PPROFILE SUMMARY:

Dedicated QA Engineer with 3.3 years of experience in manual and automated testing across Agile and Waterfall environments. Skilled in application testing, defect identification, and collaborating closely with development teams to ensure high-quality software delivery.

Strong expertise in test design, execution, API testing, and database validation, with hands-on experience in enterprise-level web and middleware applications across domains such as E-Commerce, CMS, Broadcasting & Media, Manufacturing, and Packaging.

Proficient in Functional, Integration, System, Regression, UAT, Smoke, Boundary Value Analysis, and Cross-Browser testing. Experienced in using JIRA and Bugzilla for defect tracking and test management.

Possess a strong understanding of SDLC and STLC, with solid SQL skills for backend and end-to-end testing. Detail-oriented, self-motivated professional with excellent communication skills, capable of working independently and effectively within cross-functional agile teams.

KEY SKILLS:

Bug Tracking & Defect Management

Software Quality Assurance & Testing

Cloud-Based Testing

Functional & Non-Functional Testing

Regression Testing

Integration Testing

Smoke & Sanity Testing

System Testing

User Acceptance Testing (UAT)

Web Application Testing

Mobile Application Testing

Desktop Application Testing

Mobile App UI Testing

API Testing (Postman)

Database Testing (SSMS, MySQL, PostgreSQL)

SQL Query Writing & Validation

TECHNICAL SKILLS:

Test Process & Defect Tracking Tools: HP Quickest Pro (QTP), JIRA, Bugzilla

Software Development Methodologies: Agile, Waterfall

Architecture Knowledge: Object-Oriented Programming (OOP), Client-Server Architecture, Web, Desktop, and Mobile Applications

Databases: MS SQL Server, MySQL, PostgreSQL

Operating Systems: Windows, MacOS

Testing & Supporting Tools: Browser Stack (Android & iOS), Postman, FileZilla, AWS Services

Documentation Tools: MS Excel, MS Word, Google Docs

PROFESSIONAL EXPERIENCE:

Senior QA Engineer

Jothi Software PVT LTD, **June 2022 – Aug 2025**

Worked as a QA Engineer involved in the development, testing, and integration of web, mobile, and desktop-based applications in an agile environment.

Led functional and integration testing for web, mobile, and desktop portals integrated with backend custom applications used for consumer and wholesale business accounting and manufacturing systems.

Performed static testing by reviewing functional requirements and business specifications.

Executed dynamic testing, including smoke, functional, and regression testing.

Tested e-commerce application features, including product search, shopping cart, purchase orders, and transaction processing.

Created and executed test artifacts, including test plans, test scenarios, test cases, and test reports.

Conducted testing in QA, UAT, and Production environments to ensure application stability and quality.

Provided weekly status reports to the Project Manager and Team Lead and collaborated closely with development teams.

Contributed to UI design discussions and supported database validation using MS SQL Server.

Used JIRA as a defect tracking tool to log, track, and manage defects.

Actively analysed and reviewed project requirements and specifications to ensure completeness and accuracy during the early phases of the SDLC and STLC.

PROJECTS:

CUBEDOTS: **JUNE 2022- AUG 2025**

Cube Dots is an online real estate sales platform that allows developers and agents to sell property anywhere at any time. It has three distinct portals for customers, agents, and administrators, each with multilingual features.

Product Type: Web & Mobile Application

Tools: Browser Stack (Android & iOS)

Database: MySQL

Technologies: JavaScript, React

POACHED: **JUNE 2022 - JAN 2024**

Poached is job Searching and posting Plat form for the food Industry. Employers can also Post the gigs for particular shifts. It has common login panel for all three types of portals for Job Poster, Job Seeker and Admin Panel. It has Elastic searching Jobs, Messaging Services, Iterable Services for Push notification, Messaging, Email, SMS

Product Type: Web & Mobile Application

Tools: BrowserStack (Android & iOS)

Technologies: EmberJS, SailsJS

MONSOON MARKETPLACE E-COMMERCE: **JUNE 2022 - AUG 2025**

Monsoon is an e-commerce WPF application that supports Amazon, eBay, Walmart, and FBA. Inventory management, listing management, order management, dynamic reprising and customer inventory reports. The application is targeted at customers with inventory in multiple online stores.

Product Type: Desktop Application

Tools: Postman, FileZilla

AWS Services: SQS, Lambda, Cloud Watch

Database: SQL Server 2019, PostgreSQL

Technologies: C#, Java, NodeJS

OS: Windows 10 & 11

EDUCATION:

Master of Computer Applications (MCA)

Alagappa University, Karaikudi

2020 – 2022

Bachelor of Science (B.Sc.) in Computer Science

Arul Anandar College, Karumathur, Madurai

2017 – 2020
