Ramesh Chandra Swain

React Native Developer

Location: Kakatiya Nagar Ashok Nagar
Hyderabad Telangana 502032

Contact: 9668744760
ramesh.developer.1991@gmail.com

Senior React Native Developer with over **7.5 years of experience** in the technology industry, specializing in building **scalable, high-performance mobile and web applications**. Possess **5.4 years of hands-on expertise in React Native**, along with experience in **Next.js web development (1 year)** and **native Android application development (2.1 years)**.

Highly skilled in developing **responsive, visually polished, and user-centric applications**, particularly within **e-commerce and enterprise domains**. Known for delivering robust solutions that align closely with business and client requirements, with a strong emphasis on **performance optimization, clean architecture, attention to detail, and exceptional user experience**.

Technical Skills

- **Languages & Frameworks**: React Native, Flutter, Nextjs, Typescript, Reactjs, Javascript, Android, Java, Kotlin, HTML, CSS, Mysql, PHP, Swift
- **Mobile Development**: React Native, Flutter, Android Development
- **Web Development**: React.js, **Next.js,** Shadcn, Next Forge, ant design, prisma, Postgre sql
- **Backend & APIs**: RESTful APIs, Firebase, Node.js, Expressjs, Nestjs, MongoDB
- **Version Control**: Git, Github, Bitbucket
- **Tools & Project Management**: Xcode, Android Studio, Cursor, Vscode, Expo CLI, react-native-cli, Jira, Agile methodology,

Skills in Details

Native Modules, Axios, Redux toolkit, react-native-async-storage, Zustand, Context Api, Firebase Real Time Database, Firebase Authentication, Firebase Storage, Firebase Cloud Firestore, Firebase Push notification, Firebase analytics, SqLite, Cashfree PG, Razorpay PG, Payu PG, Room database, Rest API, Retrofit, Google Maps, Geolocation, Mapbox, react-native-highchart, Facebook login, Google Login, Signal R, react-native-ml-kit/text-recognition, React Native Paper, React Native Elements, react-native-view-shot, react-native-vision-camera, react-native-vision-camera-face-detector, react-native-reanimated-carousel, react-native-swiper, react-native-image-picker, react-native-image-crop-picker, react-native-maps, react-native-document-scanner-plugin, recyclerlistview, react-native-dropdown-picker, react-native-searchable-drop-down-picker, react-native-modal-drop-down-picker, react-native-switch-toggles, react-native-share, react-native-slider, react-native-crypto-js, react-native-animatable, react-native-youtube-player, react-native-video-player, pdf creation, expo-camera, expo-video, ssl-pinning, Formik, react-native-collapsible, react-navigation, lottie-react-native, react-native-gesture-handler, react-native-screen, react-native-safearea-context, react-native-fs, react-native-reanimated.

Playstore, Appstore.

Professional Experience

React Native Developer
Bharat Hyundai(Cyepro solution), Hyderabad, Telangana
Jan 2025 - Apr 2025

- Led the design and development of multiple mobile applications using Expo CLI with react-native, resulting in highly responsive and interactive user experiences.
- Worked closely with cross-functional teams to ensure seamless integration of back-end APIs with front-end functionality.
- Implemented best practices for app performance, leading to improvement in load times.
- Actively contributed to code reviews and mentored junior developers, fostering team collaboration and enhancing code quality
- Mobile app developer with Technology Type script, Reactjs and React Native.

React Native Developer
Qodequay Technologies Pvt.Ltd, Pune, Maharashtra
Jun 2024 - Nov 2024

- Led the design and development of multiple mobile applications using React Native, resulting in highly responsive and interactive user experiences.
- Worked closely with cross-functional teams to ensure seamless integration of back-end APIs with front-end functionality.
- Implemented best practices for app performance, leading to improvement in load times.
- Actively contributed to code reviews and mentored junior developers, fostering team collaboration and enhancing code quality
- Mobile app developer with Technology Type script, Reactjs and React Native.

React Native Developer
Neoteq Software Pvt.Ltd, Hyderabad, Telangana
Feb 2023 - Feb 2024

- Led the design and development of multiple mobile applications using React Native, resulting in highly responsive and interactive user experiences.
- Worked closely with cross-functional teams to ensure seamless integration of back-end APIs with front-end functionality.
- Implemented best practices for app performance, leading to improvement in load times.
- Actively contributed to code reviews and mentored junior developers, fostering team collaboration and enhancing code quality
- Mobile app developer with Technology Type script, Reactjs and React Native.

React Native Developer
Revalsys Technologies India Pvt.Ltd, Hyderabad, Telangana
March 2022 - Jan 2023

- Led the design and development of multiple mobile applications using React Native, resulting in highly responsive and interactive user experiences.
- Worked closely with cross-functional teams to ensure seamless integration of back-end APIs with front-end functionality.
- Implemented best practices for app performance, leading to improvement in load times.
- Actively contributed to code reviews and enhancing code quality.
- Mobile app developer with Technology Java script, Reactjs and React Native.

