About Me

Full Stack Web Developer with hands-on experience in building scalable, secure, and high-performance web applications using React.js, Node.js, Express.js, and MongoDB. Strong in REST APIs, authentication, real-time applications, and modern deployment practices including Docker and CI/CD. Passionate about writing clean, maintainable code and delivering production-ready solutions.

Education

Maulana Abdul Kalam Azad Universityof Technology, Kolkata

2020 - 2022
M.Tech-Renewable Energy
(80.6%)

Ramkrishna Mahato Government Engineering College, Purulia, West Bengal

2016 - 2020
B.Tech-Mechanical Engineering
(75.9%)

Anandapur H.S. School, Mednipore, West Bengal

2014 - 2015
Higher Secondary
(75.8%)

Skills

- **Frontend**: React.js, Redux, JavaScript, TypeScript, HTML, CSS
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, Firebase
- **DevOps:** Linux, Nginx, Docker, CI/CD Pipelines
- **Version Control:** Git, GitHub, Bitbucket

Experience

Evobi automation pvt ltd - Web Applications Developer

September 2023 - Present

- Developed and maintained scalable web applications using React.js, JavaScript, HTML, and CSS, building reusable components with hooks and managing state using Redux.
- Built and integrated backend services using Node.js and Express.js, including REST APIs and JWT / Google OAuth authentication.
- Worked with MongoDB and Firebase for database management and real-time data handling.
- Optimized application performance by improving load time, rendering efficiency, and state updates.
- Deployed and managed applications on Linux servers, configuring Nginx as a reverse proxy and web server.
- Containerized applications using Docker and implemented CI/CD pipelines with GitHub Actions / Bitbucket Pipelines.
- Used Git (GitHub/Bitbucket) for version control, debugging production issues, and collaborating with cross-functional teams.

Newton School - Full Stack Web Development Bootcamp Training

2022 - 2023

- Completed Full Stack Web Development training with focus on problem-solving and DSA.
- Built multiple web projects as part of hands-on learning.
- Gained experience in React.js, Nodejs, JavaScript, HTML, CSS, and Data Structures (Java).

Projects

WebRTC Video Application (Code URL)

Features :

- Built a full-stack video conferencing app using WebRTC and Socket.IO for real-time audio/video communication.
- Implemented JWT-based authentication and Google OAuth, with room creation and host controls
- Enabled real-time participant management, including mute, remove, and signaling workflows.
- Containerized services using Docker and Docker Compose for streamlined deployment..
- **Technical Stack** : React.js, Node.js, Express.js, MongoDB, WebRTC, Socket.IO, JWT, Docker.

BigBasket Clone (Code URL)

Features :

- Secure user signup and login using email, used JWT, and bcrypt.
- Search products and apply filters based on categories and detailed product information.
- Add products to the cart, view cart details, and calculate total price.
- Increase/decrease product quantity, items, or clear the cart.
- RESTful APIs implemented for user authentication, products, and cart management.
- **Technical Stack** : React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, CSS.

WhatsApp Clon (Code URL)

Features :

- Developed a real-time chat application using Firebase Realtime Database / Firestore with one-to-one and group messaging.
- Implemented secure email authentication and user search to connect registered users.
- Enabled message notifications and managed group chat workflows to improve engagement.
- Built a responsive UI using React.js and Material UI for smooth cross-device experience.
- **Technical Stack :** HTML, CSS3, JavaScript(ES6+), React.js Material UI, Firebase.
