## SUMMARY

Dedicated and versatile Full Stack Developer with expertise in JavaScript, ReactJS, and Node.js. Proven proficiency in state management with Redux, building responsive user interfaces with HTML, CSS, and popular UI libraries such as AntD, ReactStrap, and Material UI. Experienced in unit testing using Jest, and adept at integrating payment systems and implementing SEO strategies in React applications. Skilled in TypeScript, GraphQL, gRPC React, and Apollo for enhanced development. Well-versed in version control with Git. Passionate about delivering high-quality code and continuously exploring new technologies to enhance development efficiency.

## PROJECTS

- **Diamond Jubilee 7 (DJ7)** Link
  *NodeJs, MongoDB, Express, ReactJs, Tailwind CSS, Redux Toolkit*
  - Designed and implemented a comprehensive **RBAC (Role-Based Access Control)** system from scratch, incorporating Authentication and Authorization workflows. Enabled dynamic UI changes based on user roles, ensuring that components, pages, and actions are accessible only to authorized users according to their assigned roles.
  - Implemented automated **Email Functionality** using **SendGrid** to manage and send **Dynamic Emails** for various operations (e.g., account creation, password updates). Utilized SendGrid template IDs to ensure efficient and personalized email delivery
  - Created and maintained scripts that runs through **cron jobs** to generate various types of reports, automating data aggregation and ensuring timely insights.
  - Created test cases to verify API results using the **Jest, Cypress** package, ensuring reliability and correctness of API responses across multiple **micro services**
- **Rymindr** Link
  *NodeJs, MongoDB, Express, Swagger, Firebase*
  - Integrated **JWT** for user authentication and **Razorpay** to enable secure and efficient transactions
  - Incorporated **Firebase** for dynamic **notification** delivery to customer mobile devices, enhancing user engagement
  - Implemented automated **email functionality** for various operations, utilizing **NodeMailer** to send **dynamic emails** efficiently
  - Designed a unique **QR code** system, simplifying the customer registration process
  - Created API documentation using **Swagger** to facilitate communication the mobile team
- **ShiftHero** Link
  *NextJs, Tailwind CSS, GraphQl, Apollo Client and Server*
  - Implemented **GraphQL** with **Apollo Client** packages to optimize data fetching for the frontend, enabling efficient querying, mutation, and consistent state across the application.
  - Utilized the **Apollo Server** package to build a GraphQL API with a structured Schema and Type system, facilitating smooth interactions
  - Implemented User Authentication mechanisms with **JWT tokens** to secure user interactions and data access
  - Converted HTML files into Next.js pages, ensuring seamless integration with the Next.js framework and optimizing performance and functionality
- **Younified** Link
  *NodeJs, ExpressJs, MongoDb*
  - Initiated and led the development of a comprehensive contest management system from scratch.
  - Designed, integrated, and managed database models to ensure efficient data handling.
  - Developed complete functionality for contest registration, entry creation, user voting, winner generation using a unique formula, and prize distribution.
  - Integrated user authentication mechanisms using JWT tokens to ensure secure user interactions and data access throughout the application.
  - Added a **cron** job to automatically identify and generate data.

## SKILLS

- **Frontend :** HTML, CSS, JS, ReactJs, NextJs, Tailwind CSS, Bootstrap, Jest, Cypress, Redux/Toolkit, GraphQl
- **Backend :** JavaScript, TypeScript, NodeJs, ExpressJs, MongoDb, GraphQl, Swagger, Firebase, Sendgrid, Cron
- **Other tools :** Git, Jira, Postman, AWS, Vercel, Netlify, GitHub Pages, Nginx

## EXPERIENCE

- **Cyber Infrastructure (CIS)** Indore, MP
  *Software Developer* *Dec 2021 - Present*
  - Participated in **Agile development** methodologies, actively contributing to Sprint Planning, Retrospectives, and continuous process improvements.
  - Conducted **peer reviews** of Pull Requests/Merge Requests to ensure high code quality and adherence to best practices.
  - Demonstrated **leadership** by training junior team members, mentoring them on key procedures, and fostering a collaborative environment focused on continuous improvement.
  - **Deployed** React and Next.js applications across various platforms, including **GitHub Pages**, **Netlify**, **AWS**, and **Vercel**, and successfully configured domains for each deployment.
  - Managed the deployment of frontend and backend applications on **AWS EC2** instances and served using **NGINX**.
  - Gained experience working with diverse architectural patterns, including **monolithic**, **microservices**, and **microfrontend** architectures, adapting approaches to meet project needs and ensure scalable solutions.

## EDUCATION

- **Sagar Group of Institutions** Bhopal, MP
  *Bachelor of Technology (B.Tech) – 8 GPA* *2018 - 2022*
