Professional Summary

Software Developer with 2+ years of experience designing, developing, and deploying scalable, maintainable, and efficient software systems. Skilled in both **front-end** and **back-end** development **(Java, Python, JavaScript/TypeScript, React.js, Next.js, Angular.js, Node.js, Spring Boot),** architectural design, code reviews, **CI/CD pipelines,** and cloud platforms **(AWS, Azure, GCP).** Adept at applying design patterns, observability, unit testing, automation frameworks, and working in a **DevOps** model with end-to-end ownership of features. Proven ability to translate UI/UX designs into functional applications, integrate **RESTful APIs,** and deliver responsive, high-performance solutions across diverse domains including healthcare, trading platforms, and B2B applications.

Work Experience

Ven Analytics Pvt Ltd — Aug 2025 - Present

Sr. Software Developer — **Remote - Delhi, India**

Project:

VenCat Campaigner:

- Built a dynamic and responsive front-end using **Angular** and **Bootstrap** for seamless user experience across devices.
- Developed secure, modular **RESTful APIs** using **Python (Django)** to handle ad campaign logic, analytics, and user management.
- Implemented **JWT**-based authentication with role-based access control for admins and campaign managers.
- Designed and normalized the **PostgreSQL** database schema for efficient storage of campaigns, performance metrics, and user data.
- Created real-time analytics dashboards for monitoring CTR, CPC, and ROI using charting libraries and API integrations.
- Deployed the application using **Docker** and configured environment settings for production and development workflows.

Inferlytix — June 2023 - Aug 2025

Software Developer — **Delhi, India**

Key Responsibilities & Achievements:

- Designed and developed scalable, maintainable, and efficient features for healthcare dashboards, trading platforms, and B2B applications using **React.js, Next.js, Angular.js, TypeScript, Node.js, Java, Spring Boot,** and **Python,** adhering to clean code and design patterns.
- Collaborated with cross-functional teams **(design, QA, DevOps)** to translate **UI/UX** mock-ups into functional and responsive applications with **WCAG-compliant,** cross-browser compatible interfaces.
- Integrated **RESTful APIs, OAuth2,** and **JWT** to enable secure, efficient, and maintainable frontend-backend communication across applications.
- Built and maintained **CI/CD pipelines** using **Jenkins, Docker,** and **Azure,** automating builds, testing, deployments, and rollbacks for continuous delivery.
- Embedded telemetry, logging, and observability hooks across platforms to monitor service health, enable root cause analysis, and drive performance improvements.
- Participated in **architecture discussions, code reviews, API documentation (Swagger),** and contributed to enhancing team knowledge sharing and onboarding processes.

Projects:

MAPLE APP (Medication Management Dashboard):

- Developed Maple App, a medication management dashboard platform, from scratch to help users create and manage medication and track reminders seamlessly,
- Enabled business users to track medications and conduct experience-based surveys for better healthcare insights,
- Tackled the challenge of utilizing large-scale data to drive data-informed decision making across the platform,
- Collaborated with designers to translate UI/UX mock-ups into functional frontend components,
- Built and maintained the application using **Angular.js, Redux, JavaScript, HTML, CSS, Java, MongoDB, Spring Boot, RESTful APIs, JWT, Jenkins and AWS.**
- Responsible for developing and maintaining tools to support application updates and feature enhancements.

STOCK JARVIS (Trading Platform):

- Developed Stock Jarvis, a trading platform enabling real-time simulation for price action and chart-based traders,
- Designed and implemented features for buying/selling instruments within a realistic trading environment,
- Built a simulator that uses historical market data to replicate live trading scenarios with granular and accurate details,
- Utilized **Next.js, TypeScript, Python, Mantine, HTML, CSS, PostgreSQL, Django, OAuth2, Docker, Azure and Postman,** to build interactive components.

EXPERT IQ (B2B Application):

- Developed Expert IQ, a B2B application designed to build a community among top-level personnel,
- Enabled organizations to filter and access lists of currently employed individuals based on specific criteria,
- Utilized **React.js, Mantine, Storybook, MongoDB, Express.js, Node.js, Mongoose, RESTful APIs, Redux, Typescript, RTK, Figma and Swagger,**
- Contributed to enhancing employee discovery and organizational networking through a dynamic and responsive UI.

Education

Panipat Institute of Engineering and Technology — Haryana, India

Bachelor of Technology, Mechanical Engineering — 2013-2016

Vaish Technical Institute — Haryana, India

Polytechnic Diploma, Mechanical Engineering — 2010-2013

Skills

- Web Technologies: **HTML, CSS, JavaScript, Typescript, DOM, XML, AJAX, JSON,**
- Frameworks: **ReactJS, NextJS, AngularJS, NodeJS, ExpressJS,**
- Databases: **SQL, PostgreSQL, MongoDB,**
- CSS Frameworks: **Bootstrap, Material UI, ANTD, Tailwind CSS, Mantine,**
- Backend: **Java, Python, SpringBoot,**
- Cloud Platforms: **AWS, Azure, GCP,**
- Authentication: **JWT, OAuth2,**
- Project Tools: **NPM, Babel, Webpack, ESLint, React Testing Library, StoryBook,**
- Version Control: **Git, GitHub, Bitbucket,**
- Other Tools: **JIRA, ServiceNow, MS Excel,**
- Additional Skills: **Responsive Design, Cross-Browser Compatibility, Web Performance Optimization.**

Individual Projects

- **EV charging App (Link) :-**
  - Created an EV charging station app that assists the users to track down the nearest charging station in the map. Implemented CRUD operations on UI to update or delete a charging stations.

    Tech-Stack: Vue.js, MongoDB, Express.js, Node.js, RESTful APIs, Postman, JWT, Leaflet, Render.

- **Hotel Platform App (Link) :-**
  - Made a Hotel Booking and Recommendation Platform App to visit, draft booking, booking and recommend hotel bookings.

    Tech-Stack: MongoDB, React.js, HTML, CSS, JavaScript, Express.js, Node.js, RESTful APIs, Postman, PostgreSQL.

- **Dummy JSON Data (Link) :-**
  - Created an app which could fetch dummy JSON data in detailed format.

    Tech-Stack: Nuxt.js, HTML, CSS, JavaScript, TailwindCSS.

Certifications

- MERN Stack (DUCAT)
