EDIGA SHARATH GOUD

Test Engineer | Manual QA Specialist

goudsharath251@gmail.com

+91 9392050584.

PROFESSIONAL SUMMARY

Results-driven Test Engineer with 4+ years of experience in software quality assurance across web and mobile applications. Proficient in the complete Software Testing Life Cycle (STLC) including test planning, test case design, execution, and defect management. Hands-on experience with Agile/Scrum methodologies, working on enterprise-grade projects in the e-commerce and life insurance domains. Skilled in using JIRA, Azure DevOps, Postman, Swagger, and SQL to ensure high-quality software delivery.

TECHNICAL SKILLS

Testing Types: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, GUI Testing, Ad-hoc Testing, System Testing, UAT

Defect & Test Mgmt: JIRA, Azure DevOps, ALM (Application Lifecycle Management)

API Testing: Postman, Swagger

Database: SQL Server Management Studio (SSMS), SQL query validation

Security Testing: BrowserStack, Burp Suite

Methodologies: Agile/Scrum, Waterfall, SDLC, STLC, Sprint Planning, Root Cause Analysis (RCA)

Operating System: Windows

PROFESSIONAL EXPERIENCE

Techmatrics Solutions Pvt. Ltd. | Hyderabad, India

Test Engineer | *March 2022 – Present*

Project: CareFirst Life Insurance | *Role: Test Engineer* | *Team Size: 10* | *Feb 2024 – Present*

Domain: Life Insurance | Tools: Azure DevOps, Postman, Swagger, JIRA, SQL

- Designed and executed test cases based on acceptance criteria of user stories defined in JIRA by the product owner.
- Performed functional, GUI, and regression testing across key modules: For Members, For Employees, For Brokers, For Providers, Life Insurance, and Insurance Basics.
- Logged, tracked, and managed defects through their complete lifecycle in Azure DevOps until closure.
- Validated REST API responses using Postman and Swagger to ensure correct data handling and payload integrity.
- Captured and documented test execution results in Azure DevOps and JIRA for traceability and audit compliance.
- Presented sprint demos to onshore stakeholders and participated in deployment calls for production releases.
- Participated in Agile ceremonies including Scrum stand-ups, sprint planning, review meetings, and sprint retrospectives.
- Conducted Root Cause Analysis (RCA) for critical defects and reported findings to the development and product teams.

Project: eBay E-Commerce Platform | *Role: Functional Tester* | *Team Size: 10 (QA: 2)* | *March 2022 – Feb 2024*

Domain: E-Commerce | Tools: JIRA, ALM, SQL

- Wrote test conditions and test cases for functional requirements, user stories, and SRS documents.

- Executed manual test cases covering modules: Shop by Category, Search, Add to Cart, Customer Care Support, Track Orders, and Notifications.
- Performed GUI testing, functional testing, and regression testing for every build release.
- Managed end-to-end defect lifecycle: logging, tracking, reporting, and coordinating with developers for resolution.
- Kicked off regression suites for every build release to validate new functionality and prevent defect regression.
- Prepared and maintained the Requirements Traceability Matrix (RTM) to ensure complete test coverage against requirements.
- Collaborated with Business Analysts and Software Analysts to clarify functional requirements and resolve ambiguities.
- Participated in defect review meetings and project review meetings, providing QA status updates to stakeholders.

EDUCATION

Bachelor of Commerce (B.Com) – Computer Applications

St. Joseph's Degree College, Rayalaseema University | Graduated: 2018

KEY ACHIEVEMENTS

- Successfully contributed to 2 enterprise-level projects (eBay & CareFirst) with zero missed release deadlines.
- Consistently participated in sprint planning, estimation, and retrospectives, improving team QA efficiency over multiple sprints.
- Identified and resolved critical defects in the CareFirst life insurance platform before production deployment, preventing customer-facing issues.
- Developed comprehensive test cases with full RTM coverage, ensuring zero untested requirements across project milestones.
