Career Objective

Detail-oriented QA Engineer with 4.5 years of experience in manual and automation testing. Skilled in Selenium, Postman, and JMeter, with hands-on knowledge of CCDA parsing, ICD code validation, and HL7 standards. Strong team player with a focus on quality, continuous learning, and Agile delivery.

Professional Experience

- Over 4.5 years of experience in Software Testing, including Manual and Automation Testing.
- Proficient in UI automation using **Selenium WebDriver** with **Java**, and **C#** basic.
- Skilled in **API Testing** using **Postman** and **Performance Testing** using **JMeter**.
- Experience with **TestNG**, **NUnit**, **Data-Driven Frameworks**, and **Page Object Model (POM)**.
- Worked on **ICD code validation** and **CCDA document parsing** for healthcare data integration and compliance.
- Familiar with **Maven** for test automation execution and continuous integration.
- Strong understanding of **Agile methodologies** and participation in all phases of **SDLC/STLC**.
- Hands-on with **Functional**, **Regression**, **System Integration**, **UAT**, and **End-to-End Testing**.
- Experience in preparing **Test Plans**, **Test Cases**, and tracking defects using **JIRA**.
-

Employment

- **QA Engineer** – R P Business Solution, Pune *(Jan 2021 – Dec 2023)*
- **Software Test Engineer** – Conversion Pro, Pune *(Jan 2024 – Jun 2025)*
- **Senior Test Engineer –** Xapton Solution, Freelance(Aug2025 – Oct 2025)

Academic Profile

- Completed Bachelor of Engineering from Amravati University, Amravati, 2017

Skills

- **Automation Tools:** Selenium WebDriver, Eclipse, Visual Studio, Playwright Basic
  Languages: Core Java, C# basic
  Frameworks and Methodologies: TestNG, Data Driven Framework, .net, Nunit, Agile Methodology
  Methodologies: Agile Methodology
  Test Management and Others Tools: JIRA, MySQL, API Postman, JMeter, GitHub, Twilio, ZAP, HL7 quick view, DoseSpot, Twilio

Projects Summary:

Senior Test Engineer | Xapton Solution Aug 2025 – Oct 2025

Project : Dell onboarding application.

Software Tester | Conversion Pro Jan 2024 – June 2025

Domain: Healthcare

Project 1: RiskAssist (Client: InPracSys)

Description: RiskAssist is a healthcare application leveraging data analytics and automation to identify at-risk patients from EMR data. This full-stack solution streamlines recall workflows, facilitates patient communication and enhances clinic compliance, ultimately improving patient care and clinic efficiency. (Link: RiskAssist)

Project 2: AfterFive (Client: InPracSys)

Description: Developed a HIPAA-compliant mobile application facilitating after-hours patient communication with healthcare providers. The application utilizes intelligent call routing, AI-powered transcription, and secure in-app text message, audio and video communication features to improve patient care and clinic efficiency.
(Link: Android App)

- Analyzed functional requirements and identified the testing scope aligned with healthcare workflows.
- Prepared detailed test scenarios, test cases, and test data for functional and regression testing.
- Executed test cases, documented results, and logged defects for timely resolution.
- Performed regression testing after application updates to ensure system stability.
- Designed and developed automated test scripts using **Java**, **Selenium WebDriver**, and **TestNG**.
- Used **TestNG** for managing test execution, grouping, prioritizing test cases, and generating reports.
- Integrated test automation with **Maven** for continuous integration and build verification.
- Applied knowledge of **HL7** standards, **ICD codes**, and **CCDA** documents in testing healthcare applications to ensure data exchange and compliance.
- Participated in daily **Scrum** meetings and sprint activities to provide updates and support Agile delivery.

Quality Analyst | R P Business Solution Jan2021– Aug 2021

Domain: Investment Banking

Project 1: Financial management system

Project Description: The Investment Banking System Testing and Quality Assurance project is designed to ensure an investment banking software system's reliability, security, and performance. The system encompasses various modules, including trading platforms, risk management, compliance, and reporting. The testing process will adhere to industry standards and regulatory requirements to guarantee the delivery of a robust and compliant investment banking solution.

Domain: Healthcare Sep 2021 – Dec 2023

2. Project Name: Clinical-I

Project Description: Healthcare The Healthcare System Testing and Quality Assurance project aims to ensure the reliability, functionality, and security of a healthcare software system. The system under consideration encompasses various modules, including patient management, electronic health records (EHR), billing, and communication interfaces. The testing process will adhere to industry standards and regulatory requirements to guarantee the delivery of a robust and compliant healthcare solution.

Responsibilities:

- Understanding functional requirements and identifying the testing scope.
- Preparing the test scenarios, test cases, and test data for functional testing.

- Responsible for executing test cases and documenting results and defects.
- Performed Regression testing after each modification of the application.
- Design and write test scripts in **Java** using **Selenium WebDriver** and **TestNG** framework to automate functional and regression test cases.
- Created and maintained automation test scripts for web-based applications using Selenium WebDriver.
- Used TestNG for test execution, grouping, prioritizing test cases, and **generating test reports.**

PERSONAL DETAILS:

- **Currently Learning:** AI Automation, Playwright with JavaScript
- **Address:** Pune, Maharashtra –411062
- **Certification and:** HIPAA, Udemy C # and AI testing
- **Achievement:** Start performance award at conversion pro Pune.
