Poonam Minde

Software Developer

+919325692729 | poonamminde789@gmail.com | GitHub | LinkedIn | Crio Portfolio

Career Summary

Motivated and detail-oriented software developer with 1.8 years of experience. Strong problem-solving mindset and a passion for continuous learning. Always open to exploring new technologies and adapting to evolving challenges.

Skills

Operating Systems: Windows, Linux (Basic Commands)
Programming Languages: JavaScript, HTML, CSS, Python, Core JAVA
Technologies/Framework: Django, React.js, Redux, TypeScript, Next.js, REST API, Bootstrap, Material UI, Tailwind CSS, Flexbox, Responsive UI, DOM Manipulation, Node.js, Express.js
Databases: MySQL, MongoDB
Core Subjects: Data Structures & Algorithms, Database Management System (DBMS), Object-Oriented Programming (OOP), Operating System, Computer Networks, SOLID Principles, Design Patterns, Clean Code Concepts, Problem Solving
Tools & Platforms: Git, Postman, Docker, Render, Netlify, Figma, Vercel

Professional Experience

Testpress | Remote | Software Engineer [Jun'24 - present]

- Developed and maintained full-stack features and resolved bugs in the Testpress LMS using Django for backend and HTML5, CSS3, Bootstrap, and Tailwind CSS for responsive, user-friendly interfaces.
- Designed and implemented RESTful APIs using **Django REST Framework**, enabling seamless and high-performance communication between frontend and backend systems.
- Built interactive UI components using **React.js**, **Vue.js**, **Alpine.js**, **TypeScript**, and **Backbone.js**, improving user experience and frontend performance.
- Integrated AI-powered doubt-solving features using ChatGPT and Gemini directly within the LMS, currently used daily by over **30,000 students**.
- Implemented **AWS cloud storage** for managing user uploads and media assets, and used **Redis for caching and session management**, significantly improving application performance and response times.
- Contributed to a learning platform serving more than **1 lakh students**, and developed both **Admin and Student Dashboards** to enhance platform usability and analytics.
- Collaborated in an Agile Scrum environment, actively participating in sprint planning, daily stand-ups, and retrospectives to deliver high-quality features on time.
- Wrote unit, integration, and functional test cases to ensure reliability and minimize regression issues.
- Followed clean code, SOLID, and DRY principles to maintain scalable and maintainable codebases.
- Used Git for version control, managing feature branches and incorporating feedback from senior developers through regular code reviews.

miniOrange | Pune Software Engineer Intern [Jul'23 - Oct'23]

Working in Magento plugin development team as a full stack developer.

- Spearheaded frontend development using **HTML5**, **CSS,** and **JavaScript**, ensuring an engaging user interface for seamless navigation.
- Led the backend development utilizing **PHP** and **SQL**, overseeing database operations and optimizing query efficiency

- Work on agile scrum methodologies.

Projects

Axiom Clone [LINK] [Dec'25 – Jan'26]
Skills: Next.js, TypeScript, React Query, Redux, Mock WebSocket, Tailwind CSS

- Built a real-time clone of the **Axiom Pulse** endpoint using a **mock WebSocket** to simulate live market data updates.
- Implemented **dynamic tooltips and popovers** to display additional contextual information for data elements.
- Developed a **filtering modal** to enable token filtering based on keywords and protocols.
- Designed and integrated a **responsive header carousel** to efficiently display multiple header items across screen sizes.

QKart [LINK] [Sep'23 - Sep'23]
Skills: Debouncing, Local Storage, React Hooks, Error Handling, ES6, Conditional Rendering, React, Material UI, Keyword Search

- Built a single web page app using React and utilized REST APIs for dynamic data-loading and rendering
- Implemented the core logic for authentication, shopping cart, and checkout
- Improved UI by adding responsive design elements for a uniform experience across different devices using Material UI
- Optimized the search feature using Debouncing
- Facilitated CRUD operations on the client side to select, add, and delete addresses for delivery
- Used React Router library to set up routes redirecting customers to appropriate pages and deployed the app using Netlify

QKart Backend [Feb'24 – Feb'24]
Skills: Node.js, Express.js, Mongoose ODM, JWT token, JEST framework, Hashing, JOI validation, Unit testing, REST API, Passport library.

- Qkart is an E-commerce application offering a variety of products for customers those products fetched from MongoDB.
- When customer add product in cart all products in cart are get added in database and at the time of checkout it get removed.
- JWT authentication used for authenticate customer at register and login time
- Layered architecture for different Routers, Controllers, Database models, MongoDB Services, Data Validations and Middle-wares
- Unit tests as well as integration tests for test all services of Qkart website.

Qtify [LINK] [Oct'23 - Oct'23]
Skills: React.js, Material UI, Swiper, Figma

- Qtify is a song-browsing application build by using ReactJS and material UI
- It uses Swiper to deliver seamless and aesthetic user interface, offering songs from different album and genre
- Used accordion for FAQ section

Achievements

- Solved **240+ coding problems** on LeetCode, strengthening problem-solving and algorithmic thinking.
- Earned the **LeetCode 50 Days Badge (2025)** for consistent daily problem-solving and coding practice.

Education

B.E | Information Technology [Aug'18 - Aug'22]
Savitribai Phule Pune University, Pune
CGPA: 8.2
