BEST EMPLOYEE AWARD Nov 2024

PROFESSIONAL SUMMARY

Full-Stack Developer with expertise in React.js, React Native, Node.js, and TypeScript, building scalable web and mobile applications with offline-first capabilities. Strong in backend API design, Azure cloud deployment, and performance monitoring using Application Insights. Experienced in end-to-end ownership, team leadership, and delivering high-quality products on time.

SKILLS

- **FRONTEND**:
  React.js, React Native (Bare Workflow), JavaScript, TypeScript, HTML5, CSS3
- **BACKEND & APIS:**
  Node.js, Express.js, .NET Core Web API, RESTful API design, API integration
- **DATABASES:**
  MS SQL Server, SQLite
- **MOBILE DEVELOPMENT:**
  Android & iOS app publishing, Native iOS modules, Offline-first architecture
- **ARCHITECTURE & PERFORMANCE:**
  MVC architecture, Performance optimization, Scalable system design
- **CLOUD & DEVOPS:**
  Azure App Hosting, Application Insights, Git/GitHub, CI/CD basics
- **OTHER:**
  TensorFlow (basic knowledge)

WORK HISTORY

Diversified Network and Infra Solutions (Contractual – Chennai Petroleum Corporation Limited)

SENIOR SOFTWARE ENGINEER ***AUG 2025 – Present***

- **END-TO-END DEVELOPMENT:** Designed and delivered scalable web applications end-to-end and built Node.js APIs for the eServe CPCL Employee mobile app in React Native, working closely with senior management.
- **TEAM & TECHNICAL LEADERSHIP:** Mentored junior developers and optimized 25+ database schemas to improve performance, scalability, and maintainability.
- **CODE QUALITY & OPTIMIZATION:** Refactored codebase with modular folder structure and component-based architecture, improving application performance by 75% and enhancing maintainability.
- **SCALABLE BACK-END SYSTEMS:** Designed and developed robust server-side applications using ASP.NET MVC integrated with MS SQL Server for data management.
- **SECURITY & COMPLIANCE:** Collaborated with the VAPT (Vulnerability Assessment and Penetration Testing) team to identify, analyze, and fix security vulnerabilities, ensuring the application met compliance and security standards.

KaiDP Technologies LLP, Karaikudi, Tamil Nadu

BUSINESS UNIT HEAD ***AUG 2019 – AUG 2025***

- **PRODUCT DEVELOPMENT & STAKEHOLDER COLLABORATION:** Built mobile and web applications using React Native and React JS, collaborated directly with the Director, CEO, and clients for requirement gathering and project direction, handled full-cycle development.
- **MOBILE & WEB APP DELIVERY:** Developed and deployed high-quality mobile and web applications using React Native and React JS, ensuring strong performance, usability, and clean architecture. Guided junior developers through code reviews and technical workshops, while restructuring database tables and APIs to enhance system performance and maintainability.
- **OPERATIONS & TEAM MANAGEMENT:** Managed overall office operations and coordinated a 25-member team to streamline document processing, optimize meeting scheduling, and ensure on-time project deliverables.
- **SECURITY & COMPLIANCE:** Executed secure authentication using JWT in ASP.NET Core to safeguard sensitive user data and ensure a reliable, secure login process.

- **PROCESS & DOCUMENTATION:** Created detailed flow charts, process maps, and user manuals to document system workflows and support end-user understanding and training.

EDUCATION

- **Kumaraguru College of Technology, Coimbatore** — **Apr 2010 – May 2013**
  B.E COMPUTER SCIENCE AND ENGINEERING

- **Annamalai Polytechnic College, Karaikudi** — **Mar 2007 – Apr 2010**
  DIPLOMA IN COMPUTER ENGINEERING

