Professional Summary

Detail-oriented QA Engineer with 4 years of experience in Manual Testing, API Testing, Mobile Testing (Android/iOS), and Database Validation in Agile environments. Skilled in designing high-quality test cases, executing functional/regression test cycles, and ensuring product quality in Agile/Scrum environments. Strong experience with Postman, JIRA, Azure DevOps, SQL, OCR validation, and end-to-end workflow testing. Proven ability to improve test coverage, enhance product stability, and collaborate efficiently with cross-functional teams.

Technical Skills

- **Testing Types:** Manual Testing, Functional Testing, Regression Testing, UAT
- **API & Tools:** Postman, Swagger, API Workflow Testing, JSON, XML
- **Test Management:** JIRA, Azure DevOps, QASE, Test Planning, Defect Tracking
- **Databases:** SQL Server, MySQL, DBeaver
- **Platforms:** Web, Android, iOS
- **Others:** Google Analytics, OCR Testing, Logs Monitoring

Work Experience

Aloha Technology Pvt. Ltd | Software QA Engineer (Aug 2021 – Present)

Project #1: Digital Business Integration

Description: Worked on an enterprise-level Accounts Payable and Payroll Management application designed to streamline invoice processing, employee time tracking, attendance management, and payroll calculations. Validated end-to-end workflows including invoice creation, approvals, ERP exports, and OCR-based data extraction. Additionally tested employee modules such as timesheets, punch in/out, attendance logs, shifts, leaves, and payroll reporting.

Roles and Responsibilities:

- Analyzed business requirements using Figma and designed and executed test cases.
- Performed Functional, Integration, Regression, Smoke, and UAT testing.
- Conducted API Testing using Postman and validated workflow.
- Retested defect fixes and maintained test suites, achieving 90% reduction in post-release defects.
- Tracked defects in JIRA and Azure DevOps, following with developers for quick resolution.
- Performed OCR validation for invoice digitization.
- Validated Payroll modules including punch-in/out, timesheets, approvals, and reporting.
- Participated in Agile ceremonies (Sprint Planning, Stand-ups, Refinement and Retrospectives).

Project #2: Compliance Capture System

Description: Data driven Messaging Monitoring Dashboard project where user onboarding/offboarding workflows across multiple messaging platforms (iMessage, GMessage, WhatsApp). The project involved verifying real-time user status, message counts, scheduler-based data updates, and cross-platform login functionality using Android & iOS devices. Also performed backend validation using DBeaver DB, monitored logs, and ensured accurate data sync after scheduler jobs.

Roles and Responsibilities:

- Tested the dashboard for user listing, network status, and message count accuracy.
- Validated onboarding/offboarding workflows for iMessage, GMessage, and WhatsApp on Android & iOS devices.
- Checked real-time user status updates after scheduler execution.
- Validated message sync and activity for last 24–48 hrs and device login status.
- Performed backend verification using DBeaver logs and database records.
- Checked failed onboard users, newly onboarded users, and disconnection users.
- Reported defects and coordinated with developers for issue resolution.
- Sent daily execution and user activity reports via Basecamp.

Key Achievements

- Improved test coverage by 35% through enhanced test case design and scenario optimization.
- Reduced production defects by 28% by implementing early defect detection strategies.
- Achieved 90% reduction in post-release issues using robust regression suites and workflow validation.

Education

Bachelor of Engineering (BE), NMU, Jalgaon, India (2016–2020)

Soft Skills

- Problem Solving
- Adaptability
- Team Collaboration
- Communication
- Goal-Oriented

Personal Details

DOB: 5th April 1998.

Spoken Languages: Hindi, English and Marathi.

Address: Pune, India
