Vinitha Kuppireddy

Mobile: 6309623154
E-mail: Vinithakuppireddy1806@gmail.com

Summary of Experience:

- Having 3 Years of experience in **software testing.**
- Experience in handling **Client calls & Demo's.**
- Experience in handling a **Team of people.**
- Giving product **Demo** & Taking **work updates.**
- Extensively worked on both **Web based applications and Mobile Apps.**
- Understanding the various levels of Software Development Life Cycle **(SDLC)** and Software Testing Life Cycle **(STLC)**
- Experience in writing, reviewing and executing the test cases.
- Expertise in **Functional testing, Regression testing, Usability testing, Smoke testing and sanity testing**.
- Proficient in all the stages of **Bug Life Cycle (BLC)**
- Well known for **Agile** methodologies.
- Experience in **API** Testing.
- Experience in industrial automation, sensor calibration, PLC/DCS systems.
- Analyzed software and hardware requirements and design documents to develop detailed test scenarios and test cases.
- Performed manual testing for web and mobile applications across different browsers and devices.

Academic Profile:

- Bachelor of engineering (B.Tech) Electronics and Instrumentation Engineering from Vignan Institute of Technology and Science, Hyderabad.

Professional Experience*:*

- Worked a Test Engineer for **Cyient Ltd** from Dec 2022 to till now.
- Worked as an Instrumentation and control Engineer for **CyientLtd** from Dec 2022 – Oct 2023.

Skill Set:

- **Manual Testing:** Functional & Non-Functional
- **Mobile Manual Testing:** Real & Native devices (Android & iOS)
- **Bug Tracking Tools:** Clickup, Jira
- **Testing Tool : Tenjin, TestLink**
- **Documentation :** Test Plan Creation, Test Case Design, Test Datasheets, Bug Reports, Test Reports.
- MS-Office.

Work Experience: Cyient Ltd

Responsibilities:

- Analysing Design/ Requirement / Functional Specification documents.
- Involved in the preparation of Test Scenarios, Test Cases and Test Execution for various levels of testing like Functional and Non-Functional Testing.
- Prepare the test conditions and test data.
- Written Test Cases covering both positive and negative test scenarios from the specification documents.
- Understanding the requirements to create test cases.
- Map the requirements with the test cases for Requirement traceability matrix.
- Performing Functional Testing, System Testing, UI testing and Smoke Testing.
- Executed the written Test cases.
- Tracking the defects and reporting the defects using defect tracking tool.
- Performed Regression testing after each modification of the application.
- Understanding the impact of changes which are expected in existing system (Impact Analysis).

Mobile App Testing:

- Worked on Mobile Real & Native devices (Android & iOS) app testing
- Verifying functionality and UI issues from build and raising bugs.
- Checking app in different devices and versions.
- Testing iOS Native apps from Browser stack.
- Suggesting design points to make app user friendly.
- Installing apps from Play Store for android and Test flight for iOS app.

Web based application Testing:

- Worked on end-to-end manual testing of web-based applications across multiple browsers (Chrome, Edge) to ensure functionality, usability, and cross-browser compatibility.
- Created and executed detailed test cJira, collaborating with developers to ensure timely resolution.
- Participated in daily Scrum meetingases based on functional specifications and business requirements.
- Logged and tracked defects using
- s and sprint planning as part of an Agile team.

Agile Process:

- Attending the daily stand-up meetings
- Attending client calls for giving the updates
- Updating Status sheet and helping the lead in status report
- Participating in the weekly status and Feature discussion with the Team members
- Discussing design modifications and requirements with the design team