PROJECTS WORKED

KUBERA CS (Mobile App) — MAR 2021 – Aug 2025

- **Led the internal development team as Team Leader**, mentoring developers, resolving technical challenges, enforcing clean code architecture, and managing end-to-end project delivery.
- **Developed a dedicated iPad application using React Native** with a fully **offline-first architecture**, enabling uninterrupted field operations and reliable data synchronization when online.
- **Architected, planned, and executed a custom single-application architecture** from a unified codebase, supporting configurable **UI themes (colors, styles), API Base URLs,** and **feature-level behavior** driven by client and business requirements.
- **Built and enhanced high-performance ASP.NET Core APIs** with **JWT authentication**, **role-based access control (RBAC)**, and efficient **SQL Server** queries to support large-scale construction operations.
- **Implemented Redux for centralized state management** and **React Native Navigation** to ensure smooth screen transitions, scalability, and long-term maintainability.
- **Published and maintained the iOS application** using **TestFlight and the App Store**, ensuring proper versioning, stability, and continuous crash-free performance.
- **Deployed backend services on Microsoft Azure** and utilized **Application Insights** for real-time monitoring, logging, and rapid production issue resolution.
- **Performed continuous bug fixes, performance tuning, and API/database optimization**, improving system reliability and application responsiveness.
- **Collaborated closely with the Client Technical Principal and Project Manager,** coordinating development workflows and ensuring timely delivery of all modules.

ONE AWESOME TEAM (Web and Mobile App) — AUG 2023 – AUG 2025

- **Served as Team Leader for the HRMS/CRM enterprise platform**, overseeing end-to-end development, sprint planning, code quality, testing, and production releases in collaboration with development and QA teams.
- **Oversaw code structure, executed best practices, and applied optimization techniques**, ensuring a **clean, scalable, and maintainable application architecture** across the project.
- **Led the development and integration of core modules** built with **React JS**, **ASP.NET Core Web APIs**, and **SQL Server**, focusing on performance optimization and data consistency.
- **Implemented real-time chat functionality using SignalR**, enabling instant communication between **different entities as well as within the same entity**.
- **Enhanced system performance** by conducting in-depth **code reviews**, optimizing **SQL queries and indexing**, and improving **API response efficiency**.
- **Facilitated effective team collaboration** by supporting developers in **problem-solving, debugging, and performance optimization**, resulting in **improved system reliability** and **faster issue resolution**.
- **Implemented WebView integration in React Native**, enabling seamless in-app rendering of **internal and external web content**.

PAROPAKARI (Web and Mobile App) — MAR 2022 – JUN 2024

- **Team Leader for the Paropakari donation platform**, overseeing end-to-end development, team coordination, and delivery of all major modules.

- Led a cross-functional team utilizing **React JS, ASP.NET Core API,** and **SQL Server** to deliver a scalable architecture and maintain high-quality code throughout the project.
- Designed and executed secure **donation workflows**, including user onboarding, campaign management, donor tracking, and real-time reporting.
- Integrated **Razorpay payment gateway** for seamless online donations with secure transactions and multi-mode payment support.
- Integrated **Textlocal SMS gateway** for donor notifications, alerts, and OTP verification.
- Improved backend APIs, improved database structures, and enhanced overall application performance for faster load and query execution.
- Led junior developers, performed code reviews, and ensured adherence to best practices, clean code, and enhanced architecture.
- Collaborated closely with stakeholders, gathered requirements, and translated them into functional modules with smooth delivery.

THATS COOL (Web and Mobile App) AUG 2020 – SEP 2022

- **Independently mastered React Native CLI**, gaining hands-on expertise in building mobile applications with **clean architecture** and **reusable, scalable components**.
- Created and integrated **custom APIs** using ASP.NET Core, ensuring secure communication, optimized performance, and scalable backend workflows.
- Managed and directed a development team, providing technical direction, code reviews, and problem-solving support throughout the project lifecycle.
- Applied **WebView integration** inside the mobile app for rendering dynamic web content seamlessly within React Native.
- Built smooth navigation flows using **React Navigation**, including stack, drawer, and tab navigators for a user-friendly experience.
- Applied **useReducer** for structured state management, improving code maintainability and handling complex UI logic efficiently.
- Published and maintained the app through **Google PlayStore & App Store**, ensuring version control, stability, and continuous crash-free performance.

