MD IBRAHIM AKHTAR

Senior Mobile Application Developer | React Native & Android
ibrahim.akhtar33@gmail.com | +91 86863 62317 | linkedin.com/in/Ibrahim-akhtar

TECHNICAL SKILLS

React Native, Android (Java), JavaScript, TypeScript, Redux Toolkit (Thunk, Saga), TanStack Query, Zustand, Expo, CLI, MVVM, REST APIs, Realm, SQLite, MMKV, Jest, Git, Azure Pipelines (CI/CD), Agile (JIRA), Node.js (MongoDB), Firebase Crashlytics, Sentry

PROFESSIONAL EXPERIENCE

Associate Consultant – GlobalLogic (Nov 2021 – Present)

• Developing enterprise-scale mobile applications for Banking and Analytics domains using React Native & Expo.
• Built reusable UI components consumed across multiple teams, improving development consistency.
• Implemented secure authentication mechanisms including Two-Factor Authentication (2FA).
• Delivered offline-first features using Realm with native-to-React Native bridging.
• Worked extensively on data visualization using charts, graphs, and complex data tables.

Software Engineer – Ferns N Petals (Apr 2019 – Nov 2021)

• Developed and scaled a high-traffic e-commerce mobile application using React Native from scratch.
• Integrated third-party SDKs for user behavior analytics (Adobe Analytics) and push notifications (WebEngage).
• Managed the Delivery Partner app (GharTak), enabling end-to-end delivery workflows with live location tracking using Locus SDK.

Android Developer – WINIT (Apr 2017 – Mar 2019)

• Developed and enhanced modules for a Sales Force Automation Android app used by FMCG sales teams for pre-sales and van-sales operations.
• Built an offline-first Android application for Coffee Board (Government of India) using SQLite with GreenDAO ORM, supporting master data download and bidirectional server synchronization.

KEY PROJECTS

Digital Banking Solution – FIS Global

Tech: React Native, JavaScript, TypeScript, MVVM, TanStack Query, Zustand, MMKV, LaunchDarkly, Celebrus
• Developed Home Screen modules and critical user flows for a digital banking application.
• Contributed to a shared component library leveraged across multiple feature teams.

Spring Global (Client: Coke, Red Bull) App: Guided Mission PlayStoreLink

• Built AI-driven insights to visualize sales and operational data using interactive charts, graphs, and data tables, enabling sales reps to identify product recommendations and improve revenue.
• Implemented CI/CD pipelines using Azure Pipelines for automated Android and iOS build generation.

PG Alpha – Partners Group PlayStoreLink

Tech: React Native, Android, iOS, Realm
• Executive dashboard application supporting mobile and tablet devices with rich KPI visualizations.
• Implemented 2FA and offline support by migrating from SQLite to Realm, improving data access performance by ~40%.

Ferns N Petals App PlayStoreLink

• Optimized list rendering using FlatList configurations (memoization, windowSize, removeClippedSubviews, keyExtractor, virtualization), reducing UI lag by ~35%.
• Improved crash-free users from 96% to 99.8% by monitoring production issues with Firebase Crashlytics and migrating to Sentry for deeper stack trace analysis.
• Integrated and secured multiple payment gateways including Razorpay and PayU, implementing native Android and iOS PayU SDKs with React Native bridging.

EDUCATION

Master In Computer Application – Jamia Hamdard University, Delhi
