Programming Languages	Java, Java Script
Tools	Postman, Selenium Webdriver, Taiko, Orchestrator, Visual Studio Code, Lucid Chart
Version Control Tool	Source Tree and Bit Bucket
Build Tools	Mocha
Methodologies	Waterfall, Agile, Scrum

Project Details

Name of the Project: Mosaic			
Company: Coforge Limited			
Domain: Insurance			
Project Overview: Mosaic is a **data visualization and analytics platform** used for creating interactive dashboards and reports.			
Duration	August 2025 –November 2025	Role	Senior Test Engineer
Project Type	Data Migration	Technology	Data Testing
Responsibilities	• Validate dashboard requirements, data accuracy, transformations, and aggregations • Test interactive visuals, filters, drilldowns, and overall UI consistency • Validate ETL processes, data refresh cycles, and end-to-end data flow from source to target • Perform functional testing, defect tracking, and support release notes		

Name of the Project: Financial Optimization			
Company: Coforge Limited			
Domain: Finance			
Project Overview: The Sprint-Based Financial Optimization project at AFLAC aimed to enhance and streamline key financial processes through Agile sprints.			
Duration	July2024 –June2025	Role	Business Analyst
Project Type	Financial optimization	Technology	Agile, Scrum
Responsibilities	• Led requirement gathering and system analysis for AFLAC's financial optimization project, executed in Agile sprints. • Actively collaborated with stakeholders and development teams to align business needs with technical solutions, while ensuring adherence to compliance standards.		

Name of the Project: Enterprise CRM & Financial Applications			
Company: Coforge Limited			
Domain: Insurance & Banking			
Project Overview: Customized enterprise applications for insurance and banking clients, enabling efficient lead management, business process optimization, and secure asset management.			
Duration	Oct2021 –June2024	Role	Senior Test Engineer
Project Type	Application Maintenance	Technology	Manual & Automation Testing
Responsibilities	• Performed end-to-end manual and automation testing for insurance and banking platforms • Created and maintained test cases from business requirements and user stories • Executed API testing, logged defects in JIRA/Rally, and validated fixes • Collaborated with stakeholders and delivered functional demos		

Name of the Project: 1) State of Agility and Agile Academy – Agile Cockpit Solutions Pvt Ltd 2) Akar - Uniqubic Information Technology and Services			
Project Overview: State of Agility is a SaaS-based agile assessment tool providing data-driven insights through detailed reports. **Akar** is a B2B trade platform connecting manufacturers, traders, retailers, and wholesalers for nationwide wholesale buying and selling.			
Duration	Jan 2019 – June 2020 July 2020- Oct 2021	Role	Software Test Engineer
Project Type	Application Maintenance	Technology	Manual Testing -Mobile & Web
My Responsibilities	• Performed end-to-end **manual functional testing** for Web and Mobile applications • Participated in all **Scrum ceremonies** throughout the sprint lifecycle • Involved in **requirement gathering and analysis**, test planning, test design, and execution • Created & executed **test scenarios and test cases** based on user stories and client's requirement. • Logged, tracked, and managed **defects in JIRA**, ensuring timely resolution and retesting
