To contribute to the **design and development of next-generation, high-performance digital products** by leveraging expertise in **React.js**, **Next.js**, and **modern frontend engineering**, integrated with **Generative AI** capabilities to drive **intelligent user experiences**, **scalable architecture**, and **responsive design** that align with **enterprise digital transformation** and **growth objectives**.

PROFILE SUMMARY

- **Results-driven Frontend Developer** with **3 years of experience** in building **scalable, interactive, and performance-optimized** web applications using **React.js, Next.js, and modern JavaScript frameworks**.
- Proven success in **designing enterprise-grade dashboards** and data visualization solutions that improved **application efficiency and reduced load times by 40%**.
- Demonstrated impact on **business growth**, contributing to **28.31% revenue increase** and enabling **2000+ user signups within three months** at Aiplex Software.
- Expertise in **SEO optimization**, **responsive UI design**, and **server-side rendering**, consistently achieving **95+ performance scores** on Google Lighthouse.
- Integrated **Generative AI tools** into web applications to enable **AI-driven content generation**, **personalized user experiences**, and **intelligent UI automation**, enhancing engagement and overall product efficiency.
- Skilled at **mentoring developers**, leading **code reviews**, and establishing **frontend best practices** that enhanced team productivity and code quality.

PROJECTS

TaskLyf – Task Management App (MERN Stack)

- Designed **task visualization tools** including Chart, Table, and Kanban views for efficient project tracking.
- Implemented **custom filters** for task prioritization, improving management efficiency by **40%**.
- Integrated **secure authentication** with role-based access and **drag-and-drop task manipulation**.

DevConnect – Developer Networking Platform (MERN Stack)

- Engineered **intelligent networking features** enabling users to send interest messages and bookmarks, boosting engagement by **60%**.
- Built **modular React architecture** supporting personalized feeds and **WCAG-compliant UI**, enhancing accessibility scores by **25 points**.
- Developed **authentication workflows** with secure routing and form validations for seamless user experience.

KEY ACHIEVEMENTS

- Contributed to **28.31% revenue growth** and **2000+ user signups** within 3 months through performance-focused product enhancements.
- Enhanced dashboard load speed by **40%** (2.3s faster) via code splitting, lazy loading, and optimized API integration.
- Reduced artist submission errors by **35%** with real-time validation and intelligent inline feedback.
- Implemented **Generative AI** and **LLM-based features** to deliver personalized content, automate workflows, and boost user engagement.
- Automated content approval and admin workflows, improving turnaround by **25%**.
- Processed **500+ monthly payments** via Razorpay with an excellent **success rate** and improved error handling.
- Built a **reusable React component library** (50+ UI elements), cutting development time and accelerating **B2C rollout by 45%** with **1000+ artists onboarded** in Q1.
- Delivered cross-platform mobile apps (**Android & iOS**) using **React Native**.

CORE COMPETENCIES

- Frontend Architecture & Design Systems
- Generative AI
- Responsive UI/UX Development
- API Integration & Optimization
- SEO & Performance Engineering
- Agile Development & Code Reviews
- State Management
- Cross-Platform Mobile Development
- Web Accessibility & WCAG Compliance
- Component-Driven Development

TECHNICAL SKILLS

- **Frontend Technologies:** React.js, Next.js, Vite React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Material-UI, Tailwind CSS, NextUI, SCSS, Responsive Design, Progressive Web Apps (PWA)
- **AI/ML Integration:** OpenAI API, Generative AI Features, LLM-based Automation
- **State Management:** Redux Toolkit, React Query, TanStack Query, Context API
- **Backend & APIs:** Node.js, Express.js, MongoDB, REST APIs, WebSocket, Firebase
- **Mobile Development:** React Native (Android, iOS)
- **Testing & Optimization:** Cypress, React Testing Library, Code Reviews, Performance Optimization
- **Development Tools:** Git, GitHub, Postman, Firebase Cloud Messaging, Razorpay, Socket.IO, Webpack, Chart.js
- **Additional Expertise:** SEO Optimization, JWT Authentication, Server-Side Rendering (SSR), Component Reusability, Agile Development

EDUCATION

Bachelor of Engineering in Computer Science
Sir M Visvesvaraya Institute of Technology
2019-2023

CERTIFICATIONS

- Namaste React – NamasteDev.com

WORK EXPERIENCE

Software Developer | Aiplex Software Pvt. Ltd., Bengaluru | April 2023 - Present

- **Developed, designed, and deployed** interactive **Admin and Client Dashboards** using **React.js** and **Chart.js**, visualizing analytics across **50+ countries**.
- **Streamlined artist submission workflows** with **multi-stage forms**, progress tracking, and real-time validation for single and multi-track albums.
- Designed and deployed **AI-integrated frontend solutions** leveraging **Generative AI models** and **API-based automation**, enabling adaptive user interfaces and data-driven personalization.
- **Collaborated with backend teams** to define optimized **API contracts**, reducing payload size by **30%** and improving overall performance.
- **Designed and implemented** the **end-to-end artist onboarding flow**, incorporating **email verification**, **multi-step profile completion**, and **subscription plan selection**, achieving **85% completion rates**.
- **Developed and integrated Razorpay payment gateway** with a **real-time order summary UI**, ensuring seamless transaction flow.
- **Created enterprise-grade dashboards** for **revenue analytics**, including earnings by artist, platform (**Spotify, Apple Music, Deezer**), and region.
- **Developed and deployed** cross-platform **entertainment applications** integrating **music, movies, and news modules**, enhancing user engagement and achieving **7,000+ monthly active users**.
- **Engineered the Movies Module** with dynamic **release calendars**, user **interest tracking**, and detailed **cast and review integrations**, ensuring a seamless experience for **200+ movie entries**.
- **Implemented a scalable News Section** supporting **multi-category publishing**, enabling **50+ weekly articles** and driving **1,000+ daily views** across platforms.
- **Designed and optimized a Music Dashboard** consolidating data from **8 major streaming platforms**, improving accessibility and attracting **2,500+ weekly visitors**.
- **Developed secure Playlist Modules** leveraging **JWT-based authentication**, efficiently managing **500+ playlists** and **5,000+ tracks** with seamless user access control.
- **Integrated Firebase Cloud Messaging (FCM)** to deliver **cross-platform push notifications**, achieving a **78% open rate** and enhancing real-time **user engagement and retention**.
- **Led code reviews**, defined **frontend best practices**, and ensured **consistent UI standards** across the product suite.
- **Mentored junior developers** in **React.js**, **JavaScript (ES6+)**, and **frontend design patterns**, enhancing technical capability within the team.
- **Integrated WebSocket** for **real-time communication** across dashboards, improving user engagement and responsiveness.
- **Architected RESTful APIs** for backend synchronization and **employee management**, enhancing operational visibility.

PERSONAL DETAILS

- **Date of Birth**: 19th October 2000
- **Languages Known**: English, Kannada & Tamil
- **Address**: Bangalore, India
