SUMMARY

- Quality assurance and engineer with 3+ years of experience with accounting & finance and gaming domain.
- Proficient in API testing (REST Assured, Postman) and mobile automation (Appium), with extensive experience in UI, functional, smoke, and sanity testing across diverse platforms.
- Optimized end-to-end test case management for over 500 test cases, reducing test execution time by 15% through strategic design and execution in Jira.
- Applied AI for predictive defect detection and intelligent test prioritization, significantly enhancing test coverage while reducing manual test maintenance efforts by 40%.

TECH STACK:

- **Automation Testing:** Selenium WebDriver, TestNG, Cucumber (BDD), Appium
- **Programming Languages:** Java, Python (basic)
- **API Testing Tools:** REST Assured, Postman
- **CI/CD Tools:** Jenkins
- **Databases:** MySQL, SQLite
- **Test Management & Defect Tracking:** Jira
- **Build & Version Control:** Maven, Git
- **Testing Types:** Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, API Testing, Mobile Testing

EXPERIENCE

VYAPAR APP – BILLING SOFTWARE July 2024 – *Present*

Quality Assurance Engineer & Automation Specialist

Vyapar is a leading B2B SaaS platform for Indian Micro & Small Businesses (SMEs), serving over 1 Crore+ customers and having raised over ₹300 Crore in funding.

- Led QA for 5+ complex projects within the accounting and finance domain using agile/scrum frameworks for defect management.
- Managed comprehensive manual testing cycles including Functional, UI, Smoke, Sanity, and initial Non-Functional tests for Android/iOS builds, web applications, and specialized POS/EDC machines, resulting in a 10% reduction in post-release defect rates.
- Architected and implemented scalable test automation suites using Selenium WebDriver (Java), TestNG, Maven, and Cucumber (BDD), leveraging Page Object Model (POM) for maintainable code, ultimately reducing regression testing effort by 40%.
- Validated database integrity using SQL queries for MySQL and SQLite, effectively preventing data mismatch issues in 95% of release builds.
- Automated the generation of daily/weekly test reports, providing critical insights into product stability and test execution trends that informed release decisions and accelerated defect prioritization by 15-25%.
- Integrated automated API and regression test suites into Jenkins CI/CD pipelines, enabling daily automated runs and accelerating critical feedback to development
- Contributed to code quality and process optimization by providing targeted feedback in code reviews and conducting knowledge transfer sessions with test case walkthroughs, improved QA process efficiency by 20%.

INGENUITY GAMING PVT. LTD. July 2022 – June 2024

Quality Assurance Engineer

Ingenuity Gaming is a leading casino game development company with a revenue of ₹72.2 Crore, delivering 200+ RNG games annually, live in over 40 markets worldwide.

- Optimized product quality for 7+ online casino games (slots, roulettes) across web and Android, achieving an 80% decrease in critical pre-release defects.
- Collaborated cross-functionally with Hardware, Development, and Business teams to align on testing strategies and ensure 95% timely delivery of key gaming projects.
- Executed functional and integration testing for 9+ land-based slot games on physical gaming terminals, identifying critical software/hardware issues that averted over 10% in potential revenue loss.
- Managed and executed cross-platform test cases across various browsers and devices, enhancing game stability and reducing post-release defect count by 80%.

EDUCATION

GLA University, Mathura

- MCA (2021 – 2023)

Dr. BR Ambedkar University, Agra

- BCA (2017 – 2020)
