Hyderabad, Telangana.

SUMMARY

Frontend-focused Software Engineer with 3+ years of experience architecting, building, and optimizing scalable, high-performance web applications using React.js, Next.js, TypeScript, Tailwind CSS, and modern state tools (Redux, Zustand), along with data-fetching libraries like React Query. Demonstrated ability to deliver pixel-perfect UIs, intuitive user interfaces, accelerate page load performance, and elevate user engagement. Strong expertise in SSR, component-driven architecture, and seamless API integrations. Improved usability as part of UI-focused frontend development. Created an NPM Image Cropper library adopted by external developers. Currently expanding backend capabilities in Node.js, Express.js, and MongoDB to advance into a full-stack engineering role. Demonstrated accountability in delivery and cross-team collaboration. Experience working with RESTful web services as part of software development workflows.

TECHNICAL SKILLS

Languages & Markup: JavaScript (ES6+), TypeScript, HTML5, JSON
Frontend & State Management: React.js, Next.js, React Hooks, Context API, Redux, Zustand, React Query, React Hook Form, React-Select, Axios, Redux Toolkit, WebSockets
Styling & UI Libraries: CSS3, Tailwind CSS, ShadCN UI, Mantine UI, Material UI, Responsive UI, Figma-to-UI, Semantic HTML
Architecture & Rendering: Server-Side Rendering (SSR), Client-Side Rendering (CSR), Component-Driven Architecture
Tools & Build Systems: Git, GitHub, NPM, Yarn, Webpack, Babel, GitLab, Version Control
Practices & Methodologies: RESTful APIs, API Integration, Zod Validation, WCAG Accessibility Standards, Chrome DevTools Debugging, User Flow Design, Performance Optimization, Cross-Browser Compatibility, Code Review, Agile/Scrum, RESTful Web Services, Software Development, Technical Support, Accountability.

WORK EXPERIENCE

Software Engineer | Hyderabad | Enfec Solutions — **Oct 2024 – Dec 2025**

- Engineered scalable web modules using Next.js, React.js, TypeScript, Tailwind CSS, and ShadCN UI, implementing SSR, lazy loading, and code splitting for optimal performance.
- Built and standardized 30+ reusable UI components, collaborating closely with designers to ensure consistent UI/UX and responsive design across the product.
- Integrated RESTful APIs using Axios and managed global UI state with Zustand to achieve predictable and efficient data flow.
- Improved frontend performance by optimizing rendering behavior, reducing unnecessary re-renders, and minimizing bundle size, while collaborating with product and backend teams to plan and execute development efficiently.
- Reviewed code for a team of 4–6 developers, enforcing best practices, improving maintainability, and reducing UI regressions. Provided mentoring support to junior developers to enhance code quality and technical decision-making.

Front-End Developer | Hyderabad | Aptagrim Ltd — **Sep 2022 - Oct 2024**

- Delivered responsive, production-ready UIs for SaaS and enterprise apps using Next.js, React.js, Redux, React Query, and Mantine UI.
- Converted Figma designs into pixel-perfect, scalable UI screens, improving visual consistency across modules.
- Integrated REST APIs and implemented authentication flows while optimizing state and data handling for smoother UI performance.
- Improved accessibility and user experience through iterative UI/UX enhancements and structured component reuse.
- Contributed to sprint planning, requirement grooming, and collaboration with cross-functional teams to ensure timely delivery.

PROJECTS

- **EduTech Application**

Tech Stack: Next.js, TypeScript, Tailwind CSS, ShadCN UI, Zustand, Axios.

- Engineering a scalable EduTech platform with an **SSR-first architecture**, improving initial load experience and SEO performance.
- Owning frontend architecture and building **modular, reusable UI components** to streamline development across multiple modules.
- Implementing optimized API workflows and predictable state handling using **Zustand + Axios**.

- **Image Cropper NPM Package**

Tech Stack: React, Tailwind CSS, TypeScript

- Developed a lightweight, open-source image cropping library supporting multi-image upload, drag-and-drop input, and automated <1MB image compression.
- Implemented flexible output formats (Base64, Blob, File) and a plug-and-play API, enabling seamless integration for external developers.
- Achieved a compact package footprint and clean API design, improving adoption and ease of use.

- **PsyHire (AI-Based Hiring Software)**

Tech Stack: Next.js, Redux Toolkit, React Query, Axios, Tailwind CSS, Mantine UI

- Engineered dynamic UI flows for **AI-driven video and coding assessments**, improving interaction smoothness and reducing user waiting time.
- Optimized state management and API handling to ensure smooth, lag-free assessment experiences.

- **TruPlant & TruOperate**

Tech Stack: Next.js, Redux, React Query, Axios, Tailwind CSS, Mantine UI

- Built industrial dashboard modules for Hydrocarbon & Operations Management systems with real-time data visualization and optimized workflows.
- Implemented analytics screens, tables, charts, and workflow-driven UI components for operators and field teams.

- **CABS (Ministry of Defence – DRDO)**

Tech Stack: React.js, JavaScript, Tailwind CSS, Mantine UI, Plotly.js

- Developed secure, real-time dashboards for machine rig monitoring with advanced data visualization using Plotly.js.
- Improved rendering performance through memoization, optimized update strategies, and component-level performance tuning.

EDUCATION

Master of Computer Applications — Aug 2018 - Jul 2021
FIEM – (MAKAUT)
