PROFESSIONAL SYNOPSIS

- Around 3 Years of professional work experience in various aspects of the software quality assurance using Black box testing for both web and mobile applications
- Articulate knowledge of all phases of Software Testing Life Cycle (STLC) and Software Development Life Cycle (SDLC)
- Expertise in creating Test Strategy Documents, Test Plan, Test Case Design, Test Case Execution, Test Case Review, Defect logging, Generate Test Reports etc.
- Adept in participating in Project Management Meetings as QA Representative and involved in Go/No-Go meetings
- Expertise in all stages of testing, such as Requirement analysis, Test planning, Test Case creation, Test execution, Defect reporting and tracking using TFS, Regression Testing, Integration Testing, End to End Testing, Functional Testing, Smoke Testing.
- Possess strong problem solving, analytical & critical thinking skills to provide data-driven and result-oriented solutions to complex business problems, resulting in Cost Optimization and Revenue Growth
- Having good knowledge on MS SQL Server queries and commands.
- Good Exposure on JIRA
- Capable of managing clients for entire business practices and procedures; expertise in analysing client's business and requirements, suggesting and implementing processes to deliver high quality business solutions and recommendations.
- Exposure in Preparing and Maintaining Test Specification and identifying Test Scenarios.
- Expertise in Writing, Reviewing and Execution of Test cases based on Business Requirement Document and Software Requirement Specification

CORE COMPETENCIES

- Manual Testing
- Testing Methodologies
- Project Coordination
- Quality Control
- Software Testing Life Cycle (STLC)
- Project Scoping, Scheduling& Management
- Quality Assurance
- Customer/Client
- Relationship Management
- Defects Tracking
- Domain Product Knowledge
- Agile Methodology
- Establish Effective Communication

ACADEMIC CREDENTIALS

- BE/B tech

TECHNICAL SKILLS

Testing Tools	Manual Testing
Tools	API POSTMEN
Data base	MS SQL
Mobile Testing	browserStack

Databases	MS SQL Server
Test Management Tools	JIRA. TestRail
Operating Systems	Windows 10

CAREER SUMMARY

- Working as a Software Test Engineer with Indium Software Pvt Ltd since May 2022.

Product Title #1	**Game of Throne's Slots Casino Project**
Clients	Zynga
Organization	Indium Software Pvt Ltd.
Duration	May 2022 to Sep.
Role	Software Test Eng.
Team Size	20
Testing	Black Box testing, Functional Testing, JIRA & SQL Server. BrowserStack

Roles & Responsibilities:

- Review requirements, specifications, user documentation, help files, and other project documentation to assure the quality of the products and tests to be developed; i.e., perform manual static testing.
- Challenges which are faced while executing the application will be discussed with the Project Manager and client.
- Participate in the Change Control Board to identify the quality implications of known bugs and the impact of proposed changes to product definition on the testing process.
- Ensure proper version control and configuration management of all test objects developed and test environments used.
- Perform Functional, Operational, Installation, uninstallation, usability, Interrupted, UAT, memory Leakage, Performance, Security and Compatibility.

Responsibilities:

- Review requirements, specifications, user documentation, help files, and other project documentation to assure quality of the products and tests to be developed; i.e., perform manual static testing.
- Supporting the Test Manager in achieving their strategic goals for the Test Team by providing technical support to the Manager and the team
- Possess broad awareness of testing approaches, practices and techniques in order to help design and deliver the overall testing methodology used by the team
- Have the ability to monitor the effectiveness of the testing function and bring about improvements through insights gained via analysis at all stages of the SDLC/STLC
- Identify what tools and technologies can be implemented, aligning with that already used across the broader development function and in-line with the skill-set of the team
- Attend daily stand-ups.

- Test throughout the sprint.
- Meet with developers for short hand-off demonstrations.
- Conducting Sprint planning, Sprint Status & Retrospectives meetings.
- Document Test cases.
- Review and understand existing bug reports, test plans, test processes.
- Work with project managers and development architects to define improved coding standards and test instrumentation and interfaces.
- Work with support team to gather end-user metrics on bugs reported, and demonstrate to management that your efforts have resulted in higher quality.

Results Tracking and Reporting

- Research and document bug reports following agreed-upon processes immediately upon discovery of a quality problem.
- Update test execution status following agreed-upon processes as part of regularly-scheduled test status updates.
- Trace test cases and results back to specific quality risks.
- Assist the Test Manager in the creation of test project status reports and metrics (e.g., Test Dashboard).

PERSONAL DETAILS:

Date of Birth	:11-06-1999
Marital Status	:Single
Languages Known	:English, Hindi & Telugu
