Summary

Results-driven **Full Stack Developer (MERN/React.js)** with 3+ years of experience in building scalable, high-performance web applications. Proficient in **TypeScript, Next.js, Node.js, and modern React patterns**. Skilled in **REST API development, cloud deployment (AWS, Docker, CI/CD), and payment gateway integration (Stripe, PayPal, Razorpay)**. Adept at optimizing performance by 40%+ through reusable components, caching strategies, and efficient architecture.

Education

Chandigarh University — **Apr 2020 – May 2022**
Master Of Computer Application — Chandigarh, Punjab

TMBU University — **Mar 2016 – Jul 2019**
Bachelor of Science (B.Sc.) — Bihar, Bhagalpur

Experience

Aayan Infotech — **Aug 2024 – Present**
Full Stack Developer

- Developed multiple scalable full-stack applications using MERN stack with TypeScript, achieving 85%+ code reusability through modular components, custom hooks, reusable interfaces, and advanced state management with Redux Toolkit (slices, RTK Query).
- Built secure payment & e-commerce systems with Stripe & PayPal integration, including webhook handling, multi-payment methods, invoice generation, and admin dashboards for order, product, and user management.
- Engineered enterprise-grade automation platforms using Node.js, Puppeteer, Redis, and BullMQ, implementing cron-based scheduling, real-time job tracking, analytics dashboards, and REST APIs with JWT authentication.
- Integrated cloud services (AWS S3, Cloudinary), real-time features (Socket.io, Firebase FCM), Google Maps API, and established CI/CD pipelines using Docker, Jenkins, and AWS, reducing deployment time by 50%.

Business Thrust Tech Soft — **Aug 2023 – May 2024**
Software Engineer

- Designed and developed modular frontend systems with React.js & TypeScript, reducing development time by 30%.
- Used custom hooks and optimized state management for better code maintainability.
- Collaborated with designers and backend teams to deliver responsive UI solutions.

Vision Vivante — **Jul 2022 – Jul 2023**
Associate Software Engineer

- Contributed to 4+ projects using React, Next.js, and TypeScript, implementing SSR and Stripe payment integration.
- Optimized MongoDB queries and used caching strategies to reduce API response times by 300ms.
- Wrote technical documentation for components and APIs.

Projects

SNOOTME – Photography Portfolio Review Platform | Next.js, TypeScript, Node.js, Express, Stripe, Tailwind CSS - (https://www.snootme.com/)

- Built a **subscription-based platform** enabling photographers to get expert feedback via scheduled virtual meetings.
- Implemented **Stripe subscription billing** with **prorated upgrades/downgrades** and **webhook handling** for payment events.
- **Optimized for SEO** with server-side rendering (SSR), dynamic meta tags, structured data (JSON-LD), and semantic HTML for better search visibility.
- Utilized **TypeScript generics** for reusable API service layers and **React Query** for efficient server-state management.

Discount Door & Window – E-commerce Platform for Home Improvement | MERN, Stripe, Admin Panel, Tailwind CSS - (https://www.discountdoorandwindow.com)

- Built a **complete e-commerce platform with custom admin dashboard** for product, order, and refund management using **React Context + useReducer.**
- Implemented **Stripe payment integration** with **automated refunds & webhook handling**, and advanced product filters using **MongoDB aggregation pipelines**.
- Developed r**eal-time order tracking** with email notifications via **Nodemailer** and a **product recommendation engine** using collaborative filtering.
- Optimized performance using **Redis caching, image lazy loading with WebP**, and **CDN integration**, reducing page load time by 40% and API response time by **300ms**.

Hair Stylist Booking Platform | React.js, Node.js, MongoDB, AWS, JWT, Redux, Material-UI - (http://3.215.60.7:2235)

- Developed a **full-stack booking** platform with role-based dashboards (Admin, Stylist, Customer), using JWT authentication and AWS SNS for **OTP** verification.
- Built a **real-time calendar validation** system to prevent booking conflicts, reducing scheduling errors by 50%.
- Built an admin dashboard for service, portfolio, and revenue analytics, improving operational transparency by 40%.
- Integrated AWS S3 with CloudFront for image storage, built REST APIs with Express.js, and deployed on AWS EC2 using Nginx.

LEAD CRM | React.js, TypeScript, Redux Toolkit, MUI, Chart.js

- Rebuilt CRM dashboard using **JavaScript** with advanced data tables, interactive charts, and dynamic filters for lead tracking and analytics.
- Achieved **~70% code reuse** by abstracting API logic, form validations, and data formatting into reusable hooks and Redux utility modules.
- Implemented **real-time data synchronization** and Excel-like editable tables with bulk actions, reducing manual data entry time by 30%.

Johnson Auto Parts – Full-Stack Automotive E-Commerce | React, TypeScript, Material UI, Bootstrap, Node.js, Express, MongoDB, AWS - (https://partsavatar.ca)

- Developed a **full-stack TypeScript automotive** parts platform with **vehicle-specific search (Year/Make/Model/Engine)**, **advanced filtering**, and guest checkout using React.js and Material-UI.
- **Enhanced SEO** by implementing SSR for key pages, optimizing image alt tags, improving page speed via lazy loading, and integrating Google Analytics for traffic insights.
- Built a **comprehensive admin dashboard** for product, order, and inventory management with role-based access, improving operational efficiency by 35%.

- Implemented **user authentication**, **wishlists**, and **order tracking** using **JWT**, **MongoDB aggregation**, and server-side APIs with Express.js and TypeScript.
- Deployed on **AWS EC2** with **PM2** & Nginx, integrated RESTful APIs, and used Bootstrap with Material-UI for responsive UI components.

Technical Skills

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Redux Toolkit, React Query, Context API, Material-UI, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT, WebSocket

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Tools & Cloud: GitHub, Postman, Docker, Jenkins, Nginx, AWS (EC2, S3, Route 53)

Certifications

- HackerRank JavaScript (Basic) Certificate (Achieved)
- Aayan Infotech – Certificate of Appreciation | Issued: Dec 2024
  (Recognized for dedication, hard work, and outstanding contributions)

Hobbies & Interests

- Volleyball, Travel, Exploring New Technologies
