SKILLS

Automation Testing: Selenium WebDriver, Java, TestNG, Cucumber, POM, Katalon Studio

API Testing: Rest Assured, Postman, Swagger

CI/CD & Build Tools: Jenkins, Maven

Cross-Browser Testing: BrowserStack

Test Management: JIRA, Test Case Design, Test Estimation, Defect Management, Xray

Framework & Reporting: Extent Reports

Methodologies & Tools: Agile, Scrum, V-Model

Database & Version Control: SQL, Git,GitHub Copilot

CERTIFICATIONS

- Azure DevOps – Fundamentals
- Gen AI Unveiled: A Journey into the Future of Intelligence
- Tosca Automation Specialist – Level 1 & Level 2
- Tosca Design Specialist – Level 1 & Level 2
- Penetration Testing

MANOJ KUMAR A L

Quality Engineering Specialist with 8+ years of experience *in Automation and Functional Testing across E-commerce and Thin Client domains.* ***5+ years of hands-on experience in Selenium WebDriver with Java****, with strong expertise in* ***TestNG, Cucumber (BDD), POM, and Katalon Studio****. Known for clear communication, multitasking, and delivering quality outcomes in Agile environments.*

WORK EXPERIENCE

LTIMindtree Ltd.

Specialist – Quality Engineering | March 2020 – Present

Project: UFSPartnerhub Web Applications (Unilever – E-commerce & PWA)
Domain: E-commerce Web
Role: Automation & API Test Lead
Project Description: UFS Partner Hub is a web based B2B platform developed for Unilever food solution to manage and support its business partners, distributors, wholesaler, sales person.

Responsibilities & Contributions:

- Automated critical **end-to-end workflows** for UFS Partner Hub web and PWA applications across multiple browsers and platforms
- Designed and implemented **custom Selenium + Java automation frameworks** from scratch using **POM, TestNG, Cucumber, Maven**, and **Extent Reports**
- Enhanced existing automation frameworks by improving **reusability, stability, execution speed, and reporting**
- Designed and executed **API automation frameworks using Rest Assured + Java**
- Validated REST APIs for **request/response schemas, status codes, headers, and JSON payloads**
- Performed manual API testing using **Postman and Swagger** for exploratory and integration testing
- Integrated Selenium and API automation suites into **Jenkins CI pipelines**; managed builds and dependencies using **Maven**
- Managed automation code using **Git/GitHub** with standard branching and merge strategies
- Executed **Regression, Functional, Smoke, API, and Cross-browser testing** using **BrowserStack**
- Actively participated in **Agile/Scrum ceremonies** including sprint planning, stand-ups, reviews, and retrospectives
- Owned **automation strategy, estimation, framework maintenance, and sprint-wise execution**
- Led and mentored a **QA team of 3 members**, ensuring on-time releases, audit readiness, and quality compliance
- Acted as **single point of contact** for automation and API testing for the project.

HONORS & AWARDS

- Team Player Award
- A-Spot Award
- Shooting Star Award

LANGUAGES

- English
- Kannada
- Hindi

INTERESTS & HOBBIES

- Sports: Badminton, Cricket, Yoga
- Aquarium fish keeping and indoor plant cultivation
- Exploring emerging IT technologies

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering

Dr. Ambedkar Institute of Technology, Bangalore Visvesvaraya Technological University (VTU), Belgaum |2015

Project: FORMULA 1
Domain: E-commerce Web
Role: Automation & API Test Lead
Project Description: Enables users purchasing UFS products through third-party trade partner websites to enroll in the **UFS Loyalty Program** by providing consent, email address, and business name, allowing them to earn **loyalty points and sales incentives** seamlessly during their regular purchase journey.

Responsibilities & Contributions:

- Validated end-to-end user journeys for purchasing **UFS products via third-party partner websites**, ensuring correct application of **UFS loyalty points and benefits**
- Automated critical workflows covering **user authentication, redirection to third-party sites, purchase confirmation, and loyalty point accrual**
- Designed and maintained **Selenium + Java automation scripts** to verify cross-application integration and data consistency
- Automated backend **API validations** using **Rest Assured** to ensure accurate loyalty point calculation and posting after successful purchases
- Performed **manual and automated API testing** using **Postman and Swagger** to validate third-party integrations and response handling

VXL Instruments Pvt. Ltd.

Senior Test Engineer | May 2018 – March 2020

Project: VXL /Lenovo Thin Clients
Domain: Thin Client
Role: Functional testing / API testing
Project Description: Windows WES7/WES8/WES10 Thin Clients from VXL provide PC-like functionality in a secure thin client form factor and integrate seamlessly into Windows environments. They support **desktop, wireless, and laptop deployments**, along with **MUI (Multilingual User Interface)** for language localization such as Dutch, French, and more.

Responsibilities & Contributions:

- Demonstrated strong expertise in **Quality Assurance methodologies** with hands-on experience in **Functional Testing** of **Web and Desktop applications**.
- Applied **structured testing techniques** with a deep understanding of **SDLC and STLC** processes.
- Performed **root cause analysis**, defect density tracking, and **defect reporting and tracking** using standard QA tools.
- Executed testing across multiple methodologies including **Smoke, Sanity, Regression, Re-testing, Functional, UAT, Unit, Integration, GUI, UI, API, and Database testing**.

- Analysed and maintained **test requirements**, tracked changes, and ensured accurate **requirements traceability**
- Certified **customized OS images** for **Cloud Computing environments**, including **VMware and Citrix** platforms.
- Performed **functional testing** of **Windows Embedded Thin Clients**, supporting **LAN and Wireless network environments**.

Project: VXL FUSION/FUDM
Domain: Thin client
Role: Functional testing / API testing
Project Description: VXL Fusion is a browser-based remote management application that enables system administrators to efficiently monitor, control, and configure **VXL Thin Clients**. It allows centralized management of multiple clients through features such as **group and sub-group creation** based on subnet, IP range, or custom parameters, making it ideal for large enterprise environments.

Responsibilities & Contributions:

- Prepared the **Test Strategy** and guided the QA team on overall test approach and execution
- Contributed to **System Test Plan preparation** and **requirements analysis/streamlining**
- Designed and maintained **test scenarios, test cases, and test data**
- Performed **GUI and Functional testing** using **black-box testing techniques**
- Developed and executed **automation scripts using Selenium WebDriver**, including element locator strategies
- Executed and enhanced **API automation scripts** and validated **Java-based applications** through automated test builds

RMS Technology Pvt. Ltd.

Junior Software Engineer | Feb 2017 – April 2018

- Analyzed **Software Requirement Specifications (SRS)** to identify and document **test scenarios and test cases**.
- Designed and prepared **effective manual test cases**, ensuring coverage across functional requirements.
- Tracked and maintained **test requirements**, including change analysis and traceability.
- Provided **client issue support**, logging, tracking, and managing defects using **JIRA**.
