Projects

Movix | *Redux Toolkit, React, Rest Api, Axios, SCSS, JavaScript, Html* — [Live-Link] [Code]

- Developed Movix, an advanced movie database app, showcasing mastery in React.js with expertise in JSX, components, state, and lifecycle methods.
- Implemented efficient state management using Redux Toolkit, ensuring a scalable and maintainable codebase for seamless data flow across components.
- Integrated external APIs flawlessly with Axios, providing real-time movie data and demonstrating proficiency in handling asynchronous operations.

Youtube Clone | *React, Axios, RapidApi, Tailwind CSS, JS, Html* — [Live-Link] [Code]

- Created a YouTube Clone with React, applying core concepts like JSX, components, and state management via Context API.
- Enhanced user experience by seamlessly integrating Axios and RapidApi for real-time video data retrieval.
- Designed a modern and responsive UI using Tailwind CSS and HTML, emphasizing simplicity and visual appeal.
