MOHAMMED ADNAN

Frontend Engineer (React, Next.js, TypeScript)

mohammedadnan.3107@gmail.com | +91 9150706793 | Bangalore, Karnataka

Professional Summary

Frontend Engineer with **3+ years of experience** building production-grade, user-facing web applications using **React, Next.js, and TypeScrip**t. Strong experience in developing reusable UI components, **implementing SSR**, integrating **REST APIs**, and handling complex application state. Experienced in working with designers, backend teams, and product managers to deliver scalable, **high-performance, and maintainable** frontend solutions in fast-paced environments.

Core Skills

Category	Technologies
Programming Languages	JavaScript (ES6+), TypeScript
Web Technologies	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
State & Data Management	Redux Toolkit, React Query (TanStack Query), REST APIs, GraphQL
Backend Technologies	Node.js, Express.js
Databases	MongoDB, SQL
Validation & Forms	Zod, React Hook Form
Performance & SEO	Virtualization, Lazy Loading, Code Splitting, Memoization, React Helmet
Code Quality & Standards	ESLint, Prettier, Husky, SonarQube
Testing Frameworks	Jest, React Testing Library, Playwright
DevOps & Tooling	Git, GitHub, Jenkins, Docker, CI/CD Pipelines
Cloud & Deployment	AWS(Lambda,S3,RDS,EC2), Vercel
Build Tools & Bundlers	Webpack, Babel, Vite
Design & Collaboration	Figma, JIRA, Confluence

Professional Experience

Nafi & Co – Bangalore, India *Jun 2025 – Dec 2025*

Frontend Engineer

TechStack:
React, Next.js, TypeScript, JavaScript, Node.js, AWS (Amplify Gen 2, AppSync, Lambda), GraphQL, MongoDB, Tailwind CSS, Playwright, ESLint, Husky, SonarQube

- Built **reusable, design-system–aligned UI components** using React and TypeScript, ensuring accessibility (WCAG) and consistent user experience across the platform.
- Collaborated closely with **Product, Design, and Backend teams** to translate requirements into pixel-perfect, user-friendly interfaces.

- Implemented **Next.js server-side rendering (SSR)** for key application flows, improving SEO, initial load time, and perceived performance.
- Designed and handled **frontend data-fetching workflows**, including loaders, error handling, pagination, and async state management.
- Integrated frontend applications with **GraphQL APIs (AppSync)** to enable secure and scalable communication with serverless backend services.
- Worked on production-grade frontend features used by internal teams, focusing on correctness, performance, and maintainability.
- Contributed to building a **serverless architecture** using AWS Amplify Gen 2 and Lambda, supporting multiple production-grade AI tools.
- Optimized UI performance through **code splitting, lazy loading, memoization**, and efficient rendering strategies.
- Enforced **code quality and consistency** using **ESLint, Husky pre-commit hooks, and SonarQube**, reducing defects and improving maintainability.
- Participated in **Agile sprints, code reviews, testing, and production support**, ensuring stable and timely feature delivery.

Webranc IT Solution – Bangalore, India *Jan 2024 – Apr 2025*

Frontend Developer

TechStack:
React, TypeScript, JavaScript, Node.js, Express.js, REST APIs, MongoDB, Zustand, TanStack Query, Tailwind CSS, Playwright, Git, ESLint

- Developed a **data-driven E-commerce admin dashboard** to manage orders, users, inventory, and modules, supporting **3,000+ products**.Developed **parent-child multi-tenant portals.**
- Built and scaled a **data-heavy E-commerce admin system** using React, TypeScript, and modern state management, enabling efficient multi-tenant operations and high-volume data handling.
- Built **responsive and reusable UI components** using React, TypeScript, and Tailwind CSS, ensuring consistency across all admin modules.
- Implemented **client-side state management** using **Zustand** and server-state handling with **TanStack Query** for predictable and efficient UI behavior.
- Designed a **role-based component architecture** (Admin / Vendor / Staff) to simplify permission handling and reduce UI duplication.
- Integrated frontend modules with **REST APIs**, handling pagination, filtering, caching, and large datasets efficiently
- Optimized application performance through **code splitting, dynamic imports, and caching strategies**, improving load times and responsiveness.
- Implemented **pagination and infinite-scroll workflows** for data-heavy screens to enhance user experience.
- Collaborated closely with **designers and backend teams** to deliver intuitive, user-friendly, and scalable admin interfaces.
- Participated in **code reviews, testing, bug fixes, and Agile sprint cycles**, ensuring stable and maintainable releases.
- Debugged and resolved UI and performance issues in production environments.

AspirsSys Solution – Bangalore, India *Sep 2022 – Nov 2023*

Junior Software Developer

TechStack:
React, JavaScript, HTML, CSS, Node.js, REST APIs, MongoDB, Git, GitHub

- Contributed to the development of **web application features** using React and JavaScript under guidance from senior engineers.
- Implemented **responsive UI components** using HTML, CSS, and React, ensuring cross-browser compatibility and adherence to design specifications.
- Assisted in integrating **RESTful APIs** and managing frontend–backend data flow.
- Fixed UI and functional bugs, performed **code refactoring**, and improved application stability and performance.
- Participated in **unit testing and validation** to ensure features met quality and functional requirements.
- Used **Git and GitHub** for version control and collaborated through pull requests and peer code reviews.
- Worked within an **Agile/Scrum environment**, coordinating with team members to deliver tasks on schedule.

Freelance Projects

Hinox Ecosystem — Stock Research Automation & Subscription Platform

Tech Stack: React, TypeScript, Node.js, MongoDB, REST APIs, Cron Jobs, Background Workers, Email Service

- Built a **full-stack stock research and subscription platform** using React, Node.js, and MongoDB to automate market research workflows.
- Designed frontend dashboards to display **stock insights, reports, and subscription-based content** with a focus on usability and performance.
- Implemented **background jobs and cron-based schedulers** to automate data fetching, processing, and periodic report generation.
- Integrated multiple **financial data sources** (e.g., market research portals and stock information providers) to aggregate and normalize research data.
- Parsed stock reports and generated **fundamental analysis summaries** for end users.
- Implemented error handling, logging, and data validation to improve **system reliability and maintainability.**

Education:

- MCA (Master of Computer Applications) – University of Madras
