OBJECTIVE

To obtain a challenging Frontend Developer role where I can leverage my skills in React, TypeScript, Tailwind CSS, and Polaris to build high-performing, user-focused web applications while contributing to innovative UI solutions and scalable frontend architecture.

PROFESSIONAL EXPERIENCE

NISHTECH DIGITAL INDIA PRIVATE LIMITED

ASSOCIATE SOFTWARE ENGINEER - *JULY 2022-PRESENT*

- Hands-on experience in React, TypeScript, JavaScript, Polaris, and Tailwind CSS,Angular creating responsive, accessible, and performance-optimized UIs.
- Optimized application performance by implementing code splitting, lazy loading, and memoization, improving page load times by up to 30%.
- Strong proficiency in integrating REST APIs and GraphQL for data-driven applications, ensuring seamless interaction between frontend and backend services.
- Built and maintained Shopify-based catalog and product import systems, including product creation, bulk updates, inventory management, and AI-driven product description generation using TogetherAI
- Experience working with Sitecore XM Cloud, creating and managing components, data sources, and layouts for large-scale content authoring projects..
- Practical knowledge in building and configuring pages, templates, and dynamic content in Optimizely (Episerver) environments.
- Proficient with Node.js, BullMQ, and PostgreSQL, including writing optimized SQL queries, managing schemas, and automating job workflows.
- Implemented Together AI integrations to automate product description generation and AI-driven error analysis modules, enhancing data quality and workflow efficiency.
- Experienced in Git branching, code reviews, and Agile methodology with active participation in sprints and daily standups.
- Focused on improving application performance, scalability, and maintainability through clean code practices and modular architecture.

WORKSBOT APPLICATION PRIVATE LIMITED

INTERN - *OCT 2021-DEC 2021*

- Created a python django project ‘Academiz’, an application which fetches and displays academic information about students.
- Created a web application where polls can be created and voted online. Admin can create polls with options and voters can vote and view percentage of result simultaneously.
- Gained hands-on experience with version control systems like Git, contributing to collaborative coding.
- Speech Recognition: This component utilizes the speech recognition library to capture and interpret spoken language. It converts the audio input into text, providing the foundation for the translation process.
- Google Translation API: This component leverages the google_trans_new library to translate the recognized text from one language to another. The API employs advanced neural machine translation techniques to ensure accurate and fluent translations.

SKILL SUMMARY

- Languages JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS
- Frameworks/Libraries React.js, Angular,Redux, Next.js, Shopify Polaris
- UI/Styling Tailwind CSS, Bootstrap, Material UI, Polaris
- Tools Git, Webpack, Vite, npm/yarn, Docker, Postman
- Soft Skills Quick Learner, Teamwork, Communication

EDUCATION

Degree	University/Board	Percentage	Year of Completion
Bachelor of Engineering - Computer Science	Anna University	80%	2022
