OBJECTIVE

Experienced Ruby on Rails developer passionate about writing clean, efficient, and maintainable code. I focus on building scalable, high-performance applications while ensuring code quality and reliability. Committed to the entire development lifecycle, from planning and architecture to deployment and maintenance. Always looking for ways to improve application performance and streamline development processes.

EDUCATION

- **Shri Vaishnav Vidyapeeth Vishwavidyalaya** *2019 - 2023*
  B.Tech Computer Science and Engineering Indore (M.P)
- **Bal Vikas School** *2018 - 2019*
  Higher Secondary Rewa (M.P)

SKILLS

Oops, ruby, ruby on rails, html, css, javascript, git, github, postgres, rspec, orm

Third Party Integration: Razorpay, twilio, stripe, msg91, aws s3 bucket, smtp, sandgrid, HTTParty (micro service), fcm, geocoder

Cloud (Beginner) Aws, ec2, s3 bucket, docker

Tools: postman,swagger,trello, jira

EXPERIENCE

Antino Labs Pvt Ltd *June 2024 - Present*
Associate Software Engineer Gurugram, Haryana

- Directly interact with clients to gather requirements and provide technical solutions.
- Played a key role in Bedr, working on backend architecture, database design, and API development from scratch.
- Designed and implemented microservices to enhance scalability and modularity.
- Gained hands-on experience in DevOps and cloud technologies for infrastructure management by using (AWS, EC2, S3, Docker)
- Used **Postgis**, that is an extention of PostgreSQL to fetch records within a radius.
- Integrated various third-party like Razorpay, Msg91, AWS S3 bucket, SMTP, HTTParty (microservices).
- **Tech Stack Used:** Ruby, Ruby on Rails, PostgreSQL, RSpec, ORM, Git, GitHub, Html/CSS, javascript, Postgis.

Witmates Technologies *Jan 2023 – Apr 2024*
Junior Software Engineer Indore (M.P)

- Designed, developed, tested and deployed scalable applications using Ruby on Rails framework.
- Implemented RESTful APIs for seamless frontend-backend communication.
- Optimized database performance through query tuning and indexing.
- Integrated various third-party like stripe, Twilio, Google OAuth, can can can.
- Used firebase Cloud Messaging (FCM) for Push notifications.
- Used RSpec to create test driven development (TDD). Experience with all of the gems and libraries for the version of ruby/rails.
- Worked with background jobs for handling asynchronous tasks like email notifications and data processing by using Sidekiq and Redis.
- Diagnosed and resolved bugs and performance issues, ensuring smooth application operation.

PROJECTS

Bedr

It is a PG/HOSTEL booking platform. The Platform allows PG owner to list their properties which are then reviewed and approved by admin before Being made available on website, Once listed then the user can explore the available options, view property details and book their stay with ease.

- **ROLE**: Revamping the project, authentication module, property listing module, active admin, role based authentication, notification micro-service, booking module, schedule visit, background jobs, payment integration, check-in flow, db designs.

Go Insta Care

It is a Care Booking Platform designed to connect users in need of various care services, such as child care and senior care, withregistered agencies offering these services. The platform caters to three main user roles: agencies and users and admin (which approve agency).

- **ROLE**: authentication, agency registration and verification, adminintegration, service listings, background jobs, bug resolve and other similar features.

Go Insta Care

This is a POS (Point of Sale) project, it is a retailmanagement solution. It empowers store owners to create and manage their own stores. This includes full control over inventorymanagement, enabling store owners to efficiently track stock levels, sales, product availability, shipping, taxes, gst, bills and other features. Store owner can also list their product to website where user can buy that product directly from store owner. It contains web and mobile application both.
ROLE: Worked on Product Inventory management for both web and mobile and various Apis which are required for mobile app.
