SNEHAL MISHRA

Bengaluru 938-084-1137 snehal.mishra0911@gmail.com LinkedIn Github Leetcode

PROFESSIONAL SUMMARY

Solution-focused **React Native developer** with **3+ years of experience** building scalable mobile applications used by **5M+ global users** and internal platforms **serving 10k+ employees**. Proficient in reusable component development, end-to-end feature delivery, and seamless API integration. Known for delivering high-quality solutions on time, enhancing user experience through technical analysis, and streamlining enterprise workflows with secure, feature-rich apps.

SKILLS

Languages/ Tools: Javascript, Typescript, VS Code, Charles Proxy, Figma, Xcode, Android Studio, Azure, Jira
Mobile Development: React Native, JSX, Redux, Redux-Saga, Jest, React, Git, GitHub Copilot
API Integration: RESTful APIs, Singleton Pattern
Others: Data Structures, OOP Concepts

EXPERIENCE

Tata Consultancy Services *(React Native Developer)* **Aug 2022 - Present**

Project 2 - Adobe (Media)

- Built a cross-platform React Native (TypeScript) app for 10k+ employees, boosting internal engagement and productivity.
- **Integrated Okta** for secure authentication and session management, ensuring enterprise-grade security compliance.
- Designed personalized Home Screen with news, events, podcasts, and meetings, increasing engagement by 30%.
- Added in-app services (food ordering, space booking, commute planning, maps), saving employees ~15 mins/day.
- Developed interactive calendar with MS Teams **deep linking** for seamless meeting collaboration.
- Created People Directory to enable employee search and connections, strengthening internal collaboration.
- **Integrated REST APIs** with caching, error handling, and offline support, enhancing app reliability and performance.

Project 1 - General Motors (Manufacturing)

- Developed and maintained a React Native + TypeScript hybrid app for a major automobile company, serving 5M+ users globally.
- Migrated app from Android 13 → 14, ensuring compliance with new guidelines and seamless access for 2M+ users.
- Refactored subscription features, boosting reliability and engagement by 20%, improving accessibility, and reducing drop-off by 15%.
- **Led 3 developers in evaluating GitHub Copilot**, enhancing code quality and reducing delivery time for repetitive logic.
- Conducted technical spikes, **debugged API integrations with Charles Proxy**, and optimized data flow and performance across modules.
- Resolved 25+ critical UI/UX and functionality bugs, reducing customer-reported issues; achieved 85% same-day resolution through rapid analysis and technical investigation.

EDUCATION

Bachelor of Computer Science and Engineering **Aug 2018 - June 2022**
Visvesvaraya Technological University, Karnataka (**CGPA - 8.83**)

PROJECTS

Adobe Life
Developed an internal mobile app for 10k+ employees with secure Okta login, personalized home screen (news, events, podcasts, meetings), and key features like food ordering, space booking, commute planning, campus maps, and People Directory. Streamlined multiple services into a single platform, boosting productivity and collaboration.

myChevrolet | myBuick | myGMC | myCadillac
Built and supported the myBrand mobile apps that allow users to control their vehicles remotely and view live vehicle data. The apps are used by over 5 million people across 15+ countries. Focused on adding new features, improving performance, and fixing bugs to ensure a smooth user experience on both Android and iOS platforms.

AWARDS

"**Star of the Month**" Award for exceptional project contributions and successfully delivering client presentations.
"**Contextual Master Award**" for creating a well-crafted and impactful contextual master story.
