Pavithra G
Associate Quality Tester
|Automation (Playwright) | Manual & API Testing

(+91) 94893 65641
pavithrag0103@gmail.com

QA Engineer with **3+ years** of experience in healthcare enterprise applications, specializing in Playwright with TypeScript for UI automation, API testing, and SQL backend validation. Experienced in building Page Object Model frameworks, maintaining smoke and sanity automation suites, improving release stability, and collaborating closely with developers in Agile teams

Core Skills

Automation: Playwright (TS), POM Framework, Selenium WebDriver, Test Runner/Fixtures
Testing Types: Functional Testing & Test Case Design, Regression, Smoke, Sanity, Integration, UAT
API Testing: Postman, REST APIs
Database: Oracle SQL, Data Validation
Frameworks: Page Object Model (POM)
Manual: Functional Testing, STLC, Defect Lifecycle, Figma UI/UX Validation
Tools: Jira, GitHub, CI/CD, Agile/Scrum

Professional Experience

Associate QA Engineer – Automation
Syneos Health, Salem | June 2023 – Present

- Designed and executed manual and automated tests for healthcare platforms using Playwright.
- Built a modular **POM framework** with reusable fixtures, cutting setup time by **25%** and duplication by **15–20%**.
- Maintained smoke and sanity automation suites with step-level reporting.
- Automated role-based UI flows across Requests, Assignments, Demand, and Resource modules.
- Performed **API validation** via Postman and **SQL checks** for UI-DB accuracy.
- Performed **Workday HCM data validation** for accurate resource allocation.
- Verified **Salesforce project codes** and backend APIs using Postman.
- Logged and tracked defects in Jira and participated in Agile ceremonies.
- Supported **cross-browser testing** (Chrome, Firefox, Edge) and baseline UI performance checks.

Key Achievements

- Automated most smoke and sanity scenarios, reducing manual work by 60%.
- Improved execution speed by 40% through framework tuning.
- Helped reduce production defect leakage.
- Mentored peers on Playwright best practices.

Key Projects

Project: Bid to Revenue Recognition | Healthcare Domain

Enterprise finance platform supporting forecasting, pricing, revenue recognition, resource allocation, request management, and demand planning.

- Designed and maintained a **modular Playwright automation framework** using Page Object Model (POM) with layered structure for pages, actions, fixtures, utilities, configs, and E2E suites.
- Automated UI test cases for key modules including Resource Management, Requests, Assignments, and Demand using a Playwright POM framework, achieving **95%+ coverage of critical business flows** within smoke and sanity suites.
- Validated complex **Side Menu and Header navigation** to ensure full smoke and sanity coverage.
- Executed **smoke, sanity, and regression suites** for every release cycle to enable early defect detection.
- Performed **Workday HCM data validation** for accurate resource allocation.
- Verified **Salesforce project codes** and backend APIs using Postman.
- Configured environment-based execution through playwright.config.ts.
- Conducted **UI/UX testing against Figma designs** to ensure layout accuracy and design compliance.
- Supported **cross-browser testing** (Chrome, Firefox, Edge) and baseline UI performance checks.
- Collaborated closely with developers to troubleshoot automation failures, improve stability, and standardize QA best practices.

Project: Alnylam Pharmaceuticals | Healthcare Domain
Healthcare analytics application supporting regulatory reporting and compliance.

- Executed **functional, regression, and read-only database testing** to ensure data accuracy and compliance.
- Designed reusable manual test cases from business requirements, increasing coverage by **15–20%**.
- Validated UI behavior and backend data against healthcare compliance standards.
- Logged and tracked defects in **Jira** with screenshots and impact analysis.
- Maintained QA documentation including **test plans, test cases, and execution reports**.
- Participated in Agile ceremonies and supported timely sprint deliveries.

Education

M.Sc. Chemistry
Periyar University, Salem | 2020 – 2022

Certifications

- Selenium Automation – Great Learning
- MySQL Database Certification – Besant Technologies
- Playwright with typescript - Simplilearn
