ABOUT ME

Innovative JavaScript and ReactJS Front-End Developer with 3+ years of experience, hands-on expertise in NextJS, Node.js, Python, and databases. Currently exploring and developing Agentic AI solutions, and continuously learning full-stack development technologies to build intelligent, high-performance web applications.

EDUCATION

MAKAUT University

Future Institute of Engineering and Management

Bachelor of Technology - Electrical Engineering

2014 - 2018

SKILLS

- JavaScript
- Redux
- ES6/ES7
- JEST
- HTML
- JSON
- Web Design
- Debugging
- NodeJS
- CSS3
- Agentic AI
- JIRA
- Kibana
- NPM
- MySql
- Mongo DB
- Git
- GitHub
- ReactJS
- Redux-Saga
- Context API
- NextJS
- React Testing Library
- Project Management
- Problem Solving
- Webpack
- Jenkins
- ExpressJS
- CSS
- Material-UI
- BootStrap
- Copilot
- SonarQube
- GitLab

EXPERIENCE

Birlasoft Limited | Pune — Feb 2023 - Present

Project Contribution Management Tool (PCMT) — June 2024 - Present

Expanded a project management portal for Birlasoft to streamline project creation, planning and tracking — including EBITA insights, employee allocation, resource management, and billing details for efficient project oversight.

Developed Features:

- Built reusable React components for project creation, timelines, and progress dashboards.
- Managed global state with Redux and Context API for consistent data flow.
- Incorporated RESTful APIs for project details, resources, and progress tracking.
- Wrote unit and integration tests using Jest to ensure reliability.
- Enforced role-based authentication and participated in Agile sprints & code reviews for continuous improvement.

Tech stack used: React 17+, React-router-dom, Redux, Saga, Styled component, Material-UI and other supporting frameworks

Employee Clearance Portal — Jan 2025 - Present

Formulated an Employee Clearance Portal to automate exit formalities by enabling multi-department (HR, IT, FLM, Manager) approvals and handling pending dues or deductions before employee offboarding.

Developed Features:

- Enhanced modular and scalable React components for clearance workflows and approval dashboards.
- Utilized useContext for state handling and seamless data synchronization.
- Implemented RESTful APIs to manage employee clearance data, approval status, and departmental deductions.
- Conducted testing and debugging using Jest to ensure app stability.
- Engineered secure, role-based access control and collaborated in Agile development cycles for timely delivery.

Tech stack used: React 18+, React-router-dom, Redux, Saga, Styled component, Material-UI and other supporting frameworks

HR Resume Management Portal

May 2024 - June 2024

Launched an HR portal to streamline resume handling, enabling upload and parsing of PDF/Word files and storing candidate data securely in the company database for efficient recruitment management.

Developed Features:

- Built reusable React components for forms, document uploads, and transfer tracking.
- Improved dynamic, validated forms using React Hook Form and Formik to ensure data
- accuracy.
- Blended RESTful APIs for employee data, transfers, and document management
- workflows.
- Implemented secure authentication & authorization to safeguard employee information.

Tech stack used: React 18+, React-router-dom, ContextAPI, Styled component, other supporting frameworks.

International Transfer Portal

Dec 2023 - Apr 2024

Formulated a comprehensive HR platform enabling seamless domestic and international location transfers, allowing employees to manage personal details, professional data, and document uploads efficiently.

Developed Features:

- Engineered a responsive and intuitive UI/UX using ReactJS, enhancing usability and engagement for HR and employees.
- Optimized reusable and modular React components and dynamic forms with React Hook Form and Formik, ensuring robust validation and data integrity.
- Integrated secure RESTful APIs for handling employee transfers, document workflows, and personal/professional information management.
- Executed authentication and authorization with responsive design principles using Material-UI, ensuring data security and cross-device compatibility.

Tech stack used: React 18+, React-router-dom, ContextAPI, Styled component, other supporting frameworks

ChatBot Tool

Sep 2023 - Nov 2023

Engineered an interactive AI-powered tool that provides instant responses to employee queries and detailed information on HR policies, improving accessibility and support efficiency across the organization.

Developed Features:

- Applied an intuitive ChatBot UI using ReactJS, focusing on user-friendly and
- engaging interactions.
- Built modular, reusable components (message bubbles, input fields, conversation
- history) for scalable architecture.
- Merged Microsoft AI Engine and third-party APIs to deliver real-time,
- accurate responses.
- Applied modern styling with CSS-in-JS (Styled Components/Emotion) for a
- consistent and maintainable design system.

Tech stack used: React 18+, React-router-dom, Redux, Saga, Styled component, Material-UI and other supporting frameworks

MyWorld 2.O

Feb 2023 - Sep 2023

Designed an employee self-service portal enabling centralized access to attendance, timelog, on-duty requests, asset and cab requests, salary details, and team meetings, streamlining employee operations and engagement.

Developed Features:

- Built reusable and responsive UI components using ReactJS, ensuring design
- consistency and scalability.
- Managed application state efficiently with Redux for seamless data flow.
- Incorporated RESTful APIs and optimized performance through lazy loading, code
- splitting, and memoization.
- Ensured cross-device compatibility using Material-UI and contributed to code
- reviews to maintain quality standards.
- Maintain Unit test case scenarios with average 80% code coverage.
- Practice Agile methodology & end-to-end testing.

Tech stack used: React 17+, Redux, Saga, React-router-dom, Styled component, Material-UI, other supporting frameworks.
