Summary

A highly motivated and detail-oriented Automation Tester with 3+ years of experience in both manual and automation testing. Proficient in designing, developing, and executing test plans and test cases. Skilled in using various testing tools and frameworks to ensure the quality and reliability of software applications.

Professional Summary

- Perform end-to-end testing activities, including test planning, test case design, execution and reporting by conducting thorough requirements analysis to understand the project scope.
- Execute various testing types (Smoke, Functional, Integration, System and Regression testing) to validate software against established requirements.
- Manage and Track defects using defect management tools (jira).
- Participating in daily stand-ups, sprint planning, retrospectives and other meetings in comply with scrum ceremonies of Agile.
- Thorough understanding of various models of software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC
- Good understanding of Front-End Testing (GUI testing Manual) and Back-End Testing with the tools like Postman & Rest assured
- Usage of OOP`s, Arrays, Collections Map and Exception Handling concepts of Java in test scripts and knowledge of SQL Queries.

Skills

- Selenium
- Rest Assure
- CORE JAVA Strong in Collections, Oops.

- SQL
- TestNG
- JIRA
- Postman
- Rest Assured
- Git Lab

Work Experience

- Working as an Automation Tester for Terrapay solutions Private Ltd, bangalore from oct '22 to Till Date.

Automation Tester

Project: 1

Name: Core Project

Team Size: 2

Tools: Eclipse, gitlab

Description: CORE is a payment related application which is used to secure partner details.
By using the Core application we can validate real time currency exchange and forex transactions . we follow multiple steps like kyc checking , Forex checking , exchange rate Security ,notification , alert . In Every screen must find the API related bugs and Functional Testing.

Responsibilities:

- Design and implemented API Automation testing for forex transactions and KYC verification using Rest Assured
- Developed automated test scripts to validate real-time currency for exchange rates.
- Automated KYC verification workflows including document upload ,face match ,AML checks
- Working with APIS for doing transaction and checking ledger balance in SQL and Transaction details
- Identified, reported, and tracked bugs, ensuring quick resolution and maintaining the quality of the platform.
- Developed and executed automated test scripts using Rest assured .
- Conducted manual testing to identify and document software defects.

Manual Tester Project: 2

Name: Engage plus.

Team Size: 5

Defect tracing tool: Gitlab

Description: Engage plus is a payment related application which is used to secure partner details.
By using the Engage plus application we can store the partner details . we follow multiple steps like partner Profile, payment transaction, user login , Kyc details,
Security ,notification , alert . In Every screen must find the UI/UX bugs and Functional Testing.

Responsibilities:

- Responsible for understanding the application and business flow of the application.
- Analyzing the client requirement as per the documents provided.
- To be part of UX/Ui testing finding bugs in all screens throughout the application level as per the client requirements.
- Took part in estimating, prioritizing, planning and coordinating quality testing activities.
- Worked on various types of testing- Smoke Testing, Functional Testing, System Integration Testing and Regression Testing.
- Responsible for bug reporting with root cause and re-testing systems before client handover.
- Used to work on Retesting and Regression Testing as well.
- Designed and executed test plans and test cases for various software applications.
- Performed functional, regression, and performance testing to ensure software quality.
- Identified, documented, and tracked software defects using bug tracking tools.
- Collaborated with cross-functional teams to understand project requirements and deliver high-quality software.

Education

Bachelor of Technology (B.Tech) in Computer Science and Enginnering (CSE)

Siddhartha Institute of Engineering and technologies (SIETK) |
Graduated: 2021
