SUMMARY

Detail-oriented QA Engineer experienced in manual testing and embedded system engineering. Skilled in test planning, execution, and collaboration with cross-functional teams. Committed to delivering high-quality results and driving process improvements.

EDUCATION

CGPA 7.31, Masters of Computer Application, Lovely Professional University **2022 - 2024**
CGPA 8.31, Bachelor of Computer Application, Galgotias University **2018 -2021**

EXPERIENCE

QA Associate || GameMano Pvt Ltd Noida, Uttar Pradesh
02/2024 - 31/05/2025

- **Executed over 200 comprehensive test cases for various slot game features and mechanics, identifying and documenting 30+ critical defects that were resolved before release.**
- **Used Unity Profiler and other performance tools to identify and address frame rate drops, memory leaks, and other performance bottlenecks**
- **Conducted manual for Unity 2D and 3D games to ensure optimal gameplay experience and bug-free functionality.**
- **Performed cross-platform testing** to validate game performance and compatibility across multiple devices, operating systems, and screen resolutions.
- **Provided feedback on game design and functionality that led to the implementation of features which improved player engagement by 25%.**
- **Utilized automated testing tools** and scripts to streamline repetitive tasks, reducing manual testing time by **40%** and increasing overall testing efficiency.
- **Participated in regular team meetings and sprint reviews**, contributing insights that led to **a 10% improvement in development cycle efficiency** and quicker turnaround times.
- **Executed exploratory testing**, uncovering **15+ critical issues** not covered by standard test cases, which significantly enhanced overall game quality.
- **Collaborated with developers and designers** to understand game mechanics and provide feedback, resulting in **a 15% increase in user satisfaction scores** based on post-release player surveys.

QA Engineer || QA Engineer | Techbeleiver Technologies Pvt. Ltd, Noida, Uttar Pradesh
03/2022 - 07/2023

- Executed manual tests to verify functionality, performance, and reliability.
- Collaborated with cross-functional teams to define test scenarios and ensure system behaviour understanding.
- Applied domain knowledge in Instrument Cluster and Embedded System Engineering to provide insights and recommendation.
- Documented test results, defects, and relevant information in a clear and organized manner.
- Contributed to process improvement initiatives to enhance testing practices.
- Integrated diagnostic automation to accelerate and sharpen post-production testing.
- Contributed to root cause analysis to determine the core reason for failures and errors.

PROJECTS

- Buffalo|| King of Gods ||Wild Gold Slot Games
  - **Tested the "Buffalo" slot game**, including expanding wilds, wheel bonus, and free spins, achieving a bug-free release.
  - **Performed detailed testing on the "Wild Gold" slot game**, covering expanding wilds, wheel bonus, and free spins, with a successful release.
  - **Executed over 150 test cases** for "Buffalo," "King of God," and "Wild Gold," validating all major features and functionalities.
  - **Monitored game performance metrics** for "Buffalo," "King of God," and "Wild Gold," optimizing load times and stability.
  - Implemented rigorous pre-production testing protocols to identify and resolve potential issues before the games' release, contributing to smoother launches.
  - Managed version control and documentation for all production releases, ensuring traceability and accountability for changes made during the development lifecycle.

- Real Money E-Sports Fantasy Application (Clash X and FanBattle)

  - Developed test cases and execute tests to ensure accurate player selection and investment functionality.
  - Verified the calculation of scores and determined the top scorer. Perform various heavy Api's for declaring results and updating scores Evaluating the user interface, navigation, and overall user experience of the application.
  - Identifying any usability issues, such as confusing layouts, unclear instructions, or unresponsive elements.
  - Assessing the application's performance under different load conditions and identifying any performance bottlenecks.
  - Verifying that the application can handle the expected user traffic without significant slowdowns or crashes.
  - Testing the application on different devices, browsers, and operating systems to ensure compatibility and consistent performance.
  - Verifying that the application functions correctly and displays appropriately across various platforms.

EXPERTISE:

Manual Testing |Load Testing | Web App Testing | Postman |Unity 2D/3D Testing |Web GL builds| 3D /2D Modeling | Mobile Game testing |Performance Testing |SDLC/STLC | CI/CD | Test driven Development |Regression and Integration |Defect Tracking |Azure

ACHIEVEMENTS

- Awarded highest bug hunter while performing expolatory testing.(GameMano)
- Awarded two times employee of the month in (KhiladiAdda)
