RAJESH

rajesh.developer1302@gmail.com +91 9302444561 India

PROFESSIONAL SUMMARY

Senior Software Developer with over 5+ years of experience specializing in high-performance web applications using React.js, Next.js, and Node.js. Proven track record in designing scalable micro-frontend architectures, implementing robust CI/CD pipelines, and leading full-lifecycle development from estimation to deployment. Expertise in managing complex project timelines and mentoring junior developers to ensure code reliability through rigorous unit testing and modern JavaScript best practices. Committed to delivering seamless, API-driven user experiences within Agile/Scrum environments.

EXPERIENCE

Senior Software Developer

July 2020 - Present

Webriders

- Led the full-cycle development of scalable web applications using React.js and Node.js, ensuring high performance and 100% on-time delivery of complex project milestones.
- Architected a Micro-Frontend architecture to facilitate independent module scaling and improved system maintainability for enterprise-level products.
- Engineered a library of reusable React presentational and container components, reducing development time for new features by 30% and ensuring UI consistency across platforms.
- Designed and implemented scalable backend cloud APIs using Node.js and managed complex database schemas across PostgreSQL, MySQL, and MongoDB.
- Optimized application performance by 70% through the implementation of lazy loading, efficient bundling with Webpack, and advanced state management using Redux.
- Automated deployment workflows by establishing CI/CD pipelines with Jenkins and Firebase, reducing manual deployment errors and increasing release frequency.
- Spearheaded comprehensive unit testing strategies utilizing Jest, Mocha, and Jasmine to ensure code robustness and reliability.
- Mentored junior developers in software best practices, including OOP principles, ES6+ standards, and version control, improving team-wide code quality.
- Facilitated cross-functional collaboration with UX designers to translate Figma wireframes into responsive, accessible interfaces following WCAG standards.
- Managed end-to-end project lifecycles including estimation, resource allocation, and requirement gathering to align technical delivery with client business objectives.

SKILLS

ReactJS, React Developer, Frontend Developer, JavaScript, TypeScript, HTML5, CSS3, Next.js, Redux, Redux Toolkit, Context API, Tailwind CSS, Material UI, REST API, GraphQL, Axios, JWT Authentication, Web Performance Optimization, Responsive Design, Agile, Git, CI/CD, OpenAI, GPT, AI Integration, Prompt Engineering, AI Chatbot, Machine Learning APIs, Cloud Deployment, AWS, Vercel, NodeJS

KEY PROJECTS

CuddlyNest

Collaborated with product teams to gather KYC-related UI requirements, developing interactive frontend interfaces using React.js. Engineered dynamic, data-driven components to display identity verification steps with real-time validation using AJAX and JSON for seamless DOM updates. Focused on building reusable presentational components to enhance development efficiency and maintainability.

JAVASCRIPT BOOTSTRAP REACT.JS MONGODB AJAX JSON

BreakBread

Designed and implemented reusable UI components in React.js and managed application state efficiently with Redux. Collaborated with UX designers to translate Figma designs into responsive layouts while optimizing application performance through lazy loading and bundling. Conducted rigorous code reviews and maintained high reliability standards through modern development workflows.

REACT.JS REDUX JAVASCRIPT HTML CSS GIT

StackGo

Built secure, user-friendly identity verification workflows by integrating React.js frontends with Node.js-based RESTful APIs. Managed consistent data flow using PostgreSQL and implemented robust backend logic to ensure scalability. Mentored junior developers in version control practices and documentation of UI/UX design decisions to streamline project delivery.

REACT.JS NODE.JS POSTGRESQL BOOTSTRAP CSS

My Stories Matter

Contributed to the implementation of a Micro-Frontend architecture to scale the product independently by module using React.js and GraphQL. Developed accessible web components following semantic HTML standards and integrated GraphQL queries for efficient data retrieval. Operated within an Agile/Scrum framework to ensure iterative delivery and adherence to project timelines.
