PROFESSIONAL SUMMARY

Detail-oriented Test Engineer with **5** years of experience in **manual testing of web and mobile applications** (Android),**API Testing** and **backend database validation** and Postman for API testing. Strong in writing test cases, analyzing system behavior, debugging and collaborating with cross-functional teams. Proven ability to enhance product quality and support agile development.

EXPERIENCE

1.AI Labelling Analyst | Mobile Technologies Pvt Ltd, Bangalore. Nov 2019- Aug 2020
2.Software Engineer-QA | eBest Mobile Technologies Pvt Ltd, Bangalore. Jan 2021- Present

- **Software Test Engineer with 5 years of experience** in testing **web, Android mobile applications** and backend systems.
- Skilled in analyzing requirements, designing test plans, executing end-to-end test cycles and collaborating in Agile environments
- Proficient in **mobile application testing on Android devices**, including APK installation and UI validation.
- **API** testing using **Postman**, validating pricing and promotions using POST method for end-to-end validation of API flows.
- Performed manual exploratory testing on new modules before automating them, ensured proper coverage and defect identification.
- Executed backend validation using **SQL** queries in **Navicat** to ensure data accuracy post transactions
- Logged and tracked bugs in **JIRA**, working closely with developers to resolve issues across sprints.
- Participated in **Agile ceremonies**: **sprint planning, stand-ups and retrospectives**.

TECHNICAL SKILLS

- Testing Skills: Manual Testing, STLC, Smoke, Functional, System, Integration & Regression Testing, Exploratory & End-to-End Testing, Real-device Android & Tablet Testing.
- API Testing: Postman
- Database: SQL
- Test Management: JIRA
- Methodologies: Agile, Scrum
- Concepts: SDLC, STLC, Test Plans, Test Cases, Defect Reporting.
- Automation Tools(Basic): Selenium WebDriver

PROJECTS

Project title: iMarket 5S Implementation for Optimized Market Execution and Image Recognition

Involves a mobile, Tablet and Web application used by Coca-Cola sales representatives to perform daily market operations. The primary objective of the application is to allow sales reps to log in, visit assigned customers, place product orders (Coca-Cola beverage SKUs) and validate pricing, promotions and inventory in real time.

Client: HCCB (Hindustan Coca Cola Beverages)

Application Type: Web and Android

Skills: Manual Testing, Automation testing, API testing, Database testing and Mobile testing

Tools: Postman and Navicat

Defect Tracking Tool: Jira

Roles and Responsibilities:

- Analyzing and reviewing business requirements to create comprehensive test plans and test cases.
- Conducted database testing by running queries using Navicat to validate data integrity and accuracy.
- Performing smoke, integration, system, Functional and Regression testing.
- Developed and designed testcases based on client requirements, analyzing the impact of these requirements on the system.
- Analyzed and debugged stored procedures to ensure correct execution and performance.
- Utilized Jira for tracking bugs, managing testcases and ensuring resolution through to product delivery.
- Collaborated with cross-functional teams to identify and address potential issues early in the development cycle.
- Provided feedback and recommendations for improvements based on testing outcomes to enhance overall product quality.
- Validated API responses by checking status codes, response times, and data content against expected results to ensure accuracy and performance.
- Performed mobile application testing on Android and Tablet devices, focusing on installation, navigation and responsiveness

2. **Project Title: iMarket/iMentor 7S Implementation for Optimized Market Execution**
   Client: CP&A Trading International

Roles and Responsibilities:

- Responsible for analyzing and reviewing business requirements to develop test plans and test cases.
- Conducted manual Web application and mobile app testing on Android applications with an emphasis on real-device testing for UI, regression, and integration.
- Validated REST APIs via Postman, checking response codes, headers and response in JSON.
- Used SQL to verify data consistency and perform backend checks post user action in mobile apps.
- Raised and tracked issues in JIRA with supporting logs and screenshots.
- Worked closely with the dev team to resolve production issues.

3. **Project Title: iDelivery/Van Sales–Driver Sales, Order and Inventory Tracking System**
   Client: AGL

Roles and Responsibilities:

- Developed and designed testcases based on client requirements, analyzing the impact of these requirements on the system.
- Conducted database testing by running queries using Navicat to validate data integrity and accuracy.
- Executed manual Android app testing for driver sales, order capture, and inventory flows.
- Performed API testing for delivery sync, order submission, and real-time inventory update using Postman.
- Provided feedback and recommendations for improvements based on testing outcomes to enhance overall product quality.
- Participated in end-to-end testing from login to settlement and ensured data reflection in Salesforce backend.

ACHIEVEMENTS

The Ace Performer of the Quarter

Recognized as the Ace Performer of the Quarter for exceptional performance, dedication and significant contributions to project success. Demonstrated excellence in:

- Delivering high-quality work within tight deadlines.
- Identifying and resolving critical issues, ensuring smooth project execution.
- Collaborating effectively with team members and stakeholders to achieve business objectives.
- Upholding a strong commitment to quality and continuous improvement.
- Handled complete Billing process for all clients.

EDUCATION

- Bachelor of Engineering in Electronics and Communication from Visvesvaraya Technological University (2014 - 2018)
