G SHREEHARI

Sancharnagara, Thanisandra, Bengaluru- 560077 | **8971825454 | shreehari.guruacharya@gmail.com**

Objective

I am focused on mastering full-stack and automation technologies to build robust, scalable and secure web and platform solutions. I aim to work in a creative and forward-thinking environment where I can contribute to innovative projects that push the boundaries of modern development.

Technical Skills

Front-end

- HTML, CSS, JavaScript, TypeScript.
- ReactJS, MUI, Redux, Zustand.

Back-end

- Python, Fast API, Django, NodeJS, Express.
- MongoDB, Postgresql.

Deployment and CI/CD

- Docker, Bash, YAML, GitHub Actions.

Education

MCA | 2020 | SURANA COLLEGE PG DEPTS.

- University: Bangalore University.
- Marks: 74.5%

BCA | 2018 | SESHADRIPURAM FIRST GRADE COLLEGE

- University: Bangalore University.
- Marks: 70.03%

Work Experience and Internship

SENIOR SOFTWARE DEVELOPER, MICROLAND LTD.

- (11 November 2024 – Present)
- Team: Automation and Platforms
- Developed UI layouts, components, etc using ReactJS.
- Built and integrated REST APIs using Node.js and Express.js.
- Implemented CRUD operations with MongoDB.
- Collaborated with clients to implement platform updates and requirement changes.
- Containerized applications using Docker and deployed across local and customer environments.
- Automated deployment workflows using Dockerfiles and YAML scripts.
- Tested configuration changes on RHEL systems and network devices.

FRONT-END DEVELOPER/ REACT DEVELOPER, GLEAFINK PVT LTD.

- (14 August 2023 – 8 November 2024)
- Team: Maersk Datacraft
- Creating pop-ups, tables, modals, etc using the MUI components.
- Integrating the APIs to handle the data provided from the backend.

FRONT-END DEVELOPER/ REACT DEVELOPER, MEDIA CANNIBAL LLP.

- (1 November 2021 – 1 August 2023)
- Team: Core
- Produced clean and efficient code based on specifications, integrate software components and third-party programs.
- Troubleshoot, debug and upgrade existing software, gather and evaluate user feedback as well as recommend and execute improvements.

EDI DEVELOPER, PERFTECH SOLUTIONS PVT LTD.

- (1 March 2021 – 31 October 2021)
- Team: DSV.
- Worked on mapping of various transactions and message formats, using IBM Sterling Integrator.
- Worked on multiple message formats like ANSI X12, EDIFACT, XML and CSV.

QA INTERN, RIVERSAND TECHNOLOGIES INDIA PVT LTD.

- (10 February 2020 – 30 October 2020)
- Team: Engg QA 8.0X.
- Worked as manual tester for the MDM application.
- Creating test cases and performing the same, identifying errors and providing feedback.

Projects

INTELLIGENI CHANGE

- It is a platform to manage network configuration changes. It ensures that configuration changes are done in a controlled environment where deployments are done programmatically using catalog-driven change templates, with pre and post checks. It also performs configuration backups with version control which allows the user to revert back to original configuration in case of failure.
- **Front end**: ReactJS.
- **Back end**: NodeJS (Express).
- **Database**: MongoDB.
- **Network Connection**: Python (Netmiko).
- **Role**: Full stack development, Deployment.

INTELLIGENI GOVERN

- It is a platform to perform compliance and cost management of hybrid cloud based network environments. It ensures multi-standard compliance in network environments, and also audits network configurations and compares it with gold standard configurations.
- **Front end**: ReactJS.
- **Back end**: NodeJS (Express).
- **Database**: MongoDB.
- **Network Connection**: Python (Netmiko).
- **Role**: Full stack development, Deployment.

DATACRAFT – (ETL)

- It is a website to extract the data from various databases and filter/ modify it according to requirement, that is transform the data and load it to the required data warehouse.
- **Front end**: ReactJS.
- **Back end**: Java (Springboot).
- **Database**: Postgresql.
- **Data Analysis**: Python.
- **Role**: Designing, Logical coding.

TERMINAL GPT

- It is a Chat based platform to get information about the terminals, cranes, ports, vessels, etc. The user asks the question and gets the data as response accordingly.
- **Front end**: ReactJS.
- **Back end**: Python (Fast API).
- **Database**: Postgresql, FAISS, ChromaDB.
- **Role**: Designing, Logical coding.
