Ayush Rajput

ayush.rajput.96@gmail.com / 8700416102/4th July 1996 / **LinkedIn**
SOFTWARE ENGINEER | FRONTEND DEVELOPER

Specialized in React.js, Next.js, and UI/UX optimization to create high-performance, scalable web applications. At Coox.in, I spearheaded UI/UX improvements**,** enhancing user experience and driving a 60% increase in monthly bookings. Enhanced website responsiveness through effective API integrations and strategic optimizations, achieving consistent delivery timelines which resulted in completing 95% of projects ahead of schedule within a six-month period.

Skills

Frontend Development: HTML, CSS, Javascript (ES6 & Typescript), React.js, Next.js, React Native, React Hooks, JSX syntax knowledge, component-based Architecture, Routing and Navigation, CSS frameworks (React Bootstrap and Tailwind CSS), State Management (Redux, Zustand), Zod (Schema validation & form handling), API integration (RESTful APIs, Fetch, Axios, React Querry), Functional programming concepts.

Backend Development: Node.js, Express.js, MySQL, Mongo DB, CORS implementation & Rate limiting, Error handling and Debugging.

Version Control & Project Management: Git version control, GItHub, JIRA, Time Estimate and Project planning, Team Collaboration & communication

Experience

Frontend Developer, , BrightHead IT- Mohali, Punjab January 2024 - Till Date

- Managed and optimized high-performance websites (**OMC, Steady Care**), enhancing security and accelerating performance updates **by 30%**..
- **Revamped** user interfaces with **React.js and Redux,** improving accessibility and increasing user engagement **by 35%**.
- Created a **Python-based web scrapper** to extract and process data from **10,000+ dispensaries**, ensuring data accuracy and automation efficiency.
- Engineered a library of **50+ reusable UI components**, cutting development time by **40% and enhancing maintainability.**
- Eliminated **cross-browser compatibility issues** across Chrome, Safari, and Edge, reducing **UI bugs by 80%**..
- **Boosted page speed by 50%** through **caching strategies, minified assets, and structured code**, leading to higher SEO rankings.
- Navigated overlapping schedules for three key product launches seamlessly without sacrificing **quality or performance metrics;** findings directly contributed to resolving the top causes of **user engagement drops post-launch.**

Full stack Developer,, Coox.in – Noida, India August 2022 – January 2024

- **Led a team of 3 developers,** ensuring code quality, project efficiency, and adherence to timelines.
- **Designed and implemented 50+ reusable components** for the **Coox.in website and admin panel** using React.js and Redux, enhancing maintainability and scalability.

- **Developed and deployed 50+ reusable features** for the **Coox partner app in React Native,** leading to a 3x growth in app users.
- **Improved the UI/UX of the Coox Partner App,** increasing **monthly booking by 60%**.
- **Integrated third-party APIs** to add advanced features and enhance application functionality, ensuring seamless connectivity with external services.
- **Managed and maintained backend systems** using **Express.js and MySQL,** developing **200+ APIs** to power web and mobile applications.

Projects

Coox.in

Coox.in is a **Next.js-powered service-based web platform** that connects customers with professional **chefs, bartenders, waiters, cleaners** for events and celebrations. The platform is operational in **15+ cities,** providing seamless service booking and management.

- **Engineered** a comprehensive backend architecture utilizing **Express.js and MySQL;** orchestrated **user authentication through JWT,** streamlined booking workflows, and ensured real-time service availability **for 1000+ active users.**
- **Expanded service availability from 10 to 15+ cities,** leading to a **3x increase in customer reach** and growing the service provider base to **1000+.**
- **Implemented a personalized booking system,** increasing **customer retention by 30%** through rebooking options and service history tracking.
- **Developed an advanced search and filtering system,** reducing customer drop-offs by **35%** by allowing users to find professional based on **location, service type and pricing.**

WEEDTOME – USA's Dispensary listing & E-commerce platform for Marijuana & weed

- WeedToMe is a React-powered marketplace enabling **7,000+ dispensaries to register**, showcase products, and facilitate transactions, driving a 30% increase in online orders.
- Developed the platform using **React, React Bootstrap, and Redux Toolkit (Thunk & React Query)**, ensuring a scalable and high-performance frontend.
- **Implemented an advanced search and filtering system**, enabling users to **locate dispensaries based on location, product type, deals, and delivery options**, reducing search time by **40%**
- **Optimized API calls using Redux Thunk and React Query**, improving **data fetching efficiency by 50%** and reducing unnecessary re-renders.
- **Enhanced UI/UX for mobile and desktop**, resulting in a **20% increase in user engagement and session duration**
- **Developed a role-based authentication system**, ensuring secure access for **users, dispensary owners, and administrators**

Education

B.Tech : NSUT 2015-2019, Delhi
