Nagaraja B M
Email ID: bmnagaraja017@gmail.com
Contact Number: 9538144637

Professional Summary:

- Having 5 **years of experience** in Software Testing with expertise in both **Automation and Manual Testing**.
- Strong knowledge of **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)** in Agile and Waterfall environments.
- Proficient in **Selenium WebDriver, Playwright, Appium, TestNG, Maven, and Apache POI** for test automation.
- Skilled in developing and executing automation frameworks using **BDD Cucumber** for behaviour-driven testing.
- Extensive experience in **Functional, Regression, Integration, System, UAT, Cross-Browser, Performance, Security,** and **Compatibility Testing**.
- Strong hands-on expertise in **Playwright Automation Testing**, supporting multi-browser and parallel executions.
- Proficient in **API Testing** using **Postman, Rest Assured,** and **SOAPUI**, validating REST and SOAP services.
- Expertise in working with HTTP methods like **GET, POST, PUT, DELETE** in API/Web Services Testing.
- Experience in writing dynamic and robust **XPath, CSS Selectors,** and **Playwright Locators** to identify web elements.
- Well-versed in **Test Data Management** using Apache POI and TestNG Data Providers for data-driven testing.
- Hands-on experience in **CI/CD pipeline integration** using **Jenkins** and build management with **Maven**.
- Experienced in version control and collaborative code management using **GitHub**.
- Proficient in **Agile test management** and defect lifecycle tracking using **Jira** and **HP ALM**.
- Performed extensive **Cross-Browser Testing** on Chrome, Firefox, Safari, and Internet Explorer using Selenium and Playwright.
- Good working knowledge of **Core Java, SQL Queries, Joins, HTML, XML, along with JavaScript and Node.js-based testing frameworks** for backend and UI validations.
- Experience in coordinating **User Acceptance Testing (UAT)** and supporting environment setup activities.
- Collaborated closely with **developers, business analysts, product managers,** and cross-functional teams.
- Delivered high-quality testing solutions across **Healthcare, Banking,** and **Telecom** domains with domain-specific standards.
- Excellent **communication, documentation,** and **team collaboration skills**, consistently contributing to project success.

Educational:

- BE from MANGALORE INSTITUTE OF TECHNOLOGY & ENGINEERING, MOODABIDRI (2021).

Professional Experience:

- Working in Tech Mahindra from Mar 2021 to till now.

Technical Skills:

Automation	: Web Automation, BDD-Cucumber
Frameworks IDE	: Eclipse
Testing Tools	: Selenium WebDriver, Cucumber, Postman, Appium, JMeter, Playwright
Bug Tracking Tools	: JIRA, HP ALM/Quality Center
CI / CD Pipeline	: Jenkins
Build Tool	: Maven
Version Control	: Git
Systems Operating	: Mac, Windows/Lin
Systems Languages	: Java
Web Services	: SOAP UI, REST
Database	: Oracle, SQL Server, MySQL, MongoDB
Other	: Agile, Waterfall, Log4j, GitHub
Environment& Tools	: J2EE, Core Java, Windows11, Selenium (IDE, TestNG, Web driver), Jira, GitHub, Appium, Postman, MongoDB, Eclipse, Maven, Jenkins.

Projects:

Project#1: GMR Horizon

Description:

GMR application is an interactive tool intended for USA audience. The output of the tool, which includes the likelihood of various outcomes. The tool provides an analysis based on your input and makes a number of additional assumptions to assist you with retirement planning needs.

Tools & Technology: Eclipse IDE, Selenium WebDriver, Java, Automation Testing, Rest Assured Manual Testing TestNG, JavaScript, Jenkins, BDD, Cucumber, Node.js-based testing frameworks, Maven, Junit, JMeter, SOAPUI, XML, GIT, SQL, Playwright.

Responsibilities:

- Worked in Agile environment, reviewing the User Stories to gain understanding of implementation
- Attended the sprint plan meetings, daily stand-up meetings, Bug review meetings, weekly status meetings, retrospect meetings and walk throughs and interacted with Business Analysts and Developers for resolving Defects.
- Prepared and Executed Automation Test Cases as per Requirements using Selenium Web Driver using java.
- Selected the Test Cases to be automated and performed functional testing of the front-end using Selenium Web Driver and TestNG.
- Performed Data driven testing of the web-based tool using selenium Web Driver using java and TestNG.
- Reviewing the Test Reports using TestNG.
- Created POM (page object model) and data driven framework for selenium test scripts.
- Performed Input Validations, User Interface Validations, Browser Compatibility testing and Navigation testing.
- Developed BDD (cucumber) framework for executing selenium test scripts.

- Integrate TestNG & Selenium scripts with build tool Maven.
- Collaborated with developers and QA teams to perform functional and regression testing, ensuring robust backend and frontend validations using SQL, XML, HTML, and JavaScript-based tools.
- Implemented the Logger using Log4J for Selenium test cases.

- Using Jenkins created test build and run it using GITHUB or build.xml for selenium automation framework.
- Performed Web Services automation testing using Postman.
- Added property transfers, data gen, test suites, groovy script using SoapUI tool to validate the Web Services / SOAP REST API testing.
- Tested the REST calls (POST, GET, PUT, DELETE methods) using Postman Tool.
- Developed automation scripts for Mobile applications on iOS and Android platforms using Appium & Java.
- Identified mobile elements using Appium Inspector, UI Automator Viewer.

Project#2: Venus Health Navigator

Description:

Venus application is to support identifying Harken centers, End user is able to search the drugs, doctors, harken centers. The application helps the customer to identify medications cost, medications type with great ease. The end user can set an appointment in the portal.

Tools & Technology: Selenium WebDriver, Java, JavaScript, TestNG, Jenkins, CI/CD, ETL Testing, BDD, Cucumber, Maven, Junit, Jira, Automation Testing, Manul Testing, Playwright.

Responsibilities:

- Understanding the Functional Requirements and designed and prepared Test cases to validate the results.
- Execute test cases to validate the results, Logging Test Results (How many Test cases passes/failed).
- Defect Report and Tracking. Retest fixed defects of previous builds.
- Used Postman for testing RESTful services, validating request-response structures, and chaining API calls using environment variables.
- Preparing and sending of status Reports to Lead on assigned tasks.
- Participated in regular meetings, team meetings by lead & Manager.
- Good experience in mobile testing using Appium in both iOS & Android applications using simulator and emulator.
- Executed Linux commands to debug the issues, FTP the log files to windows and emailed to developers
- Used grep, find, PS and other commands in UNIX / Linux as needed.
- Executed Shell scripts to start / stop the web server, app server. Validated cronjob settings in Unix / Linux.
- Prepared Traceability Matrix to show the test coverage requirement vs. Test scripts.
- Developed and executed manual Test Cases in HP ALM.
- Performed various testing like smoke testing, functional testing and Regression Testing.
- Involved in querying using SQL and updating records and validate database records as expected.
- Work Collaboratively with Offshore Team and multiple teams at Onsite

Project#3: E **-Commerce Website Testing**

Project Title: Online Shopping Portal – Functional Testing
Description:
Tested basic features of an e-commerce website such as user login, product search, add to cart, and checkout.

Responsibilities:

- Prepared test scenarios and test cases
- Performed functional and UI testing
- Logged defects in Excel/JIRA
- Verified bug fixes and retested
- Prepared daily/weekly status reports
