CAREER OBJECTIVE

Seeking a challenging software testing opportunity in a dynamic environment where innovation, education and sense of ownership are valued and encouraged to get a competitive and challenging job to deliver the best of my skills and make the best use of my efforts in the growth of the organization and me.

PROFESSIONAL SUMMARY

Technically sophisticated Engineer with around 3.3 years of experience and qualifications primarily in **Server BIOS validation, HP ILO and Storage Products.** Currently working as a **Software Test Engineer** with **Bootcamp Consultancy Pvt Ltd** to **HPE Bangalore.**

TECHNICAL SUMMARY

- Involved in manual testing of **UEFI/BIOS** and its compatibility with various server components in different servers.
- Hands-on experience on different flavors in Linux (RHEL, SLES, Ubuntu) and Windows server (Windows 2016, 2019, 2022).
- Proficient knowledge on **Bootingprocess, Manual testing, Software testing, Functional testing** and debugging skills.
- Good experience in **PCIe, SATA, NVMe**, memory specifications on server system validation.
- Good understanding of **x86 architecture** and hardware components.
- Good knowledge in **VMware** and **RAID** concepts.
- Good knowledge in **DAS, NAS, SAN Networking** and Storage testing.
- Good knowledge of **SATA, SAS**, and **NVMe** Protocols.
- Basic knowledge in **Python**.
- Hands on experience in Bug analysis, Debug and Triage using various tools.
- Hands-on experience in server management interface like **ILO**(BMC) and its usage.
- Good knowledge on **GHS** and DHS.
- Good understanding of **Agile methodology** and Bug life cycle.
- Training, Mentoring and Building the team for project execution.
- Experience in defect tracking and test cases design and test case management using **Jira**.

TECHNICAL SKILLS

Operating Systems	Windows and Linux
Servers	HPE ProLiant
Storage technologies	SATA, NVMe, RAID,DAS,NAS and SAN
Tools	Jira, Putty and ILO
Languages	Python Programming (Basics)

WORK HISTORY

Company: HPE

Role: Software Test Engineer

Duration: December 2021 -Present

Project Name: BIOS firmware Validation and Storage testing.

Roles and Responsibilities:

- Setting up the **physical test bed configuration** for testing and execution.
- Flashing and updating latest **firmware and device drivers** for all the server components.
- Executed rigorous validation protocols after BIOS updates to assess the interoperability of key components including CPUs and memory modules; identified critical incompatibilities that improved server reliability by 25%.
- Validation of BIOS options such as **Hyper threading, PCIe** subsystems.
- Executing the Basic Acceptance Test case for **UEFI System Firmware** and validating the results with **SMBIOS log**s and **ACPI** tables.
- Executing the set of functional test cases related to all the server components like CPU, Memory, TPM, Network cards.
- Running stress/load stress on processor, memory, and disk by using defined stress tools overnight and long run settings.
- Knowledge on troubleshooting **motherboards** for test case execution.
- Debug & Triage for BIOS issues to find out the regression Change list build which caused the issue.
- Experience in **Testing protocols**, **documentation of test results** and **preparing compliance report**s and resolving testing problems.
- Updating and testing compatibility of RAID controller Firmware with different windows /Linux operating systems.
- Hands on experience in validating and Specializing in Storage Testing (SATA, SAS, NVMe, HDD, SSD, PCIe SSD) with different RAID Levels and storage functionality.
- Verify various RAID modes supported by SAS controllers in **HPE ProLiant servers**.
- Running Overnight **I/O operations on storage devices** and verifying the logs.
- Validating all the fields and functionality of ILO (BMC) and its usage.
- Taking end to end responsibility of validation which includes implementing and upgrading of Software and Functional testing.
- Experience in validating **GPU** performance
- Worked on BIOS/firmware validation for **GPU** components.
- Experience with GPU pass through in virtual environment
- Validated **NICs** for speed, throughput, and packet loss using tools like iperf
- Knowledge of networking standards (Ethernet, 1G/10G/25G/40G NICs), protocols (TCP/IP, UDP).

EDUCATION

B.E in Computer Science
CMR Institute of Technology, Bangalore-2021

TRUTH DECLARATION

I am keen to continue my career and prepared to work hard to achieve my goals and the organization objectives. I hereby declare that the details furnished above are true to the best of my knowledge.

PLACE: Bangalore. **(PURUSHOTHAM K M)**
