---

Frontend Developer with 3+ years of experience in building scalable, high-performance web applications using React, Next.js, TypeScript, and Vanilla JavaScript with modern frontend architectures. Specialized in architecting workflow orchestration UIs, configuration-driven systems, real-time applications, and reusable framework-agnostic libraries.

Key Skills

Frontend & UI: React.js, Next.js, Material-UI, Tailwind, Formik , Material-UI, Styled Components, Tailwind CSS.

State & Data: Redux, React Query, Context API, Custom Hooks, Tan Stack Query, use Query
Visualization & Editors: D3.js, Dagre-d3, Monaco Editor

Languages: TypeScript, JavaScript (ES6+), C++, Python

Tools & CI/CD: Git, Webpack, Vite, Jest.

APIs: REST, WebSocket's, Socket.IO, Fast API

Databases & Storage: SQL (MySQL / PostgreSQL), MongoDB, Redis

---

Experience

Wolken Software Pvt Ltd Bengaluru

Associate – I (Product Development) 11/2024 – present

Wolken Software is a **B2B SaaS / enterprise-software** company that builds platforms to help automate and streamline service desks, customer service, and internal workflows.

- **Developed a scalable AI chat application** with real-time messaging, advanced session management and RESTful API integrations, improving user engagement and reliability.
- Developed an enterprise-scale data migration platform supporting complex, multi-stage migrations from external systems to the our Service Desk.
- Designed a **wizard-driven, multi-step UI architecture** with URL-synced state, step recovery, and edit/resume support, enabling reliable user experiences across multi-hour migration flows.
- Developed a centralized Admin Configuration interface allowing teams to dynamically configure core modules (Cases, Flex layouts, Routes) without code changes, reducing manual intervention, and increasing delivery speed.
- **Architected advanced state management** using React Query (caching, optimistic updates, background sync) and React Context for workflow editor state, enabling faster, more reliable data handling.
- Developed framework-agnostic UI libraries and Web Components to enable reusable, consistent, and scalable interfaces across multiple front-end frameworks.

- **Engineered interactive workflow visualization** with D3.js and Dagre-d3 for DAG rendering, enabling drag-and-drop workflow design and reducing configuration time for complex workflows.
- **Designed a scalable API architecture & data-fetching strategy** with React Query, enabling CRUD operations, version control, and permission-based access with minimal latency.
- **Optimized overall application performance by eliminating API over-fetching and implementing code splitting, lazy loading, virtualization, and caching, reducing load time by 50%.**
- **Built a dynamic, type-aware form system** with Formik, supporting 15+ tasks with conditional rendering and real-time validation, improving developer productivity.
- **Delivered reusable, config-driven UI components** in React/Next.js, ensuring maintainability and scalability across multiple applications.

BRISTLECONE INDIA LTD (Mahindra Rise) Pune

Specialist 07/2022 – 09/2024
Client: SPS Commerce

- Built modular, bug-free UI components using React.js, JavaScript (ES6+), and Bootstrap 5 following clean code principles.
- Successfully migrated the frontend technology stack from legacy systems to React, enhancing performance and scalability.
- Designed and implemented React applications, incorporating Redux for state management resulting in a significant 30% reduction in page loading time and overall improved user experience.
- Coordinated agile development processes, facilitating sprint planning, daily stand-ups, and reviews, achieving a 20% increase in team productivity, and ensuring timely delivery of high-quality software amidst evolving projects requirements.
- Leveraged modern **ES6+ JavaScript features** such as DE structuring, spread operators and arrow functions to write more efficient code, improving maintainability and reducing code complexity.

Education

Dr. D. Y. Patil Institute of Technology Pune

Bachelor of Engineering: (CGPA –9.2) 05/2022
