confirmed email included basic booking details after finishing all steps in reservation. User can use this application or project to easily carry out booking a hotel, change the booking details, cancel the booking, change the personal profile, view the booking history, or view the hotel information by following its simple and clear GUI (Graphical user interface) design.
- Understanding the Requirements and Functional Specifications of the Project, and identified Test Scenarios required for testing. Prepared and Executed Test Cases as per System Requirements.
- Selenium was used to generate automated test scripts for functionality. Created selenium scripts using Modular framework. Test Management (Test Case Execution and Defect Reporting) using JIRA.
- Extensively performed Manual Testing process to ensure the quality of the software.

➢ **Completed hands-on training in Testing both Manual and Automation at LiveTech Institute.**
