MERN STACK DEVELOPER

As a self-taught MERN-stack developer, expertise has been gained in a variety of technologies including **JavaScript**, **Node.js**, **Express**, **React.js** and **MongoDB**. Through completing projects and reviews, a strong ability to prioritize tasks and manage time effectively has been developed, ensuring the timely completion of project sand adherence to the highest standards.

TECHNICAL SKILLS

Languages : JavaScript, Node.js, HTML, CSS
Frameworks : Express, Bootstrap, Vue.js
Libraries : React.js
Database : MongoDB, MySQL, PostgreSQL
Prototype Tool : Figma
Familiar : AWS EC2, Data Structures and Algorithms, MongoDB Atlas, NGINX, SQL, cloudinary
Dev Tools : Visual Studio Code, Git, GitHub, Postman

PROJECTS

Tour Blogging Application Source Code

Tech Stack: React.js, Redux, Node.js, Express, MongoDB, Material UI, JWT, Socket.IO

- Developeda Tour Blogging App with **React.js**, **Node.js**, **Express** and **MongoDB**.
- Developed a full-featured blogging platform where users can share and explore travel stories.
- Integrated secure **user authentication and authorization** using **JWT** and **bcrypt**.
- Enabled **real-time chat** between users using Socket.IO.
- Implemented **admin panel** for user moderation and content management.

E-commerce Application Source Code

Tech Stack: Node.js, Express, JavaScript, MongoDB, Handlebars (HBS), AWS, NGINX, Bootstrap

- Developed an E-commerce Application using **HTML**, **CSS**, **Bootstrap**, **Handlebars**, **JavaScript**, **Node.js**, **Express** and **MongoDB**.
- Developed a dynamic e-commerce platform supporting user and admin modules.
- Implemented **product listing, cart, checkout**, and **payment gateway integration** using **Razorpay**.
- Used **AWS EC2** and **NGINX** for deployment, ensuring scalability and performance.
- Admin panel enabled **inventory management, sales analytics**, and order control.

EXPERIENCE

Software Engineer - *2025 - Present*
GoZupees – Building AI Agents for tomorrow. London, Remote

GoZupees
Tech Stack - React.js, nest.js

- Developed and deployed highly intelligent AI agents that autonomously handle complex workflows across customer-support and operations, enabling 24/7 business continuity.
- Collaborated with cross-functional teams to integrate AI-driven conversational agents into enterprise systems.

Software Engineer - *2024 - 2025*
Payoll – Integrating Payment APIS. Dubai, UAE

Payoll
Tech Stack - React.js, node.js

- Developed and integrated payment APIs for seamless financial transaction using secure protocols and **token-based**

authentication.

- Worked on **real-time transaction status updates**, handling asynchronous operations and error states effectively.

- Implemented secure **payment processing workflows**, including API authentication, input validation, and logging using **middleware** and **JWT**.
- Designed reusable components and API abstraction layers for handling payment actions and transaction logs.

Ared Carbon Emissions Calculator
Tech Stack - React.js, node.js

- Developed the complete **frontend and backend** for Ared's **carbon emissions calculator**, helping users estimate and offset their carbon footprint.
- Built a dynamic React interface to capture user inputs (e.g., travel, energy use, activities) and display real-time emission estimates using various conversion factors.
- Designed backend APIs in Node.js to process emission calculations based on verified scientific data sources.
- Implemented features to support **credit retirement timelines, refund policies**, and automatic offsetting through equivalent projects when required.

Full Stack Developer - *2023 - 2024*
Akra Tech Pvt Ltd – Managing all aspects of web application creation. Chennai, IND

Certificate Of Insurance Application
Tech Stack - Vue.js

- Developed an application for Issuing certificate of insurance with **Vue.js**.
- Built and maintained the **Certificate of Insurance Application**, enabling users to digitally request, verify, and download insurance certificates.
- Implemented dynamic forms that adapt based on user input and policy type, improving user experience.
- Integrated RESTful APIs to fetch real-time insurance data and policies.
- Enabled **PDF generation of insurance certificates** using backend templating and libraries like pdfkit or html-pdf.
- Developed a secure admin dashboard to manage users, issue dates, and certificate validity using Vue.js components and modular architecture.

Online Classroom Application
Tech Stacks - **React.js, node.js**

- Built a real-time video conferencing platform enabling multiple users to connect and interact within virtual classrooms.
- Implemented user authentication and secure room creation using **JWT** for seamless peer-to-peer communication.
- Added features like **chat**, **screen sharing**, **whiteboard**, and **role-based access** control (teachers/students).
- Ensured responsive UI and smooth performance using **React hooks** and **context API**.

EDUCATION

MERN Stack Development *2022 – 2023*
Brototype Kozhikode, Kerala

Bachelor of Science in Information Technology *2007 -2010*
Kuvempu University Bangalore, Karnataka