VISITOR PASS SYSTEM (Web and Mobile App) AUG 2025 – NOV 2025

- Directed the full project lifecycle **as sole project owner**, gathering requirements directly from DGM/CGM, creating **documentation**, and providing status updates while reporting to the DGM.
- Built a **cross-platform mobile application using React Native**, consuming **.NET Core Web APIs**, enabling field/security teams to manage requests and approvals on the go.
- **Enhanced a secure ASP.NET MVC Core application** with Dapper-based database connectivity and SQL Server for fast, optimized query performance.
- **Enforced automated QR Code generation** upon approval of visitor passes, enabling faster verification and streamlined gate entry operations.
- **Strengthened application security** by preparing the visitor-facing module for VAPT (Vulnerability Assessment & Penetration Testing) compliance.
- **Deployed and maintained the system on IIS**, ensuring stable performance within the intranet environment and providing technical guidance to junior developers.

VEHICLE MANAGEMENT SYSTEM (Web and Mobile App) AUG 2025 – PRESENT

- Built a **cross-platform mobile application using React Native**, consuming **.NET Core Web APIs**, enabling field/security teams to manage requests and approvals on the go.
- **Designed and Enhanced a secure intranet-based Vehicle Management System using ASP.NET MVC**, ensuring smooth and efficient vehicle movement tracking within the organization.
- **Enforced request workflows for vehicle entry/exit**, including approval, rejection, and escalation processes aligned with organizational policies.
- **Integrated CISF (Central Industrial Security Force) approval flow**, enabling security teams to verify, validate, and authorize vehicle access in real time.

- **Improved dashboards and reports to track vehicle status, historical logs, pending approvals, and operational insights for management.**
- **Ensured reliable deployment on IIS and optimized SQL Server queries**, improving system performance and delivering a stable intranet application environment.

VISITING CARD SYSTEM

SEP 2025 – OCT 2025

- **Directed the full-cycle development** of a secure intranet-based Visiting Card System using ASP.NET MVC, SQL Server, and Dapper ORM, deployed on IIS.
- **Generated unique QR codes** for every employee, allowing fast, digital identification and secure retrieval of employee details through QR scanning.
- **Enforced employee data management**, including creation, updates, and validation workflows, ensuring accurate and centralized record handling.
- **Strengthened application security** by preparing the User-facing module for VAPT (Vulnerability Assessment & Penetration Testing) compliance.
- **Built a real-time QR scanning module** for security teams to instantly fetch employee profiles and verify identity at entry points.
- **Handled requirement gathering**, documentation, stakeholder communication (DGM/CGM), and provided technical guidance to junior developers while serving as the single project owner.

CONTRACTOR VEHICLE PERMIT SYSTEM

OCT 2025 – NOV 2025

- **Led end-to-end development** of a Contractor Vehicle Permit System using React.js and backend APIs, from requirement gathering with DGM/CGM to production deployment on IIS, acting as the sole project owner.
- **Designed and built the complete database** in SQL Server, including table creation, relationships, stored procedures, and connectivity using **Dapper** for high-performance queries.
- **Enhanced secure approval workflows**, enabling CPCL Officers to generate permits and route them for approvals to **CGM and Director of Operations**, followed by automated submission to **CISF**.
- **Implemented QR-based verification**, generating a unique QR Code for each approved vehicle permit for quick scanning and validation at the entry gate.
- **Handled project documentation, reporting directly to the DGM**, ensuring clarity in requirements, progress tracking, and delivery timelines, while also providing **technical guidance to junior developers** when needed.

eServe – Employee Self – Service – (Mobile App)

JAN 2026 – PRESENT

- Developed a **React Native mobile application** for CPCL employees to access daily and weekly attendance logs (login/logout times) in real time.
- Integrated **.NET Core Web APIs** to securely fetch employee attendance, leave, and HR-related data from the central system.
- Implemented features including **Today's Canteen Menu, Leave Without Pay (LOP) tracking, Holiday calendar, and company-wide Telephone Directory**.
- Ensured **secure authentication, API integration, and optimized performance** for smooth usage across Android and iOS devices.
- Published the app internally and provided **ongoing maintenance and enhancements** based on employee feedback.
- **Handled project documentation, reporting directly to the DGM**, ensuring clarity in requirements, progress tracking, and delivery timelines, while also providing **technical guidance to junior developers** when needed.
- Published the app internally and provided **ongoing maintenance and enhancements** based on employee feedback.

DECLARATION

Consistently delivered high-quality software solutions on schedule, earning trust through strong ownership, technical excellence, and integrity across all responsibilities.

Place: Chennai
Date: 11-Feb-2026
