Summary

Highly skilled QA Automation Engineer with 3+ years of experience in manual and automation testing, specializing in Selenium, Java, and API testing. Proven expertise in improving test coverage, and reducing production defects while ensuring high-quality deliverables. Proficient in creating comprehensive test plans, developing precise test cases, and executing both manual and automated testing processes. Skilled in defect management and adherence to established QA methodologies.

Skills

Languages: Java, SQL

Technologies & Tools: Selenium WebDriver, TestNG, Maven, GitHub, Jira, Azure Devops, Postman, J-meter, Manual Testing, API Testing, BDD Cucumber, Hybrid framework, Rest Assured, Agile Methodology, Eclipse, TestRail,

Work Experience

HCL Technologies Limited, Bangalore Dec 2022 – July 2024

Senior Test Engineer

- Collaborate with cross-functional teams (developers, product managers, QA engineers) to understand product requirements and design comprehensive test plans and define test strategies that align with product development and delivery timelines.
- Test Case Design: Identified test scenarios and wrote detailed test cases using established design techniques, ensuring thorough validation of features.
- Comprehensive Testing: Executed Functionality, Regression, Smoke, Functional, System, Sanity, and Exploratory testing to ensure software reliability and performance.
- Automation Scripting: Developed automation scripts with Selenium WebDriver and Java, utilizing XPath for dynamic and static object handling.
- Created reusable functions with TestNG, optimizing the efficiency of test automation processes.
- Report bugs and issues in a clear and concise manner, and work closely with the development team to resolve them.
- Expertise in validating API responses using JSON path in Postman.
- Used all the web methods like **GET, POST, PUT, DELETE**.
- Validate Response in JSON formatted data for different HTTP Status code like **200, 201, 400, 401, 500 etc**.
- Good Experience Performance testing of API using JMeter with Xml and Json file.
- Active participant in project status meetings, collaborating effectively with team members to drive project success.

GammaEdge Technologies Pvt Ltd, Indore May 2021 - Nov 2022

Software Test Engineer

- Understanding the Functional Requirements and Clients Business Work Flow.
- Identified test scenarios and wrote detailed test cases using established design techniques, ensuring thorough validation of features.
- Developed automation test scripts with **Selenium WebDriver** using **Java**.
- Used **Xpath** to work with dynamic and static objects in Selenium.
- Performed Functional and Regression Testing using Selenium WebDriver.
- Developed re-usable functions using **TestNG** for test automation.
- Prepared **Traceability Matrix** to ensure the adequate coverage of the test cases.
- Writing clear and detailed bug reports, participate in bug discussion and follow them to resolution.
- Logging the defect and tracking the defect using Jira defect tracking tool.
- Involved in Test Execution across different phases of testing both manually and through Automation.

Education

Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal July 2015 - Jun 2019

B.E (Bachelor of Engineering) **CGPA – 6.98**

Projects

- **Impulse:** Impulse is an ERP system used to track business resources (such as cash, raw materials, and production capacity) and the status of commitments made by the business (such as customer orders, purchase orders) no matter which department (manufacturing, purchasing, sales, accounting, and so on) has entered the data into the system.
  Impulse facilitates information flow between all business functions inside the organization and manages connections to outside stakeholders. Impulse plays a vital role because it integrates varied organizational systems and enables flawless transactions and production. Impulse is radically different from traditional applications. It has got two main Modules: Admin and User and has various sub modules under user module like: Sales, Purchase, Accounts, Production, Logistic etc.

- **Kaiglo:** Kaiglo is a product of extensive international researches, inter-continental adventure, and the will to pioneer a better approach to e-commerce in Nigeria. They discovered a problem, and they are out to solve it. There's an absence of "shared value" in the tech sector in Africa. They are here to bring in that "shared value" into the tech biosphere.