React Native Developer
Saksham Innovation Pvt.Ltd, Hyderabad, Telangana
June 2021 - Feb 2022

- Led the design and development of multiple mobile applications using React Native, resulting in highly responsive and interactive user experiences.
- Worked closely with cross-functional teams to ensure seamless integration of back-end APIs with front-end functionality.
- Implemented best practices for app performance, leading to improvement in load times.
- Actively contributed to code reviews and enhancing code quality.
- Mobile app developer with Technology Java script, Reactjs and React Native.

Mobile App Developer
Kavach Networks Pvt.ltd, Bangalore, Karnataka
October 2020 - May 2021

- Developed robust Android applications, focusing on user-friendly interfaces and smooth functionality.
- Engaged in a full development lifecycle, from concept to deployment, while adhering to Agile methodologies.
- Collaborated with design and product teams to translate user requirements into engaging, responsive UI designs.

Mobile App Developer
WondersMind Infotech Solution Pvt.ltd, Bangalore, Karnataka
March 2019 - March 2020

- Developed robust Android applications, focusing on user-friendly interfaces and smooth functionality.

- Engaged in a full development lifecycle, from concept to deployment, while adhering to Agile methodologies.
- Collaborated with design and product teams to translate user requirements into engaging, responsive UI designs.

Internship
Square and Cube, Bangalore, Karnataka
July 2018 - January 2019 Education

- Android app development training completed 6 month with technology android and java

Education

Master In Computer Application : Computer science and programming
Raajdhani Engineering College, Bhubaneswar (ODISHA)
July 2016 - July 2018 Percentage 78.30

Bachelor Of Computer Application : Computer science and programming
Lokadrusti College Of Advanced Technology, Khariar (ODISHA)
July 2013 - July 2016 Percentage 73.44

Higher Secondary Education: Arts
Sri Jagannath Mahavidyalaya, Karangamal (ODISHA)
July 2006 - July 2008 Percentage 49.16

Secondary Education
Larka High School, Larka (ODISHA)
July 2003 - July 2006 Percentage 34.13

Certifications

- Android App Development Certification – Square and Cube 2018
- Certified React Native Developer – WondersMind 2020

Project Details

Cyepro B2B
Client - Bharat motocorp pvt ltd
Play Store link - https://play.google.com/store/apps/details?id=com.b2b_new_theme&hl=en

Cyepro B2B is a powerful React Native application designed specifically for car and bike dealers to streamline daily operations and strengthen customer relationships. The app simplifies dealer workflows by enabling seamless customer communication, efficient inquiry management, and effective lead tracking.

It also helps dealers coordinate sales executives, monitor progress, and manage follow-ups from a single, centralized platform. With an intuitive user interface and robust functionality, Cyepro B2B significantly enhances productivity by organizing all sales and customer engagement tasks in one place.

Cyepro B2B is an essential tool for dealerships looking to improve customer engagement, optimize sales operations, and drive business growth.

Iscreening
Client - Divya

iScreening is a cross-platform **React Native** application designed to deliver a seamless and responsive user experience for **employment verification**. The app enables users to track the **real-time status** of their employment verification process.

Users can upload professional documents and educational certificates either by **scanning documents directly within the app** or by selecting files from their device gallery. Each document's verification status—such as **pending, rejected, or completed**—is clearly displayed, allowing users to stay informed throughout the process. The app also provides the flexibility to **edit or replace uploaded documents** whenever required.

In addition, iScreening supports **KYC (Know Your Customer) verification**, allowing users to enter both **current and permanent address details**, which can be updated as needed. Users can securely **preview all approved records**, including verified documents, KYC information, and address details, ensuring transparency and easy access to verified data.

Spare-Tag
Client - Spare-Tag

Spare-Tag is a cross-platform mobile application built with **React Native**, designed to deliver a seamless user experience and a highly responsive UI. The application supports **ship inventory management** by tracking the stock of ship spare parts, where each item is uniquely identified using **RFID technology**.

The core functionality of the app revolves around **RFID tag scanning**, enabling users to quickly retrieve, manage, and update product details such as item information and quantities. Users can efficiently **add, update, or delete inventory items** by scanning their corresponding RFID tags.

To enable RFID functionality, the application integrates an **RFID Scanner SDK** through a **custom Android Native Module**. This native module bridges the RFID hardware capabilities to the React Native layer, allowing seamless communication between Java/Kotlin-based Android code and JavaScript. The integration ensures high-performance scanning, reliable data capture, and real-time updates within the React Native application.

This architecture combines the flexibility of React Native with the power of native Android modules, resulting in a robust, scalable, and efficient inventory management solution tailored for maritime operations.
