PRAVEEN PALI

Ghaziabad, Uttar Pradesh, India praveenpali89@gmail.com +918107606750 in/praveenpali89 www.resume-now.com/profile/finalize

SUMMARY

Mobile Application Tech Lead with 12+ years of experience building high-scale iOS, Android, and React Native platforms across OTT, streaming, and enterprise domains. Specialised in LL-HLS, WebRTC, offline-first systems, modular architecture, and performance engineering. Proven ability to lead 15+ engineers and deliver reliable, low-latency mobile products with strong CI/CD automation.

EXPERIENCE

Mobile Application Tech Lead

Fanory.ai **December 2023 - Present, Noida, Uttar Pradesh**

- Architected next-gen live streaming platform with LL-HLS, HLS, WebRTC (SFU), and AVFoundation, achieving <2s latency.
- Improved audience engagement by 65% with CDN (CloudFront) optimisation, caching, and real-time WebSockets.
- Designed core mobile architecture for OTT-style low-latency content delivery and interactive streaming features.
- Built CI/CD pipelines (Bitrise, Jenkins, Fastlane), enabling automated testing, code signing, and continuous releases.
- Managed 15+ engineers, performed design reviews, defined coding standards, and enhanced engineering governance.
- Reduced app crash rate by 40% using concurrency tuning, memory leak fixes, and Instruments-based profiling.

Mobile Team Lead

AllTrak Technologies **September 2021 - November 2023, Gurgaon, Haryana**

- Architected a mobile platform for the healthcare workforce (50K+ users), including offline-first sync & secure data flows.
- Improved operational efficiency by 66% through modular architecture, reusable mobile frameworks, and CI/CD.
- Built a logistics workflow engine with barcode scanning, GPS tracking, auto-sync, and form-based rule automation.
- Reduced onboarding time by 30% using dynamic form rendering and configurable workflow automation.
- Led sprint planning, release cycles, architectural reviews, and cross-functional collaboration with backend and QA teams.

Senior Software Engineer – Mobile

Bada Business Pvt Ltd **August 2020 - August 2021, Delhi, India**

- Developed e-learning and OTT streaming apps for 100K+ learners with offline downloads and an optimised AVFoundation pipeline.
- Built internal SDKs to unify streaming, analytics, caching, and authentication across multiple apps, reducing feature delivery cycles by 40%.
- Improved playback reliability by optimising HLS variant switching, player performance, and caching layers.
- Optimized performance using Core Data, background tasks, image caching, and Instruments profiling.

Sr. iOS Developer

Trihund Solutions **March 2017 - July 2020, Delhi, India**

- Delivered B2B/B2C mobile apps with 90%+ retention through optimized UX, architecture improvements, and caching strategies.
- Configured and integrated analytics, push notifications, and automated crash reporting using Swift, REST APIs, and Firebase, improving feature-level insights by 40%, reducing crash detection time by 60%, and increasing user re-engagement by 25%.
- Collaborated with backend teams to define and consume REST APIs, improving API response efficiency by 30%, reducing network error rates by 20%, and enabling 100% secure data handling through robust Swift networking frameworks and validation layers.
- Implemented Continuous Integration pipelines using Jenkins and Fastlane to automate iOS build and testing workflows, reducing release time by 40% and improving deployment reliability by 30%.

iOS Developer

Alleviate Technologies **January 2013 - February 2017, Jaipur, Rajasthan**

- Built enterprise and consumer mobile applications with offline-first capabilities, secure storage, and reusable UI frameworks, improving data availability by 99%, reducing network failures by 45%, and accelerating UI development speed by 30%.
- Led the full mobile app lifecycle—architecture, development, testing, and App Store deployment—achieving 100% on-time releases, reducing post-release issues by 35%, and improving app performance and stability by 25%.
- Developed offline-first features using Core Data and background sync workflows, increasing sync reliability by 50%, reducing data loss by 90%, and ensuring seamless app usage in low-network environments.

PROJECT

Celebprime

Fanory.ai • www.fanory.com/ • December 2023 - Present

- Developed modular mobile components supporting exclusive media access and secure authentication workflows using REST APIs and encrypted storage, improving login reliability by 40% and reducing auth-related failures by 30%.

- Engineered a scalable platform architecture for Celebprime, enabling seamless video streaming and personalised content delivery, which increased user engagement by 25% and boosted content retention by 35%.
- Integrated adaptive bitrate (ABR) logic, CDN routing, and optimized video playback pipelines, reducing buffering by 45% and improving startup time by 30% across varying network conditions.
- Built offline-first features using background sync and local caching, increasing content accessibility by 60% and reducing network dependency issues by 50%.
- Implemented analytics, event tracking, and behaviour insights via Firebase/Amplitude to drive 15% improvement in user session depth and 20% better personalisation accuracy.
- Collaborated with backend and DevOps teams to refine API contracts, optimize response payloads, and streamline release pipelines, decreasing API latency by 28% and ensuring 100% successful deployment rollout.

