SUMMARY

I possess a balanced mix of technical and behavioral skills crucial in today's digital era, driven by a commitment to serving the global community. With a robust focus on value creation and adept cognitive load management, my growth stems from both academic foundations and hands-on experience.

SKILLS & ABILITIES

- ReactJs
- HTML
- CSS
- Bootstrap
- JavaScript
- Typescript
- OOPS Concepts
- Data Structures and Algorithms
- Redux
- NextJs
- Nightwatch
- Playwright

EXPERIENCE

04/2025 - Present

Ultimate Kronos Group (UKG)- Senior Software Developer

- Built and scaled SaaS platform handling ~5M daily visits.
- Improved end-to-end automation with Nightwatch & Playwright.
- Delivered new HCM experiences using LaunchDarkly feature flags and API-driven controls.
- Developed Branding API & Branding Suite rollout across PRO and MFE for seamless integration, consistency, and faster onboarding.

11/2022 - 04/2025

Credgenics – Software Developer

- Created BILLZY, a payments application enabling clients to conveniently pay loans handling 1 lakh transaction per day.
- Developed CG AgentXcel, a product facilitating the setup and management of performance goals and key performance indicators (KPIs).
- Enhanced web applications for increased speed, scalability, and overall performance from 50% to 80%.
- Collaborated with team members to establish a Common Design library for components, nearly reducing the use of redundant code by up to 35%.

08/2021 – 10/2022 **Onsurity Technologies Private Limited – Software Developer**

- Integrated third-party HRMS systems into the Company Dashboards, enabling data retrieval and member onboarding.
- Built an internal Admin Panel with React.js and Typescript.
- Addressed performance concerns on the company's website and increased performance from 40% to 80%.

06/2020 – 07/2021 **TT Consultants Private Limited – Software Developer Intern**

- Assisted in scripting for data scraping purposes using Python, facilitating efficient data extraction and analysis.
- Developed web applications utilizing JavaScript, jQuery, and AngularJS

EDUCATION

06/2017 – 05/2021 **B.tech in Computer Science and Technology (CGPA-9.8)**
Chitkara University, Rajpura, Punjab

PERSONAL PROJECTS

04/2020 – 05/2020 **Corona Tracker**
A project designed to aggregate COVID-19 data, including the total number of patients in the country, state-specific statistics, and curated tweets relevant to the pandemic.

Technologies Used - HTML, CSS, Bootstrap, Ajax, JavaScript, jQuery

10/2019 – 12/2019 **InstaShare**
InstaShare is a social media application enabling users to share photos from their experiences, add captions, engage with others, and explore business ideas through a straight forward login or signup process.

Technologies Used - ReactJs, Bootstrap, Nodejs, MongoDB, ExpressJs

08/2019 – 10/2019 **Tech-Hub**
A web application that enables users to browse and access profiles of different GitHub users along with their repositories and followers. Users can also search for books across various subjects, download e-books, and stay updated on current technical news worldwide.

Technologies Used - HTML, CSS, Bootstrap, JavaScript, Query, AJAX
