SUKSHITH S

Software Developer (React Native Engineer)

+91-7353831649 | sukshithzone@gmail.com | https://www.linkedin.com/in/sukshith-ss/

*Dedicated **React Native Developer** with hands-on experience in **mobile application development** for iOS and Android platforms, seeking opportunities in **Front-end/Mobile App Development** within the **Product Development / Software Engineering** domain **& Production Support (Murex).** Passionate about building scalable, high-performance, and user-centric applications that align with business goals.*

Education

- **Jun'18, Bachelor of Engineering (B.E.) — Computer Science and Engineering**
  Mangalore Institution of Technology & Engineering, Mangalore, India

Certifications

- **Compuhive Certified Network Associate (CCNA 200-301)** — Compuhive Knowledge Hub Pvt. Ltd.
- **Pre-finalist, Unisys Cloud 20/20** National Technical Competition

Areas of Exposure

- Cross-Platform App Development
- Production Support
- Feature Design & Optimization
- API Integration & Data Handling
- UI/UX Collaboration
- Performance Monitoring & Debugging
- Agile / Scrum Methodology
- App Store / Play Store Deployment

Technical Skills

- **Languages & Frameworks:** React Native, React.js, JavaScript (ES6+), TypeScript, Redux, HTML5, CSS3
- **Mobile Development:** iOS & Android Platforms, Feature Integration, Optimization, Prototyping
- **Tools & Libraries:** RNFS, Axios, Redux Toolkit, Navigation, AsyncStorage, Git, VS Code, Xcode, Android Studio
- **Back-end Integration:** REST APIs, JSON, Firebase, GraphQL
- **Version Control & CI/CD:** GitHub, Bitbucket, Jenkins, AppCenter

Profile Summary

- Innovative and performance-driven **React Native Engineer** with over **4 years of experience** designing, developing, and optimizing cross-platform mobile applications in **React Native, JavaScript, and TypeScript**.
- Proven expertise in **end-to-end app development**, **feature enhancement**, and **UI/UX optimization**, contributing to major releases for top-tier startups like **Rigi, Bizom, MPL, and Parentlane**.
- Adept in **Redux-based state management**, **API integration**, **modular architecture**, and **native module optimization** for enhanced app efficiency and maintainability.
- Delivered impactful projects involving **KYC onboarding**, **cohort modules**, **webinar scheduling**, **custom video playback features**, and **real-time analytics dashboards**.
- Strong collaborator experienced in **Agile/Scrum environments**, working cross-functionally with product, backend, and design teams to ensure seamless releases.
- Proactive problem solver skilled in **code refactoring**, **lazy loading**, **performance tuning**, and **memory optimization** leading to measurable performance gains.
- Recognized for technical leadership, mentoring junior developers, and maintaining **clean, scalable, and reusable codebases**.

Achievements

- Reduced app load time by **40%** through effective **lazy loading and code-splitting** techniques at Bizom.
- Optimized video playback in Rigi app with **pinch-zoom and pan gesture features**, elevating user engagement.
- Decreased network latency by **20%** in MPL project via **API optimization** and efficient backend collaboration.
- Reduced code duplication by **30%** through modularization and reusable component architecture.
- Achieved a **2MB reduction in app size** by implementing **WebP compression** for assets.
- Pre-finalist at **Unisys Cloud 20/20** National Technical Competition for innovative mobile app solutions.

Work Experience

Mar'24 – Oct'24 | Rigi (Azalp Technologies Pvt. Ltd.), Bangalore, India |
Software Developer (React Native Engineer)

- **Feature Development:** Spearheaded KYC onboarding, cohort module, and webinar scheduling, enriching the platform's functionality and elevating user engagement.
- **UI/UX Enhancement:** Optimized in-app video playback with **pinch-zoom** and **pan gestures**, improving interactivity and visual experience.
- **Cross-Functional Collaboration:** Partnered with product, backend, and design teams to translate user feedback into high-impact product improvements.
- **iOS Deployment:** Designed and implemented **prototype screens for App Store compliance**, streamlining review and release cycles.

Jan'23 – Oct'23 | Bizom (Mobisy Technologies Pvt. Ltd.), Bangalore, India |
Senior Software Engineer (React Native)

- **Codebase Consolidation:** Unified iOS and Android codebases into a single cross-platform structure, improving maintainability and reducing platform-specific issues.
- **Debugging Automation:** Engineered a custom logging framework using **RNFS** and **zip libraries** to accelerate issue tracking and troubleshooting.
- **System Accuracy:** Designed server-client time synchronization alerts to enhance reliability and data consistency across devices.
- **State Management:** Integrated **Redux** to streamline data flow, minimize re-rendering, and improve overall app performance.
- **Performance Optimization:** Implemented lazy loading and modular code-splitting, achieving a **40% reduction in app load time**.
- **Code Reusability:** Developed modular React Native components, cutting code duplication by **30%** and enhancing scalability.

Jun'21 – Dec'22 | MPL (Blackwing Soft-Tech Pvt. Ltd.), Bangalore, India
Software Development Engineer - II (React Native)

- **Project Leadership:** Led the **CS-Pod initiative** for deposits and withdrawals, integrating **Freshchat** and **Haptik SDK** for seamless in-app user support.

- **Testing & Debugging:** Jest, Chrome Debugger, Flipper

Soft Skills

- Analytical Thinking & Problem Solving
- Effective Communication & Team Collaboration
- Leadership & Mentorship
- Time Management
- Continuous Learning Mindset

- **App Optimization:** Minimized app footprint by **2MB** through **WebP image compression** and asset optimization.
- **System Stability:** Architected robust support flows to improve application reliability and reduce error rates across modules.
- **API Performance:** Collaborated with backend teams to fine-tune API responses, achieving **20% faster data fetch** and improved responsiveness.

Jan'19 – May'21 | Parentlane, Bangalore, India |
React Native Developer

- **App Development:** Designed and developed mobile apps (*Parentlane*, *Sheolife*) for healthcare and wellness services using **React Native** and **React Native Web**.
- **Feature Integration:** Integrated **voice recognition** and **payment gateways**, improving accessibility and transactional efficiency.
- **Web Platforms:** Built admin and coaching dashboards using **React.js**, **Redux**, and **TypeScript** to support real-time analytics.
- **Code Quality:** Led peer code reviews and implemented best practices to maintain scalable, clean, and high-performing codebases.
