PROFESSIONAL SUMMARY

- Results-driven QA professional with 3+ years of specialized experience in Data Warehouse (DW) and ETL Testing, Business Intelligence (BI) Testing, Blackbox Testing, UI Testing, and Manual Testing. Adept at ensuring the highest standards of quality
- Experience in developing SQL scripts to validate the database tables and Power BI reports data for backend database testing in **AWS Redshift.**
- Proficient in Data Verification, Data Validation.
- knowledge of testing and validating **Data Warehouse**
- Experience in handling and processing **ETL applications** with extensive knowledge of testing.
- Knowledge on **SQL (DDL, DML, DCL Commands),**
- Expertise in Test Management and Defect Tracking tools like **JIRA.**
- Well acquainted with QA methodology, Software Development Life Cycle and Software Test Life Cycle including Requirement management, Test Scenario design, Test Case creation, Test execution, Bug Tracking, Result Analysis, Preparing Status reports in each Sprint/Iteration.
- Strong Analytical capacity in analysis of Business, Functional, and test requirement.
- Have knowledge of **Azure Cloud (Blob, SQL, ML, VM's)**
- Good interpersonal skills, committed, result oriented, hard working with a quest and zeal to learn new technologies.

EDUCATION

- Bachelor's Degree in from Visveswaraiah Technological University (VTU)

EXPERIENCE:

- Currently working as **Senior software engineer ETL testing in Accenture LTD** from Jan 2025 to present.
- Worked as **Senior quality engineer ETL testing in LTI Mind tree LTD** from Oct 2021 to Dec 2024.

TECHNICAL SKILLS

DWH:	AWS redshift, SAP HANA
Technology:	Big data (Control-m,Airflow,Putty,Winscp,Hive)
Methodologies:	Agile, Waterfall
BI Tool:	Power BI, Qlik
Management tool:	Jira, ALM, ADO
language:	SQL

PROJECTS

Current Project details:

- Project Name : Aspire Data factory Phase 2
- Client : Standard Chartered Bank
- Role : ETL Tester
- Technology : Big data
- Testing : ETL
- Management Tool : ADO
- Description : ADF Has been developed to curate key, up-to-date insight for centralized accounting system for various products present in the Banking system across various countries.

Roles and Responsibilities:

- Participate in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Collaborate with developers and business analysts to understand project requirements and user stories.
- To Understand the detailed design, business requirement, Source to Target mapping document.
- Develop and execute test plans, test cases, and test scripts to validate ETL processes and data transformations.
- Involved in Data extraction and profiling activities.
- Providing UAT support, handling defect triage call and conducting root cause analysis
- Conduct ETL testing on data migration and integration projects, ensuring data quality and consistency across different platforms.
- Perform regression testing to identify and resolve issues during software releases and updates.
- Document test results, defects, and resolutions in defect tracking tools such as JIRA.
- Provided mentoring and training to junior team members on ETL testing best practices.
- Provided support to other teams like preparing SQL queries for data masking and data sourcing activities.

Previous Project details:

- Project Name : **ATLAS**
- Client : AstraZeneca
- Role : ETL and BI Tester
- Technology : AWS redshift, POWER BI
- Testing : ETL and BI
- Management Tool : Jira
- Description : Atlas Has been developed to curate key, up-to-date insight that illustrate and visualizes that unmet need across disease area of interest. Atlas aims to demonstrate the variance in prevalence, patient outcomes and service delivery at nation and region levels across different countries.

Roles and Responsibilities:

- Participate in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Collaborate with developers and business analysts to understand project requirements and user stories.
- To Understand the detailed design, business requirement, Source to Target mapping document.
- Develop and execute test plans, test cases, and test scripts to validate ETL processes and data transformations, Power BI reports.
- Providing UAT support, handling defect triage call and conducting root cause analysis
- Tested number of complex ETL mappings for full load and incremental loads.
- Conduct ETL testing on data migration and integration projects, ensuring data quality and

consistency across different platforms.

- Perform regression testing to identify and resolve issues during software releases and updates.
- Utilize SQL queries to extract, manipulate, and validate data from relational databases and Power BI reports and end to end testing perspective.
- Document test results, defects, and resolutions in defect tracking tools such as JIRA.
- Provided mentoring and training to junior team members on ETL testing best practices.