HypeClub.ai

Fanory.ai • play.google.com/store/apps/details?id=com.fano.studioapp&hl=en_IE • December 2023 - Present

- Built personalised creator apps on Hypeclub.ai, enabling creators to launch custom Android, iOS, and web apps that increased brand reach by 40% and improved direct audience engagement by 55%.
- Delivered end-to-end brand transformation features, helping creators grow their digital presence and resulting in a 30% increase in subscription conversions and a 25% boost in recurring traffic.
- Engineered creator-specific tools—including content delivery, real-time interaction, and engagement analytics—that improved user retention by 35% and enhanced content monetisation efficiency by 28%.

AllTrak Home Care App

AllTrak Technologies • play.google.com/store/apps/details?id=com.alltrak.homecare&hl=en_IN • September 2021 - November 2023

- Developed the AllTrak Home Care app enabling doctors, nurses, and physiotherapists to manage and complete over 500+ pre-confirmed home appointments per month, improving care delivery efficiency by 30%.
- Implemented real-time appointment scheduling and location tracking, reducing missed visits by 25%.
- Integrated secure patient data management, ensuring HIPAA-compliant storage and access for healthcare providers.
- Optimized in-app notifications and reminders, increasing on-time visit adherence by 40%.
- Designed an intuitive UI/UX for healthcare professionals, decreasing training time for new users by 50%.

AllTrak - Healthcare Field App

AllTrak Technologies Pvt Ltd • play.google.com/store/apps/details?id=com.alltrak.logitrak&hl=en_IN • September 2021 - November 2023

- Built LogiTrak, a mobile application used by healthcare on-field teams to receive, track, and hand over medical logistics with complete audit visibility.
- Enabled riders to process 1,000+ daily pickups and deliveries, ensuring smooth and seamless on-field operations.
- Implemented real-time parcel scanning (QR/barcode), reducing handover errors by 35%.
- Developed live route tracking and optimized task sequencing, improving rider productivity by 25%.
- Added secure proof-of-delivery workflows (e-signature, photo capture), increasing accountability and reducing disputes by 40%.
- Integrated offline-first data sync, enabling uninterrupted operations in poor network zones.
- Designed role-based dashboards for supervisors, improving field visibility and reducing manual follow-ups.

EDUCATION

Master of Computer Applications (MCA)

Minor in Computer Science • LIET (RTU) • Alwar, Rajasthan • 2010–2013 • 73%

Bachelor of Computer Applications (BCA)

Minor in Computer Science • University of Rajasthan • Alwar, Rajasthan • 2007–2010 • 65%

SKILLS

Mobile Platforms: Swift, SwiftUI, SwiftData, Combine, Objective-C, Kotlin, Jetpack Compose, React Native, TypeScript
Streaming & OTT: LL-HLS, HLS, WebRTC (SFU/MCU), AVFoundation, ExoPlayer, CDN, Adaptive Bitrate, FairPlay DRM, ReplayKit, Low-Latency Systems
Healthcare & Logistics: Offline-First Systems, Real-Time Tracking, Barcode/QR, HIPAA-Aligned Flows, Secure Storage
Architecture & Performance Engineering: MVVM, VIPER, Clean Architecture, Modularization, Distributed Mobile Systems, System Design, Distributed System Architecture, Client–Server Scaling, API Gateway Collaboration, Instruments, Memory Footprint Reduction, Battery Optimization, FPS Optimization, App Launch Optimization, Profiling, Load Testing & Observability
CI/CD & Mobile DevOps: Fastlane, Bitrise, Jenkins, GitHub Actions, Xcode Cloud, Code Signing Automation, XCTest / XCUITest, UI Testing Pipelines, Crashlytics
Cloud & Integrations: AWS (CloudFront, S3, Cognito), WebSockets, GraphQL, REST, Reusable SDK Development
Leadership & Strategy: Mobile Team Management, Architecture Governance, Cross-Functional Leadership, Technical Roadmapping, KPI-Driven Leadership, Team Velocity Improvement, Cross-Platform Governance, Architecture Documentation / RFCs, Release Management

Soft Skills: Leadership, Communication, Problem-Solving, Stakeholder Collaboration, Mentorship, Strategic Planning
Core Competencies: Streaming Architecture, Mobile DevOps, Performance Optimization, Cross-Platform Development, API Integrations, Scalability Engineering
