B HARISH CHANDRA — Software Engineer (Frontend / Full-Stack)

Hyderabad, India | +91 86397 33568 | harishbattarasetty@gmail.com | LinkedIn | GitHub

---

PROFESSIONAL SUMMARY

Frontend / Full-Stack Software Engineer with 3+ years of experience building scalable, production-grade applications. Hands-on expertise in end-to-end system design for chat and social media platforms, real-time data flows, Dockerized microservices, Redis caching, and CI/CD pipelines. Strong foundation in data structures and algorithms with a focus on performance, scalability, and reliability.

CORE TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Chakra UI Backend &
APIs: Node.js, Express.js, REST APIs, JWT Authentication, RBAC
Real-Time & System Design: WebSockets, Pub/Sub, Queues, Polling, Chat & Social Media Architectures DevOps &
Infrastructure: Docker, NGINX Load Balancer, Redis, GitHub Actions (CI/CD)
DSA: Arrays, Strings, Hashing, Sliding Window, Two Pointers (LeetCode, NamasteDev)

PROFESSIONAL EXPERIENCE

Software Engineer – Full-Stack Developer | Entitled Arts Pvt Ltd (Jan 2024 – Dec 2025)

- Built scalable real-time AI surveillance dashboards deployed across 50+ residential and commercial properties.
- Implemented role-based access control aligned with backend authorization logic.
- Managed high-frequency event streams with optimized async state handling.
- Improved UI performance using caching, debouncing, memoization, and request cancellation.
- Collaborated with backend teams to design end-to-end system flows from client to database. Web3
- Delivered end-to-end Web3 dashboard architecture based on client system design documentation.
- Integrated smart contract workflows with wallet connectivity (MetaMask and multi-wallet scenarios).
- Implemented wallet lifecycle handling — connect, reconnect, switching networks, and error recovery.
- Built resilient async transaction flows with proper validation and state synchronization.
- Ensured secure interaction patterns and smooth UX for blockchain operations. Full-

Stack Developer | EverRise Technologies Pvt Ltd (Aug 2022 – Dec 2023)

- Developed production-grade Web3 dashboards used by 10,000+ users.
- Implemented staking, vault, and token-locking workflows with secure wallet integrations.
- Built optimistic UI flows with retry and rollback mechanisms for better user experience.
- Handled complex asynchronous workflows and error handling across frontend and backend.

SELECTED PROJECTS & SYSTEM DESIGN

- Real-Time Chat Application: Designed end-to-end messaging architecture using WebSockets, stateless services, Redis-backed pub/sub, message persistence, and horizontal scalability.
- Instagram-like Platform: Designed feed generation, pagination, likes, follows, and media upload pipeline using Cloudinary with CDN caching.

DEVOPS & SCALABILITY HIGHLIGHTS

- Dockerized frontend and backend services for consistent development and production environments.
- Configured NGINX load balancing strategies (Round Robin, Least Connections) with health checks.
- Integrated Redis caching to reduce database load and improve response times.
- Automated builds and deployments using GitHub Actions.

DATA STRUCTURES & CONTINUOUS LEARNING

- Solved 100+ DSA problems on LeetCode and NamasteDev focusing on time and space optimization.
- Actively follow tech blogs, system design discussions, and industry trends; regular LinkedIn contributor.

EDUCATION

Bachelor of Technology (B.Tech) — Mallareddy University, Hyderabad | CGPA: 8.2
